45° Brass Flare Fittings

- Two piece construction – nut and body
- Use with copper, brass, aluminum, or steel tubing
- -65° to +250° F. temperature range
- Standard fittings use short nuts. Long nuts are available for higher vibration applications
- Resists mechanical pullout
- Easy to disassemble and can be reassembled many times, with no effect on the seal
- Primary uses: fuel equipment, plumbing, gases, refrigeration, and vacuum lines

To Assemble:

- 1 Cut smooth, square end on tubing
- 2 Slide nut onto tube—threads facing end
- 3 Flare end of tube
- 4 Thread nut to body until snug, then 1/6th turn

Brass Inverted Flare

- Two piece construction – nut and body
- Use with copper, brass, aluminum, or steel tubing
- -65° to +250° F. temperature range
- Seats and threads are recessed, protecting them
- Shorter overall length, for limited space applications
- Shorter nut allows tubing to be bent closer to fitting
- Fair vibration resistance
- Resists mechanical pullout
- Easy to disassemble, and can be reassembled many times, with no effect on the seal
- Primary uses: liquids, gases, and hydraulic brake systems

To Assemble:

- 1 Cut smooth, square end on tubing
- 2 Slide nut on tube—threads facing end
- 3 Flare end of tube
- 4 Thread nut onto body until snug, then 1/6th turn

Brass Compression Fittings

- Three piece construction—nut, sleeve (or ferrule) and body
- Use with copper, aluminum, or plastic tubing (plastic requires 60P sleeve and 61P insert)
- -65° to +250° F. temperature range
- Standard fittings use short nuts. Long nuts are available for higher vibration applications. To buy compression fittings with long nut, please add a "1" in front of the part number. (i.e. 68 = 168)
- Easy to disassemble, no flaring tool required
- Primary uses: water, gasoline, oil, and vacuum lines

To Assemble:

- 1 Cut smooth, square end on tubing
- 2 Slide nut, then sleeve onto tube. Threads must face end
- 3 Insert tube into fitting
- 4 Thread nut onto fitting until snug, then as follows:

up to 1/4"	1 1/4 turns
5/16"	1 3/4 turns
3/8" and up	2 1/4 turns

Brass Double Compression Threaded Sleeve Fittings

- Two piece construction – nut and body
- Use with copper, brass, aluminum, and plastic tubing (plastic requires insert 61P)
- -65° to +250° F. temperature range
- No special tubing preparation
- Fair vibration resistance
- Primary uses: automotive and gas control valves

To Assemble:

- 1 Cut smooth, square end on tubing
- 2 Slide nut onto tube—threads facing end
- 3 Insert tube into fitting
- 4 Thread nut into fitting until snug, then 1 1/2 turns

Brass Self-Aligning Compression Fittings

- Sleeve and nut permanently attached
- Sleeve is visible after installation, helping to eliminate misaligned sleeves
- Two piece construction – nut and body
- Use with copper, brass, aluminum, or plastic tubing (plastic requires insert 61P)
- -65° to +250° F. temperature range
- Quicker assembly than flare or regular compression
- Better vibration resistance than regular compression fittings
- Can be used anywhere a regular compression fitting is used, especially when installation may be difficult

To Assemble:

- 1 Cut smooth, square end on tubing
- 2 Slide nut over tube, threads facing end
- 3 Insert tube into fitting
- 4 Thread nut onto fitting until snug, then one more turn

----------------------	---------

* For cutting polyethylene, pex, nylon, plastic and rubber tubing.

Poly-Connect® Brass Flareless Tube Fittings

- Three piece construction-nut, sleeve and body
- Use with copper, aluminum, plastic, or nylon tubing (copper, aluminum, and nylon tubing requires a brass sleeve)
- -65° to +250° F temperature range with brass sleeve
- -40° to +150° F temperature range with plastic sleeve
- POLY-CONNECT fittings do not cause twisting or weakening of the tube, and can stand maximum movement of the tubes
- All fittings come pre-assembled with a fixed insert in the body of the fitting which saves from 36% to 93% of the installation time

To Assemble:

- 1 Cut tube squarely and insert tubing into fitting until it bottoms.
- 2 Then tighten only the nut with the hands, no tools required.
- 3 Can be assembled and disassembled repeatedly.

Quik-Disconnect®

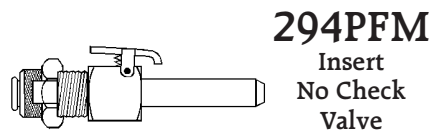

- Use with polyethylene, polypropylene, nylon & polyvinyl chloride tubing
- Quik-Disconnect® couplings with Poly-Connect® ends provide positive flow shut-off when coupling is disconnected, without extra valving. Available in both single and double end shut-off
- For instrumentation and other applications where repeated connections and disconnections are needed
- With a soft pressure of the thumb, the eyelet is disconnected from the body of the fitting, closing the flow automatically at one or both ends

To Connect/Disconnect:

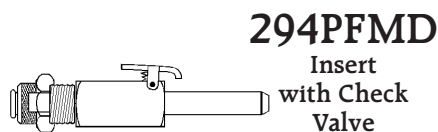

Push - it's connected. Unique cam action automatically moves the locking clip and locks the coupling in an open flow position when the two sections are pushed together. Flow is in either direction. To uncouple, press the locking clip and pull apart. This action disconnects the coupling and instantly seals off the flow.

