Cam and Groove Fittings

Dixon, Boss-Lock, EZ Boss-Lock, swaged-on and phonograph finish, polypropylene, reducing couplers, adapters, gaskets, replacement handles, accessories, Strap-Grip

A p.16

Dry Disconnects Fittings

Dry disconnect fittings, dry gas, dry aviation, dry break, Flomax connectors, safety break away fittings

B p.68

Swivel Joints

Single, double and triple plane V-ring type and O-ring type swivels

C p.85

Boss Fittings

Boss and EZ-Boss ground joint and washer type couplings, male and LP stems, Boss clamps, air hammer fittings, Boss Holedall fittings, steam quick disconnects, hammer unions, Dixon mining fittings

D p.90

Air Fittings

Manifolds, Air King universal couplings, King cable, Dix-Lock, Dual-Lock, Air Chief quick connects, air valves, blow guns, tube fittings and valves, FRL's, thermometers, gauges, hose racks & reels, safety check valves

E p.100

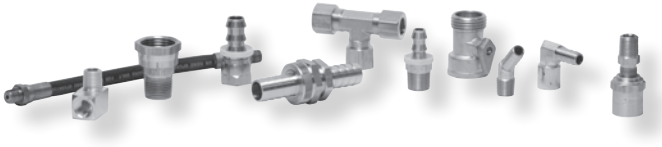

Shank / Water Fittings

Menders, nipples, suction couplings, foot valves, strainers, skimmers, long and short shank fittings, spray hose couplings, quick connects, inserts

F p.260

Brass Fittings

Hose stations, nozzles, garden hose fittings, garden hose, shank fittings, ferrules, crimping tools, pressure gun and accessories, grease whip assemblies, push-on fittings, short shank fittings

G p.292

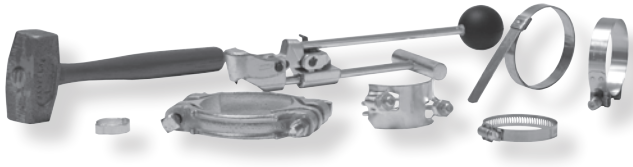

Plastic Fittings

Quick disconnect fittings, PVC tubing, tubing cutters, Tuff-Lite nylon and polypropylene hose fittings, acetal fittings, push-in fittings

H p.331

Clamps

Pinch-on, worm gear, band clamps, Strap-Grip, single and double bolt clamps, spiral clamps, T-bolt clamps, clamp kits, tools and accessories, spring hose clamps, thumb screw clamps, constant torque clamps

I p.342

Hydraulic Fittings

Straight through's, Flo-Mate, flow control valves, high pressure ball valves, needle valves, hydraulic quick connects, return line fittings, plugs and caps, swivel adapters, hydraulic couplings, flat face fittings

J p.358

Holedall Fittings

Rams, Holedall externally swaged fittings, flanged assemblies, notched fittings, Holedall internally expanded fittings, sanitary fittings, Holedall petroleum fittings, petroleum coupling expanders, API certified fittings

K p.391

Sanitary Fittings (Bradford)

Clamp fittings, 3A gaskets, weld fittings, bevel seat fittings, John Perry, Q-Line, and I-line fittings, buttweld fittings, tube O.D. fittings & hangers, ball valves, butterfly valves, check valves

L p.408

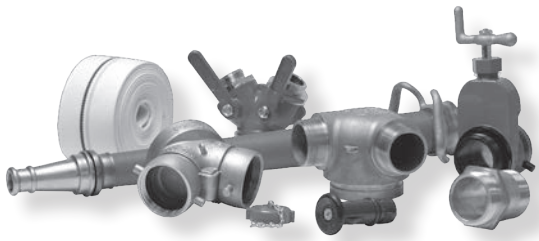

BPE Fittings (Bradford)

High purity biopharm clamp and weld elbows, weld and reducing tees, clamp and weld eccentric and concentric reducers, end caps, weld caps and auto weld ferrules

M p.471

Fire Equipment (Powhatan)

Flat Seal couplings, fire hose, reels, clappers, expansion ring couplings, wrenches, adapters, swivels, nipples, valves, thermoplastic, brass and aluminum nozzles, dry hydrants, Storz fittings, expanders

N p.477

Valves

Ball valves, locking ball valves, steam valves, mini valves, pneumatically actuated valves, non-metallic ball valves, strainers, gate valves, butterfly valves, air valves, globe valves, faucets

O p.534

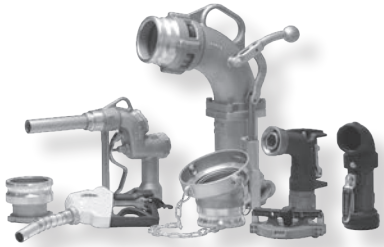

Pipe and Welding Fittings

Weld end fittings, welding nipples, flanges, turned back fittings, NPT threaded fittings, nipples, sight flow indicators, grooved pipe fittings, Straub couplings

P p.568

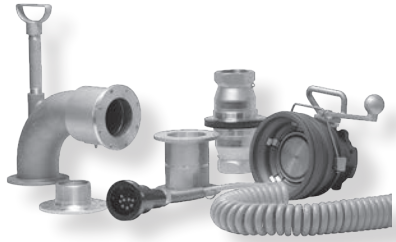

Tank Truck Fittings (Bayco)

Tight and loose fill couplers and adapters, shank couplings, pipe caps, sight flow indicators, reducers and adapters for tank trucks, Bayco hose swivels, Bayco hose nozzles, rack cords, dry disconnects, nozzles

Q p.598

Rack Equipment

Swivels, safety break-away couplings, TTMA flange adapters, API coupler, API rack cords, flanged sight flow indicators, TTMA flange extensions, Type 35 loading arm swivel

R p.616

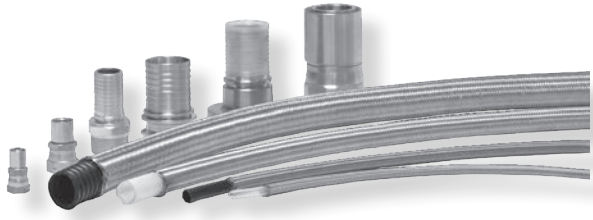

Maintenance and Repair

Thread tape, test pumps, coupling inserter, hose mallet, hose knife, hose jackets and guards, hose tags, tape, fiberglass sleeves

S p.626

PTFE Hose and Fittings

Nominal fittings, true ID fittings, smooth bore PTFE conductive and non-conductive hose, open pitch convoluted hose, heavy wall true ID smooth bore hose

T p.634

Limits of Liability

This catalog is intended as a product offering. It is not intended to be a user or technical manual. Information in this catalog is subject to change without notice. All users and distributors of products sold through this catalog should contact Dixon with questions of use, compatibilities, coupling procedures and life of product. Dixon's full-time engineering and test staff is always available to recommend uses and to assist distributors and users with any questions.

Safety

NOTE: Because of the health hazards associated with contamination and lead content in drinking water systems, Dixon couplings, unless otherwise specifically approved, are not recommended for potable water service and should not be used in applications where drinking water will contact the wetted surfaces of the coupling.

This safety alert logo, which appears throughout our catalog, is used as a reminder that the user should carefully review for safety the appropriateness of the product for the media, application and environment in which it will be used.