Quik-Push® Brass Push-In Tube Fittings

- High quality all brass three piece construction with o'ring seal
- Use with plastic, nylon and soft metal tubing
- -40° to +200° F temperature range
- Pre-applied Teflon® based pipe sealant on all conical male pipe threads, saves assembly time, as well as installation labor
- An interior hex combined with a 20% reduction in size over the original push-in design helps assembly in limited space applications
- A new double bite collet for greater holding power
- A 37% increase in pullout performance over the original design

Quick Connect:

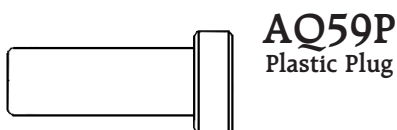

- 1 Cut tube end square.
- 2 Introduce tube into fitting until it bottoms against the internal tube stop, no tools required.
- 3 Saves up to 75% of assembly time of standard air compression fittings.

Quick Disconnect:

- 1 Press ring toward connection and pull tube with the other hand, no tools required.
- 2 In order to reuse tube, cut its previously gripped end and redo connection.

Brass Fittings for Nylon Air Brake Systems

- Three piece construction – nut, sleeve and body with attached insert
- Meets S.A.E. and D.O.T. specifications for nylon air brake systems
- -40° to +200° F. temperature range
- No special tools; flaring not necessary
- Excellent vibration resistance
- Used primarily in air brake and air accessory applications

Tube O.D.	1/4	3/8	1/2	5/8	3/4
Thread Size	7/16-24	17/32-24	11/16-20	13/16-18	1-18

To Assemble:

- 1 Cut smooth, square end on tubing
- 2 Slide nut, then sleeve, onto tube; threads must face end
- 3 Insert tube into fitting
- 4 Thread nut onto fitting until snug, then as follows:
 - for 1/4" 3 more turns
 - for 3/8" and 1/2" 4 more turns
 - for 5/8" and 3/4" 3-1/2 more turns

Quik-Dot® Brass Push-In Tube Fittings

- High quality all brass three piece construction with eyelet and o'ring seal
- Meets D.O.T. FMVSS71.106 and SAE J1131 standards for air brake system requirements
- -40° to +200° F temperature range
- Use with nylon tubing that complies with SAE J 844
- Pre-applied Teflon® based pipe sealant on all conical male pipe threads, saves assembly time, as well as installation labor
- A 20% reduction in size over the original push-in design helps assembly in limited space applications and reduces weight
- A new patented double bite collet for greater holding power provides a 37% increase in pullout performance over the original design
- Unique patented swivel design on elbows and tees provide full flow capabilities
- Captive eyelet with extended length is for easy assembly and allows for full flow. Top end radius eliminates scoring of tubing I.D.

Quick Connect:

- 1 Cut tube end square.
- 2 Introduce tube into fitting until it bottoms against the internal tube stop, no tools required.
- 3 Saves up to 75% of assembly time of standard air compression fittings.

Quick Disconnect:

- 1 Press ring toward connection and pull tube with the other hand, no tools required.
- 2 In order to reuse tube, cut its previously gripped end and redo connection.

Brass Fittings for Copper Air Brake Systems

- Three piece construction – nut, sleeve (or ferrule), and body
- -65° to +250° F. temperature range
- No special tools, flaring not necessary
- Fair vibration resistance
- Used primarily in air brake and air accessory applications

Tube O.D.	1/4	3/8	1/2	5/8	3/4
Thread Size	7/16-24	17/32-24	11/16-20	13/16-18	1-18

To Assemble:

- 1 Cut smooth, square end on tubing
- 2 Slide nut, then sleeve, onto tube; threads must face end
- 3 Insert tube into fitting
- 4 Thread nut onto fitting until snug, then as follows:
for 1/4", 3/8" and 1/2"
2 more turns
for 5/8" and 3/4"
3 more turns

- Polyethylene, Aluminum and Copper Tubing

Brass Pipe Fittings

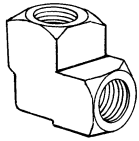

- One piece construction, available in barstock or forgings
- Used with brass or steel pipe
- All pipe threads are "American Standard Taper Pipe Threads"
- Fair vibration resistance
- Used in low to medium pressure applications
- Teflon tape or pipe sealant is recommended
- Pipe threads should be tightened 2 1/2 turns past finger tight

Brass Hose Barbs

- One piece, except swivels (nut and stem)
- Use with plastic tubing or rubber hose
- +32° to 200° F. temperature range
- Intended for use with hose clamp or crimp type ferrule
- Barbed edges provide positive connection
- Excellent vibration resistance
- Barb size is hose I.D.

Brass Push-On Hose Barbs

- One piece construction
- Use with push-on type hose
- No hose clamp or ferrule needed
- Excellent vibration resistance
- Barb size is hose I.D.

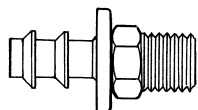

To Assemble:

- 1 Cut smooth, square end on hose
- 2 Insert fitting until all barbs are covered
- 3 Place end of fitting against a flat object, grip hose one inch from end
- 4 Push until cap covers end of hose