SAFETY ALERT

Hose and Hose Coupling Safety

"The very properties that make compressed gases useful in almost every area of modern life can also make them dangerous when mishandled. Years of experience with compressed gases have led to practices and equipment which, if employed, result in complete safety." [1]

Dixon hose couplings have been carefully engineered to meet specific requirements. If hose or couplings are not used in correct applications or are incorrectly applied, accidents and downtime can result. It is up to the end user to inform the distributor of the application and pressures involved when ordering hose assemblies and it is up to the distributor to supply the right hose and coupling for that application. When in doubt, Dixon is here to help you with a proper coupling recommendation.

1. Air hose couplings - This form of energy can be one of the most dangerous because it is used in so many applications and, when mishandled, can have more serious results than fluids. Air, as a gas, is compressible (fluids press only against hose or vessel walls and lose little volume under pressure). When pressurized air releases suddenly, it does so with explosive force and can cause rapid hose whip, which can do serious physical harm to personnel or damage to nearby objects. This is why the selection of proper hose and couplings for air lines is so important, along with their proper installation and maintenance. Never take for granted that a coupling is installed properly or a clamp fully tightened on an air hose - check it regularly and use safety devices (see paragraph 4).

2. Steam and gas - The same rules apply for steam and gas, but, because these are inherently more hazardous materials, personnel tend to treat hose and couplings on these lines with more respect and care. Checking clamp tightness is very important with steam hose, where it is not unusual for clamps to loosen in service, in which case they must be retightened! Safety devices should also be used (see paragraph 4).

3. Fluid hose couplings - Again, nothing should be taken for granted - in particular, check clamps for tightness each time the lines are used - especially when petroleum products or other hazardous liquids are involved. Large diameter hose, when suspended, can also be quite dangerous if it drops unexpectedly due to a coupling "pull-out" or sudden disconnection. A heavy fitting or clamp, plus the weight of the hose itself falling from any significant height, can cause injuries or damage. Be sure to use safety devices (see paragraph 4).

4. All hose assemblies - All hose assemblies should be treated with respect as potential hazards. Worn-out fittings should be replaced. Retaining devices such as clips, cables or chains should be used. Clamps should be checked regularly. Under no circumstances should any coupling be disconnected while under pressure, unless the coupling is specifically designed to do so. Disconnecting couplings under pressure could result in serious injury or death, and destruction of property and equipment.

[1] "Handbook of Compressed Gases"

General Safety Information

Pressure Ratings

Pressure ratings for couplings, as stated in this catalog, are based upon ambient temperature (**70°F**) applications with true hose I.D., new Dixon supplied couplings, new Dixon supplied clamps, new quality hose, and proper installation by a qualified assembler using Dixon procedures and equipment. In addition, temperature can affect coupling retention. For temperatures other than ambient (**70°F**), contact the hose manufacturer or call Dixon at 800-355-1991.

Product Selection

Many of the products in this catalog are used in hose assemblies in a variety of applications. The safety of any hose assembly rests on the proper selection, installation, testing and use of each product. The safe use of any product in this catalog is dependent upon the correct selection of the hose, fittings and method of attachment. To ensure such a proper selection, the user must inform the distributor of the application and pressure involved when ordering hose assemblies. The use of S.T.A.M.P.E.D. (Size, Temperature, Application, Media, Pressure, Ends, Dixon) will help in the proper selection of hose assembly components (see page 4). The selection of couplings and clamping devices is the responsibility of the purchaser or user, based upon the hose manufacturer's recommendations. If the purchaser or user is uncertain about the use or application of a product, Dixon stands ready to provide information, including test results (if available), coupling and clamping recommendations and other data to help resolve those matters.

Installation

To achieve a safe and reliable assembly, proper installation procedures must be followed. Each component of the assembly has a part in determining these procedures. The purchaser or user must follow proper procedures. If the purchaser or user has any questions regarding installation, please contact Dixon.

Testing

Dixon recommends that all hose assemblies be tested in accordance with the hose manufacturer's recommendations.

Re-testing and inspection

Dixon recommends inspection and re-testing of hose assemblies on a regular and consistent basis in accordance with the hose manufacturer's recommendations. The application determines the regularity of the inspection and re-testing schedule. Any worn-out fittings, damaged hoses or missing safety devices should be replaced immediately. Bolt-style clamps must be checked and retightened on a regular and consistent basis.

All hose assemblies should be viewed as potential hazards. This document is designed to inform and educate anyone who manufactures, specifies, supplies, purchases, assembles, uses, maintains or tests any hose assembly or its component parts. The proper selection and maintenance of hose, couplings, attachment devices and accessories is imperative.

It is the end user's responsibility to identify to the distributor the application and any special conditions that the hose assembly must meet. It is the distributor's responsibility to supply the proper assembly for the intended application. Accidents and down time may occur if hose assemblies are not properly selected for the specific application.

The performance and safety of the assembly is affected by the quality of the individual components. The use of the acronym S.T.A.M.P.E.D. (Size, Temperature, Application, Media, Pressure, Ends, Dixon) will help in the proper selection of the hose assembly components (see page 4).

Warning!

Failure to use these procedures can result in serious injury or death, and destruction of property and equipment.

If anyone is uncertain about the use or application of a product, Dixon can provide test results, coupling and clamping recommendations and other data to help resolve those matters. Call 800-355-1991 with any questions.

S.T.A.M.P.E.D.

When fabricating and specifying hose assemblies ask the following questions:

S*ize*: What is the ID (Inside Diameter) of the hose? What is the OD (Outside Diameter) of both ends of the hose? What is the overall length of the assembly required?

T*emperature*: What is the temperature range of the media (product) that is flowing through the hose assembly? What is the temperature range of the environment that surrounds the outside of the hose assembly?

A*pplication*: How is the hose assembly actually being used? Is it a pressure application? Is it a vacuum (suction) application? Is it a gravity flow application? Are there any special requirements that the hose assembly is expected to perform? Is the hose being used in a horizontal or vertical position? Are there any pulsations or vibrations acting on the hose assembly?

M*edia*: What is the media/material that is flowing through the hose assembly? Being specific is critical. Check for: Abrasive materials, chemical compatibility, etc.

P*ressure*: What is the maximum pressure including surges (or, maximum vacuum) that this hose assembly will be subjected to? Always rate the maximum working pressure of your hose assembly by the lowest rated component in the system.

E*nds*: What couplings have been requested by the user? Are they the proper fittings for the application and hose selected?

D*ixon*: Dixon recommends that, based on the hose, fittings and attachment method used, all assemblies be permanently marked with the designed working pressure and intended media. Do not use other manufacturer's fittings or ferrules with Dixon products due to the differences in dimensions and tolerances. We also recommend that all hose assemblies be tested frequently.
Be Safe: Any questions on application, use or assembly call 800-355-1991.

MSHA (Mine Safety and Health Administration) Regulations

30 CFR Sections 56.13021 and 57.13021
Except where automatic shut-off valves are used, safety chains or other suitable locking devices shall be used at connections to machines of high-pressure hose line of ¾" inside diameter or larger, and between high-pressure hose lines of ¾" inside diameter of larger, where a connection failure would create a hazard.

30 CFR Section 75.1730
(e) Safety chains, suitable locking devices, or automatic cut-off valves shall be used at connections to machines of high-pressure hose lines of ¾" inside diameter or larger, and between high-pressure hose lines of ¾" inside diameter or larger, where a connection failure would create a hazard. For purposes of this paragraph, high-pressure means pressure of 100 PSI or more.

30 CFR Section 77.412
(d) Safety chains or suitable locking devices shall be used at connections to machines of high-pressure hose line of 1" inside diameter or larger, and between high-pressure hose line of 1" inside diameter or larger, where a connection failure would create a hazard.

OSHA Regulations

Standards - 29 CFR, 1910.242 (partial):
(b) Compressed air used for cleaning - Compressed air shall not be used for cleaning purposes except where reduced to less than 30 PSI and then only with effective chip guarding and personal protective equipment.

Standards - 29 CFR, 1915.131 (partial):
(e) Before use, pneumatic tools shall be secured to the extension hose or whip by some positive means to prevent the tool from becoming accidentally disconnected from the whip.

Standards - 29 CFR, 1926.302 (partial):
(b)(1) Pneumatic power tools shall be secured to the hose or whip by some positive means to prevent the tool from becoming accidentally disconnected.
(b)(2) Safety clips or retainers shall be securely installed and maintained on pneumatic impact (percussion) tools to prevent attachments from being accidentally expelled.
(b)(3) All pneumatically driven nailers, staplers and other similar equipment provided with automatic fastener feed, which operate at more than 100 PSI pressure at the tool shall have a safety device on the muzzle to prevent the tool from ejecting fasteners, unless the muzzle is in contact with the work surface.
(b)(4) Compressed air shall not be used for cleaning purposes except where reduced to 30 PSI and then only with effective chip guarding and personal protective equipment which meets the requirements of Subpart E of this part. The 30 PSI requirement does not apply for concrete form, mill scale and similar cleaning purposes.
(b)(5) The manufacturer's safe operating pressure for hoses, pipes, valves, filters and other fittings shall not be exceeded.
(b)(6) The use of hoses for hoisting or lowering tools shall not be permitted.
(b)(7) All hoses exceeding ½" inside diameter shall have a safety device at the source of supply or branch line to reduce pressure in case of hose failure.

Standards - 29 CFR, 1926.306:
(a) "General requirements"
(a)(1) "Application." This section applies to compressed air receivers, and other equipment used in providing and utilizing compressed air for performing operations such as cleaning, drilling, hoisting, and chipping. On the other hand, however, this section does not deal with the special problems created by using compressed air to convey materials nor the problems created when men work in compressed air as in tunnels and caissons. This section is not intended to apply to compressed air machinery and equipment used on transportation vehicles such as steam railroad cars, electric railway cars, and automotive equipment.
(a)(2) "New and existing equipment."
(a)(2)(i) All new air receivers installed after the effective date of these regulations shall be constructed in accordance with the 1968 edition of the A.S.M.E. Boiler and Pressure Vessel Code Section VIII.
(a)(2)(ii) All safety valves used shall be constructed, installed and maintained in accordance with the A.S.M.E. Boiler and Pressure Vessel Code, Section VIII Edition 1968.
(b) "Installation and equipment requirements"
(b)(1) "Installation." Air receivers shall be so installed that all drains, handholes, and manholes therein are easily accessible. Under no circumstances shall an air receiver be buried underground or located in an inaccessible place.
(b)(2) "Drains and traps." A drain pipe and valve shall be installed at the lowest point of every air receiver to provide for the removal of accumulated oil and water. Adequate automatic traps may be installed in addition to drain valves. The drain valve on the air receiver shall be opened and the receiver completely drained frequently and at such intervals as to prevent the accumulation of excessive amounts of liquid in the receiver.
(b)(3) "Gages and valves."
(b)(3)(i) Every air receiver shall be equipped with an indicating pressure gauge (so located as to be readily visible) and with one or more spring-loaded safety valves. The total relieving capacity of such safety valves shall be such as to prevent pressure in the receiver from exceeding the maximum allowable working pressure of the receiver by more than 10 percent.
(b)(3)(ii) No valve of any type shall be placed between the air receiver and its safety valve or valves.

Standards - 29 CFR, 1926.603 (partial):
(a)(9) Steam hose leading to a steam hammer or jet pipe shall be securely attached to the hammer with an adequate length of at least ¼" diameter chain or cable to prevent whipping in the event the joint at the hammer is broken. Air hammer hoses shall be provided with the same protection as required for steam lines.
(a)(10) Safety chains, or equivalent means, shall be provided for each hose connection to prevent the line from thrashing around in case the coupling becomes disconnected.

The regulations may be viewed in full on the OSHA website, www.osha.gov. Please check the website for updates.

The Canada Occupational Safety and Health regulations, Part XIII, 13:6b states:
"Where an air hose is connected to a portable air powered tool used by an employee, a restraining device shall be attached to all hose connections, in order to prevent injury to an employee in the event of an accidental disconnection of a hose."

Hose Coupling Workshops

In an effort to provide our customers with information regarding the proper and safe methods of assembling hose and couplings, Dixon offers Hose Coupling Workshops suitable for a company's sales force and shop personnel.

Classes consist of lectures and/or "hands-on" demonstrations of coupling selection, hose preparation, coupling installation, assembly testing and maintenance procedures. Morning, afternoon and all day classes are available. For more information, please contact the factory at 800-355-1991.

We encourage you to share this information with anyone who may be affected by the selection, installation, maintenance or use of any hose assembly. Always use quality products to **Be Safe**.

Be Safe

Hose assemblies must be inspected prior to each use. Worn out fittings, attachment devices, hose and accessory items must be replaced. Retaining devices (safety devices) such as clips, cables or chains must be used. Clamps must be checked regularly to the specified torque found in the Dixon literature. Under no circumstance should any coupling be disconnected while under pressure unless the coupling is specifically designed to do so. Disconnecting couplings under pressure could result in serious injury or death, and destruction to property and equipment.

For all hose assemblies in use:

B*eware* - Hose assemblies when used improperly or in the wrong application can be dangerous. The maximum working pressure shown on the hose is not an indication of the working pressure of the assembly. Based on the hose, fittings and attachment method used, all assemblies should be permanently marked with the designed working pressure and the intended media. The assembly working pressure should be permanently displayed. Hose assemblies must be used for the intended service only. Never alter manufactured product or substitute component parts.

E*liminate* - hazardous conditions by inspecting, maintaining and testing hose assemblies. Dixon recommends that all hose assemblies be tested in accordance with the hose manufacturer's specifications. The application determines the regularity of the re-testing schedule.

S*ecure* - and inspect hose, fittings, clamping devices and safety accessories before each use. Never take for granted that the coupling or attachment devices are properly installed.

A*lways* - inspect and re-tighten the bolts of any bolt style clamping device to the manufacturer's torque specifications.

F*ittings* - hose and clamping devices that are worn out or damaged must be removed from service.

E*ducate* - your employees about the proper use, care and potential hazards of hose assemblies. Take advantage of Dixon's free Hose Assembly Safety Program and the follow up Training Seminar to aid you in setting up your own inspection program. Any questions on applications, use or assembly call 1-800-355-1991.

SAFETY ALERT

The Importance of Whip Hose

SAFETY ALERT

The constant vibration created by air tools, like air drills and pavement breakers, is destructive to air hose couplings, especially the quick-acting type. To provide protection against coupling breakage and related hazards, Dixon recommends the use of a whip hose. To construct a whip hose, connect one end of a short (3' to 10') air hose to the air tool using a 3500 type steel nipple. Connect the other end of the hose to the air supply using the standard quick-acting coupling. The heat-treated 3500 nipple will withstand vibration far better than the standard coupling and provide a safer connection. The whip hose should remain permanently connected to the tool.

Hose Assembly Safety Program

Dixon, in partnership with your industrial hose supplier, is pleased to offer a hose and coupling safety survey of your plant, at no cost to you, to assist in your efforts to make your facility as safe, efficient and productive as possible.

Today, plant safety is an enormous, ongoing endeavor in which it is impossible to be an expert in every field.

The use of damaged or misapplied hose couplings and related items occurs. To the untrained eye, these hazards may continue to exist until an accident happens, threatening not only plant machinery, but also the well-being of plant personnel.

Our program includes a visual inspection of hose assemblies and related accessories in your plant by trained technicians. A professionally written report containing our observations and recommendations for corrective action is subsequently provided to augment your own ongoing safety program. If desired, photographs of the areas of concern can be supplied with the report. As a follow-up, the program offers an educational hands-on seminar directly relating to the safety concerns in your facility.

Plant safety is coming under increasing scrutiny by various regulatory agencies. Let Dixon's trained personnel assist you in establishing and maintaining safety compliance in your plant.

The safety survey report is completely confidential and will only be shown to authorized plant personnel. Again, there is no cost to you for this service. For more information, please contact the factory at 1-800-355-1991.

Safety Products and Recommendations in the Dixon Price List

Safety is everyone's concern!

Dixon provides many safety products designed to protect personnel and property. Recommendations and safety warnings are also included for your review.

Pressure Recommendations

1. The chart on pages 10-13 is intended as a guide only. It only applies to metal couplings as shown for ambient temperature (**70°F**) applications with true ID hose. It assumes new Dixon supplied couplings, new Dixon supplied clamps, new quality hose and proper installation by a qualified assembler using Dixon procedures and equipment. Temperature can affect the coupling retention. For questions relating to temperatures other than ambient (**70°F**) contact the hose manufacturer or Dixon at 1-800-355-1991.
2. This chart does not apply to non-Dixon products, with used hose, in non-approved or unsupported applications or in non-standard assemblies.
3. Do not use this chart if it conflicts with the hose manufacturer's recommendations.
4. All hose assemblies should be pressure tested to hose manufacturers or Rubber Manufacturers Association (R.M.A.) specifications prior to being put into service.
5. Our test experience indicates that coupling retention can vary with changes in hose design. For pressure ratings other than those listed and shown, or if questions arise, please call Dixon Valve & Coupling Company at 1-800-355-1991 for assistance.
6. All hose assembly components must be compatible with the materials and environments with which they are to come in contact.
7. Dixon recommends that all hose assemblies be marked with the assembly working pressure and media of the intended application. Under no circumstances should the assembly working pressure exceed the working pressure of the lowest rated component (coupling, clamp, ferrule or hose).
8. For further safety information refer to pages 2-7.

4. All hose assemblies should be pressure tested to hose manufacturers or Rubber Manufacturers Association (R.M.A.) specifications prior to being put into service.
5. Our test experience indicates that coupling retention can vary with changes in hose design. For pressure ratings other than those listed and shown, or if questions arise, please call Dixon Valve & Coupling Company at 1-800-355-1991 for assistance.
6. All hose assembly components must be compatible with the materials and environments with which they are to come in contact.
7. Dixon recommends that all hose assemblies be marked with the assembly working pressure and media of the intended application. Under no circumstances should the assembly working pressure exceed the working pressure of the lowest rated component (coupling, clamp, ferrule or hose).
8. For further safety information refer to pages 2-7.

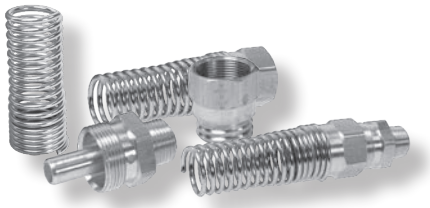

* *Procedures can be found at www.dixonvalve.com or by calling 1-800-355-1991.*

Dixon

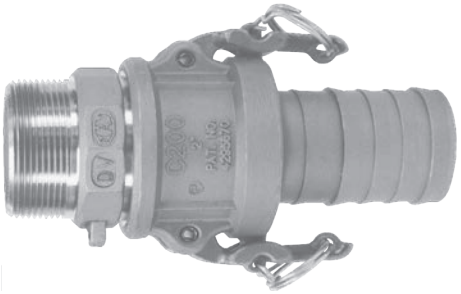

1. Precision machined to rigid tolerances.
2. Durable stainless steel cam arm pins will not rust or bind, for greater strength and safety.
3. Recess holds gasket firmly in place - ensures proper placement.
4. Long shank design allows proper banding, thus eliminating the major cause of hose damage.

Operation of Cam and Groove

1. To make connection, simply slide the adapter into the coupler and with normal hand pressure, press the cam levers down.
2. Uncoupling is as quick and simple as coupling. Just lift the cam arms and remove the adapter.

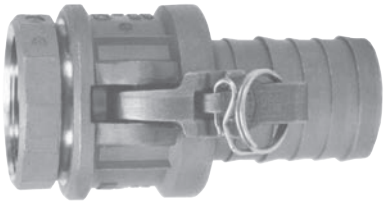

Boss-Lock

Boss-Lock cam and groove provides a *unique patented safety feature*. The cast-in lugs allow safety clips to be attached once the lugs are passed through slots in the special cam lever arms. These clips prevent the coupler from being unlocked until they are removed, providing a *positive locking action*.

Pull Ring Safety Clips

Dixon has developed the pull ring safety clip to simplify the locking action on Boss-Lock couplers. No more inserting clips or dangling lanyards, just a twist and it's locked, giving you a low profile *positive locking action*.

Buy with Confidence
Boss-Lock investment stainless steel cam arms are *guaranteed* ! Should you *ever* break a Boss-Lock investment stainless steel cam arm, simply return it to the nearest warehouse for a *free* replacement.

Ordering System

Size represents the coupler or adapter and hose or pipe end. (i.e. 200 = 2") If the coupling is a reducing size, the coupler or adapter is the first size. (i.e. 4030-C is 4" coupler to 3" hose shank).

Specifications on Dixon Cam and Groove

Specifications:

- Dixon, Boss-Lock and EZ Boss-Lock cam and groove couplers and adapters are produced to interchange with all product produced to Commercial Item Description A-A-59326B.
- No standard exists for the ½" and 8" fittings, and generally these sizes do not interchange with other manufacturers.
- Dust caps and dust plugs are ***not*** to be used in pressure applications for safety and environmental reasons.
- *Designed for use with liquids*, consult Dixon for specific recommendations.

Pressure Ratings:

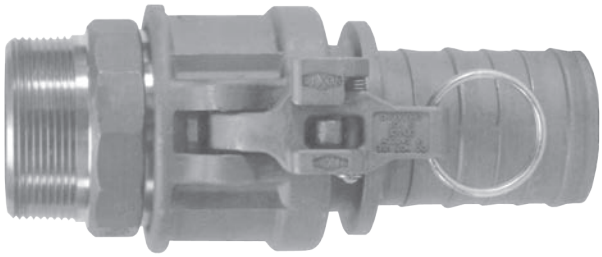

Recommendations based on the use of mating Dixon fittings at ambient temperature (**70°F**) with standard Buna-N Seal installed. For use at elevated temperature or other unusual operating conditions, consult the factory. Dixon, Boss-Lock and EZ Boss-Lock couplers and adapters maximum working pressure are as follows:

SAFETY ALERT

Size	½"	¾" thru 2"	2½"	3"	4"	5" and 6"	8"
PSI	**150**	**250**	**150**	**125**	**100**	**75**	**50**

EZ Boss-Lock

No more fumbling with clamps, wire, clips or pins.
Just close the handles and the locking
mechanism is engaged.

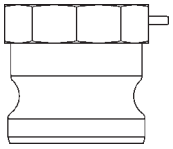

Unlike other safety couplings . . .

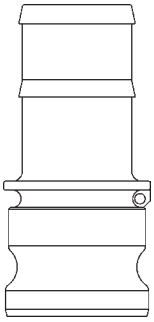

- *The EZ Boss-Lock is extremely easy to open!!!*
  The release lever is under your thumb when you want to open the fitting. Ergonomic.
- *The EZ Boss-Lock is resistant to accidental disconnection when being dragged.* The release lever opens in the direction opposite to the cam arm, so movements that tend to open the release lever also tend to close the cam arm!!!
- *The EZ Boss-Lock alerts you if it is not properly engaged.*
  If the rotating lever is not flush with the handle, it is not properly engaged.
- *The EZ Boss-Lock has no sliding pins to jam.*
  The EZ Boss-Lock's rotating action helps keep the locking device free of debris.
- *The EZ Boss-Lock has no sliding pins to pop open.*
  The EZ Boss-Lock is designed to protect critical parts from impact and to withstand rugged use.
- *The EZ Boss-Lock can be supplied with special shanks custom suited to your needs.* The EZ Boss-Lock is available with swaged and PF shank designs for hard to couple chemical hoses.
- *The EZ Boss-Lock cam arm assemblies are made of investment cast stainless steel with plated carbon steel pull rings.*
- *The EZ Boss-Lock is easier to insert into the hose tubes on tank trucks, and easier to use in restricted spaces.*
  This is due to the smaller maximum OD and a more snag free exterior.
- *The EZ Boss-Lock cam arm assemblies can be retrofitted onto undamaged stainless steel Boss-Lock.* This allows you to protect your investment in stainless steel Boss-Lock couplings while you upgrade.
- *The EZ Boss-Lock is made in the USA.*

Polypropylene Adapters

SAFETY ALERT

NOT recommended for use with PTFE gaskets

- Recommended for a maximum working pressure of **125 PSI** (½" - 1"), **100 PSI** (1¼" - 2") and **75 PSI** (3" - 4"); recommendations based on the use of mating Dixon fittings at an ambient temperature of **70°F** with standard seal installed.
- ½" couplers and adapters will interchange with ¾" couplers and adapters. Only the threads and barbs are ½". 1¼" couplers and adapters will interchange with 1½" couplers and adapters. Only the threads and barbs are 1¼".
- Polypropylene cam and groove should not be mixed with metal fittings. SAFETY ALERT
- Adapters are manufactured from a glass-filled polypropylene.

[1] *Dust caps and dust plugs are not to be used in pressure applications for safety and environmental reasons*. SAFETY ALERT

Swaged Cam and Groove

- Developed specifically for chemical transport hoses having Crosslinked Polyethylene (XLPE) or Ultra High Molecular Weight Polyethylene (UHMW) tubes. Swaged Boss-Lock provides you with a permanently attached cam and groove fitting when superior coupling retention is required.
- In testing tank transport hoses from a wide variety of manufacturers, the swaged Boss-Lock fitting proved itself to be the clear winner in overall performance.
- Fittings are also available on special order for other sizes or hose OD's. Consult the factory for pricing and availability.
- Consult the factory for pricing and availability of the *special equipment required for installation* or refer to page 391.

Dixon stems and ferrules are specifically designed to be used together as a coupling system.
Due to differences in dimensions and tolerances for safety reasons,
do not use other manufacturer's stems or ferrules with Dixon Holedall products.

SAFETY ALERT

Notched Cam and Groove

- The largest advantage of the notched EZ Boss-Lock design is that the coupling can be removed from a damaged hose by cutting away the ferrule, without necessarily damaging the fitting. *After inspection of the fitting to determine its suitability for reuse*, it can be reinstalled into another hose by using a *new ferrule*. SAFETY ALERT
- The notched EZ Boss-Lock system allows you to better manage your inventories. You can stock one coupling and two ferrules, and cover the same hose range with less inventory. *You must purchase a fitting and the matching ferrule to create an assembly*. SAFETY ALERT
- for use with notched ferrules on previous page

Dixon Cam and Groove with Notched NOS Shank

- The largest advantage of the notched design is that the coupling can be removed from a damaged hose by cutting away the ferrule, without necessarily damaging the fitting. *After inspection of the fitting to determine its suitability for reuse,* it can be reinstalled into another hose by using a *new ferrule*. SAFETY ALERT
- The notched system allows you to better manage your inventories. You can stock one stem and two ferrules, and cover the same hose range with less inventory. *You must purchase a fitting and the matching ferrule to create an assembly.* SAFETY ALERT
- For hose outside diameters of 2-4/64" and below, *the couplings are crimp only*. SAFETY ALERT
- For hose outside diameters of 2-5/64" and above, the couplings can be crimped or swaged.

- See pages 262 and 396 for male NPT notched NOS fittings.
- for use with notched ferrules at bottom of the page

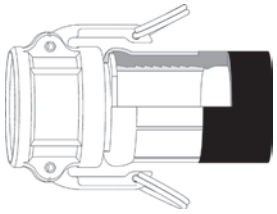

Only use the NOS shank with the NOS ferrules.
Due to differences in dimensions and tolerances for safety reasons, do not use other manufacturer's stems or ferrules with Dixon products. SAFETY ALERT

* consult factory for pressure rating

[1] based on using crimp cam and groove nipples

Crimp Style Ferrules

Only use the crimp style shanks with the crimp style sleeves and ferrules. Due to differences in dimensions and tolerances for safety reasons, do not interchange other manufacturer's products with Dixon products.

* consult factory for pressure rating

[1] based on using crimp cam and groove nipples

Boss-Lock PF Cam and Groove

- The shank design on these fittings was developed specifically for chemical transport hoses having Crosslinked Polyethylene (XLPE) or Ultra High Molecular Weight Polyethylene (UHMW) tubes, where shank retention can be a problem when using conventional band clamps. In testing tank transport hoses from a wide variety of manufacturers, the Boss-Lock-PF fitting showed significant improvement in hose coupling retention over the conventional cam and groove shank design.
- Other sizes are available on special order. Consult the factory for pricing and availability.
- For best results we recommend the use of ¾" wide band clamps found on pages 349 and 350.

TTMA Series Flange Adapters

- provides a simple and easy way to quickly convert threaded components to a standard TTMA flange configuration
- more durable than welded fabrications due to the solid cast lightweight aluminum design
- design improves flow through adapter even on the 3" reducer
- compact size reduces the overall space needed to install
- for flange drilling standards, see page 661

Strap-Grip Saddles and Fittings

- Strap-Grip is designed to provide greater resistance to end pull than conventional band clamps alone.
- Only the fittings shown below are designed for use with Strap-Grip Saddles.
- Saddles are sold in pairs and designed for use with 3/4" or 5/8" wide bands.
- Bands must be purchased separately.
- Band clamps should first be applied to the OD to seal the hose. Then Strap-Grip saddles should be banded over the initial clamp to anchor the fitting in the hose.

SAFETY ALERT *Under no circumstances should the EZ Boss-Lock cam arms be used on any fitting not specifically produced for their use.* The aluminum, brass and iron are made from sand castings. To ensure proper functioning of the EZ Boss-Lock cam arm assemblies, we sort the castings to ensure there is sufficient length and orientation on the lugs on the main casting to engage the lever. We also buff or grind the rougher sand cast surface to ensure that the lever will move freely. *The EZ Boss-Lock cam arms cannot be retrofitted onto existing aluminum, brass or plated iron Boss-Lock already in service.*

PTFE Cam and Groove Gaskets

The torque (force) required to close the handles on a pair of cam and groove fittings will vary according to the gasket chosen. Due to the nature of the PTFE material, the various PTFE gasket designs will require the most torque, increasing as you go from envelope to encapsulated, and finally, accordion.

- PTFE white Buna filler (TFWB) and PTFE encapsulated silicone (TES) all contain FDA approved materials.
- PTFE accordion gaskets (TFACC) are recommended for use with viscous (thick) fluids only.
- Encapsulated gasket pressure ratings are reduced to **125 PSI** for ¾" - 4" at ambient temperature (**70°F**)
- PTFE encapsulated Viton® (TEV) gaskets - maximum operating temperature **200°F**
- PTFE encapsulated silicone gaskets (TES) gaskets - maximum operating temperature **225°F**
- *Maximum operating temperatures for specific chemicals may be lower*. Contact Dixon for specific recommendations.

8"	200	***MSBC800SSFL*** [1]	**0**

[1] 150# ASA flange

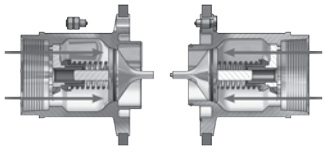

How it Works

Safety break-away couplings have three external break bolts. In the case of axial tension all of the bolts take up the force corresponding to the break force on the hose with a safety margin. Non-axial forces concentrate the tension forces more strongly on one bolt, so that the safety break-away coupling reacts in a natural way to the reduction of the hose break forces.

BEFORE emergency disconnect

The safety break-away valve consists of two halves, each with a valve that has an O-ring seal.

AFTER emergency disconnect

When the safety break-away couplings separate, it allows the valves to close. The two valves close rapidly, minimizing exposure to personnel and the environment.

Optional Non-Closure Design

The non-closure design is an economical alternative which allows the coupling to break away due to pull-away/drive-away incidents thus protecting piping systems and equipment. This design allows spillage of product in these instances due to the lack of valving in the coupling.

Useful in applications where non-hazardous product is being conveyed and where there are no environmental concerns. Available in both Industrial and Marine versions. Consult the factory for more information.

Dry Disconnect Couplings

Dry disconnect couplings are designed for the quick and spill free connection and disconnection of hoses and pipelines when transferring expensive hazardous product that is costly to clean up, reprocess or dispose of. Dry disconnects are used by producers of ink, adhesives, fatty acids, pharmaceuticals, liquid soaps, petroleum, chemicals, agricultural and a wide variety of common caustic and specialty acids.

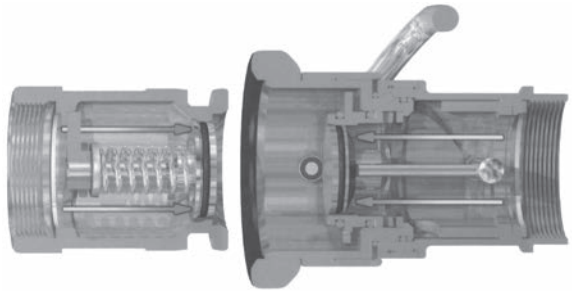

- Easy to handle - push and turn - free flow, turn and pull - closed
- Time saving - no need to drain hoses or pipe systems
- Economical - no loss or spillage of liquids at connection or disconnection
- Safety - the valve cannot be opened until the unit is coupled
- Environment friendly - accidental spillage eliminated when proper used
- Safe and reliable - due to rugged construction
- Product life - uncomplicated design and high quality materials ensures long product life
- Selectivity - To avoid product contamination caused by connecting a coupler to the wrong adapter, selective versions of the adapters are available. Contact the factory for further information.
- produced according to NATO standard STANAG 3756 and ATOFINA SGM 2049.TUY.C.
- Working Pressure (at ambient temperature (70°F):
  aluminum: **300 PSI**, up to 4"
  brass/ gunmetal *: **300 PSI**, up to 4"
  stainless steel: **360 PSI**
- Optional seals:
  EPDM
  NBR - nitrile
  Kalrez®
  Chemraz®
  Perlast®
- Seal kits are available

** produced to US government bronze specification G*

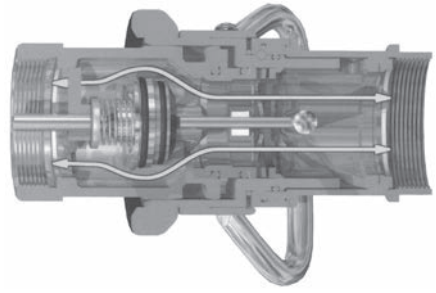

Interchanges with Avery Hardoll and Todo-matic®

How it Works

The principle of operation is identical for all sizes of couplings.

Closed:
- Turn and pull
  it's released - no spillage

Open:
- Push and turn
  it's coupled - full flow

Dry Quick Disconnect Couplers

- coupler has built-in swivel
- stainless steel ball bearings
- shaft journal in stainless steel embedded in PTFE (PTFE) to eliminate seizure
- riveted piston pin to minimize the risk for failure under extreme pressure conditions
- the protective ring is a specially formulated, weather resistant and electrically conductive rubber compound
- all wetted parts are stainless steel
- stainless steel couplers: rollers are Hastelloy C276 on the stainless steel shaft
- aluminum and brass couplers: rollers are aluminum-bronze on the stainless steel shaft
- Composite (Polyeten PE-HD 300) plugs provide very good protection against corrosion and withstand hot and cold environments.

Dry Aviation Couplings

Dry aviation couplings are designed for use in aviation refueling systems. Manufactured to accept the international standard 2½" point bayonet, hose end refueling nozzles according to: ISO45 / MS24484 / STANAG 3105 / British Aerospace Spec. 2C14. ***They are not configured for under-wing refueling.***

Technical Information:

- body: high strength aluminum
- coupling ring: gunmetal (*procuced to U.S. government bronze specification G*)
- bayonet flange and inner parts: stainless steel, aluminum
- all wetted parts are aluminum and stainless steel
- **150 PSI** working pressure at ambient temperature (70°F)
- Composite (Polyeten PE-HD 300) plug provides good protection against corrosion and withstands hot and cold environments.

Coupler - Hose Unit

- stainless steel ball bearings
- gunmetal coupling ring minimizes the risk of seizure
- stainless steel shaft journal embedded in PTFE eliminate seizure
- PTFE bearings between the driving plate and the piston guide eliminate the risk of seizure
- riveted piston pin minimizes the risk of failure under extreme pressure conditions
- the protective ring is a specially formulated, weather resistant and electrically conductive rubber compound

Dry Break Cam and Groove Dry Disconnect Couplings

Couplers

- dry disconnect coupler has automatic closing poppet assembly
- heavy duty stainless steel crank and link provide long service life
- stainless steel handle allows product exposure to corrosive chemicals or washdown service
- strong handle attachment prevents bending of crank assembly
- fully interchangeable with Kamvalok (OPW trademark) style fittings
- aluminum fittings have stainless steel internals[1]
- for pressure ratings at other temperatures, contact the factory
- Dixon EZ Boss-Lock cam arms provide high security from accidental opening due to vibration or snagging on 1½" and 2" fittings
- large paddle type cam arms allow for an easy grip on 3" fittings

Must be used with a DBA style adapter for coupler to operate. SAFETY ALERT
Adapter sold separately.

[1] stainless steel corrosion resistance is comparable to 304 stainless steel
[2] Kalrez® gasket, main seal O-ring and handle O-ring. PTFE seals on cylinder assembly, stuffing box, and seal under poppet screw.

Dry Break Cam and Groove Dry Disconnect Couplings

Adapters

Compatible with most cam and groove style dry disconnects. The Bayco dry disconnect helps prevent spillage from normal or accidental disconnects. A spring loaded sealing device is designed to snap closed should the valve become disconnected with the poppet open, significantly limiting liquid loss.

Contact the Dixon at 800-355-1991 for chemical compatibility, size, and material selection. Special configurations can be designed for your application.

- two-piece adapter design for easy rebuilding of adapters
- fully interchangeable with Kamvalok (OPW trademark) style fittings
- aluminum fittings have aluminum nose piece and brass piston
- for pressure ratings at other temperatures, contact Dixon

Dry Gas Couplings

Dry gas couplings are designed for safe loading and discharge of bobtails or intermediate bulk delivery trucks. They are quick and easy to connect and can be connected to a tank unit with pressures up to **225 PSI** at ambient temperature (70°F). If the pressure is higher you can equip the couplings with a pressure relief valve. The easy to connect pressure relief valve dissipates trapped fluid pressure into the hose coupler without spillage. The primary application of dry gas couplings is in the handling of LPG - Propane and Butane.

- safe handling of LPG
- easy to use and saves time
- reliable and easy to maintain
- can be coupled to a tank unit with pressures up to 225 PSI
- minimizes the risk of cold burns
- minimizes spillage and product loss
- minimizes health risks
- keeps the environment free of hazardous vapors and liquids
- compatible with existing dry disconnect couplings

Technical Information:

- stainless steel and brass / gunmetal (*produced to US government bronze specification G*)
- Viton® seals
- female NPT and ASA flanges
- **360 PSI** working pressure at ambient temperature (70°F)
- Composite (Polyeten PE-HD 300) plugs provide good protection against corrosion and withstand hot and cold environments.

Flomax Diesel Fueling System

Designed for on-site refueling of construction, mining, forestry and agricultural equipment. Interchanges with Caterpillar® and Wiggins systems.

Diesel Fuel Nozzle

- 1½" female NPT
- integrated high flow swivel
- integrated sealing plug
- plug/bumper assembly gives complete nose seal
- stainless steel dog latch mechanism and ball lock styles available
- tested to 180 gallons per minute
- investment cast aluminum housing
- anodized aluminum non-wear parts
- heat treated stainless steel wear components
- Delron® bushings eliminate metal-to-metal wear

Description	Part #	Price/E
dog latch mechanism with sealing plug	***FN600***	**$2787.25**
ball lock with sealing plug	***FN600BL***	**2629.75**
sealing plug for FN600	***FN600B-PLUG***	**187.45**
sealing plug for FN600BL	***FN600B***	**187.45**

Diesel Fuel Receiver

- 2" male NPT
- available in anodized aluminum or nickel-plated steel
- O-ring sealed aluminum cap
- cap has set screw attached vinyl coated cable lanyard

one-piece body

Description	Material	Part #	Price/E
one-piece receiver without cap	nickel-plated steel	***FRS***	**$371.25**
one-piece receiver with cap	nickel-plated steel	***FRS-C***	**431.75**
one-piece receiver without cap	anodized aluminum	***FRA***	**371.25**
one-piece receiver with cap	anodized aluminum	***FRA-C***	**431.75**
cap for receiver	anodized aluminum	***FR-CAP***	**123.75**

- FR2 receiver allows replacement of wear components without draining the fuel tank
- FR2 receiver has an aluminum base with nickel-plated steel nose

two-piece body

Description	Part #	Price/E
two piece receiver with removable stainless sleeve without cap	***FR-RS***	**$664.00**
two piece receiver with removable stainless sleeve with cap	***FR-RS-C***	**695.65**
removable sleeve replacement for two piece receiver	***FR-RS-R***	**223.15**

Diesel Fuel Swivels

- stainless steel male threaded base
- stainless steel ball bearings
- hand black anodized female threaded nut
- fluorosilicone sealing O-rings

standard

Thread Size	Description	Part #	Price/E
1½" male NPT x 1½" female NPT	standard	***FNS***	**$343.75**
2" male NPT x 1½" female NPT	standard	***FNS2***	**357.50**

GFR-90

Flomax Fuel Vent Series

- 2" male NPT
- billet cap provides superior impact resistance
- easily serviced all metal construction
- rigid ball cage for positive seal
- available with:
  - threaded outlet
  - half coupling
  - anti-vandalism mounting

Description	Part #	Price/E
with 5" tube	***VT***	**$453.70**
with 7" tube	***VT7***	**467.45**
with 9" tube	***VT9***	**481.20**
with 5" tube and threaded outlet	***VTT***	**509.90**

VTT

Flomax Service Box

- Designed to enclose receivers for diesel fuel, hydraulic oil, transmission fluid and coolant reducing contamination and weather related problems.
- normally installed on heavy duty earth mover equipment and drill rigs
- 12 gauge steel construction with heavy duty hinges
- painted white - Imron® Primer

Part #	Price/E
FSB	**$1615.00**

does not include receivers shown in photo

Flomax Standard Series Connectors

The Flomax standard series connectors consist of four color-coded mating connectors. They have all-metal construction with stainless steel wear components and anodized aircraft grade aluminum non-wear components. Each has easily recognizable labeling and is fully compatible and interchangeable with industry standards.

Engine Oil (red)

- universally fits all crankcase receivers, both R-series and Standard series
- incorporates 10 locking balls with a 40% deeper engagement
- resistant to clogging with a greater ease of cleaning
- smooth actuation
- larger diameter pullback lanyard
- bright red anodized aircraft grade aluminum

Nozzles	Male Thread	Female Thread	Description	*Anodized Aluminum* Part #	Price/E

Flomax High Flow Series

3/4" Series

Consists of 6 nozzle and receiver sets that are color coded for quick identification of mating parts. Each color nozzle and receiver will only couple with their matching color component. This provides complete protection against cross contamination.

- maximum flow rate of 45 GPM at 70 PSI
- working pressure rating: **200 PSI**
- The standard mounting for the nozzle is a ¾" female NPT and for the receiver is a ¾" male NPT.

Nozzles	Female Thread	Description	*Anodized Aluminum* Part #	Price/E

		copper receiver with cap	***ERS-C6***	**344.60**

Note: ERS series is available with JIC bulkhead base. Substitute 'J' for 'S'. Example: ERJ-C2

1" Series

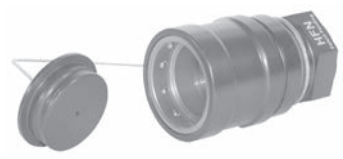

Consists of 7 nozzle and receiver sets that are color coded for quick identification of mating parts. Each color nozzle and receiver will only couple with their matching color component. This will provide complete protection against cross contamination.

Each of the 7 nozzles and 7 receivers has the following performance:

- The nozzle/receiver combination has a flow area equivalent to a 1" schedule 80 pipe.
- The fittings have a **500 PSI** working pressure rating with 1500 PSI minimum burst pressure.
- All wear parts are constructed of stainless steel for long life and corrosion resistance.
- All non-wear parts are constructed of colored anodized aircraft grade aluminum for high strength, lightweight and corrosion resistance.
- The standard mounting for the nozzle is a 1" female NPT and for the receiver is a 1" male NPT. The receivers also come with a 1" female NPT threaded base.
- The nozzle incorporates a "ball lock" mechanism to ensure smooth and reliable operation.

Physical Description:

- nozzle length: 3.90" (99 mm)
- receiver length: 3.44" (87 mm)
- diameter: 2.50" (64 mm)
- hex size: 2" (51 mm)
- nozzle and receiver coupled length: 5.44" (138 mm)

V-Ring Swivel Joints

V-Ring Parts Identification List

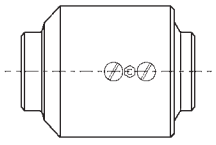

1. body
2. sleeve
3. ball bearings
4. seal retainer
5. V-ring (pressure) seal
6. spring retainer
7. spring
8. ball retainer screw
9. grease fitting
10. O-ring (dust) seal

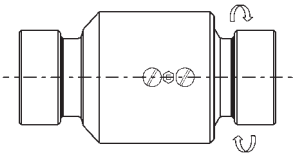

V-Ring Features:

- The spring-loaded triple V-ring sealing system ensures a leak proof seal at either high or low pressure and an extended seal life compared to the conventional single O-ring design.
- The 3" - 8" carbon steel swivels are manufactured from carbon steel with flame hardened dual raceways for greater load bearing capacity and longer life.
- The stainless steel swivels are manufactured in 316 grade stainless steel for superior corrosion resistance.
- available with pressure ratings to 1,000 PSI
- available in carbon steel, stainless steel and aluminum
- ***optional 100% full penetration welding available***

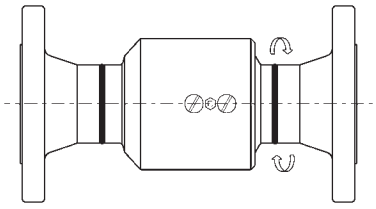

Single Plane V-Ring Style 20

O-Ring Swivel Joints

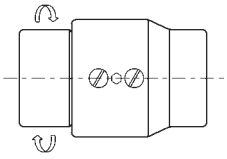

O-Ring Parts Identification List

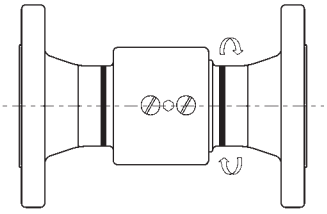

1. O-ring (dust) seal
2. ball retainer screw
3. O-ring (pressure) seal
4. grease fitting
5. ball bearings

- The O-ring pressure seal ensures a leak-proof seal at either high or low pressure and smoother rotation at lower torques than multiple seal designs.
- Spring-loaded PTFE pressure seals are available up through 3".
- Carbon steel and stainless steel O-ring type swivels provide greater strength and corrosion resistance needed for lower torque applications.
- available in carbon steel, stainless steel, aluminum, brass and iron
- ***optional 100% full penetration welding available***

Single Plane O-Ring Style 20

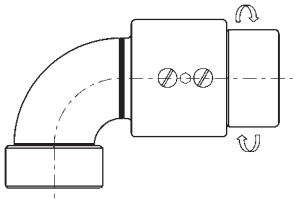

female NPT x female NPT
sizes 1" - 4"

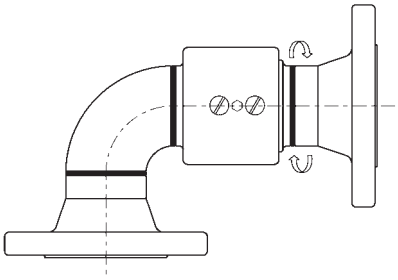

150# ASA flange x 150# ASA flange

Ordering Information - Swivels

To select the proper swivel joint you need the following information:

Size: _____ Style (shape): _____

End Configuration: _____ Material: _____

Maximum Working Pressure: _____ Temperature Range: _____

Product being handled: (if a chemical, please advise concentration) _____

If for constant rotation, advise RPM: _____

If for suction service, advise maximum vacuum in inches of Mercury (Hg): _____

Dixon's sales and engineering staff will be happy to help you evaluate your swivel application. Please call 800.355.1991.

	swivel size	*swivel style*	*end configuration*		*end configuration*	*swivel material*	*pressure seal (Buna-N standard)*	*dust seal (Buna-N standard)*	*retainers (V-Ring ONLY)*	*ball bearings (carbon steel standard)*	*grease*
Example	**2**	**20**	**F**	**X**	**F**	**CS**	**0**	**0**	**1**	**0**	**0**
	[A**]**	**[**B**]**	**[**C**]**		**[**C**]**	**[**D**]**	**[**E**]**	**[**F**]**	**[**G**]**	**[**H**]**	**[**I**]**

[A] Size
[B] Style (see diagrams)

[C] End Connections	**W** Weld End	**F** Female End	**FG** 150# ASA Flange	**TF** Tank Truck Flange	**PF** 300# ASA flange (not available on aluminum)
[D] Material	**CS (V-Ring)** carbon steel	**SS (V-Ring)** stainless steel	**AL** aluminum	**BR** brass	**MI** malleable iron
	OC (O-Ring) carbon steel	**OS (O-Ring)** stainless steel			

Code #	[E] Pressure Seal	[F] Dust Seal	[G] Retainers	[H] Ball Bearings	[I] Grease
0	Buna-N (standard)	Buna-N (standard)	No retainers (O-ring swivels)	Carbon steel (standard)	Standard
1	Viton®	Viton®	Aluminum (standard in CS V-ring)	440 grade stainless	FDA approved/ Food grade
2	PTFE	---	PTFE (standard in SS V-ring)	316 grade stainless	Silicone (required with EPR seals)
3	Ethylene Propylene (requires silicone grease)	Ethylene Propylene (requires silicone grease)	---	---	---
4	FDA Buna (O-ring only)	FDA Buna	---	---	---

The swivel should be packed so that the surfaces coming in contact with the fluid being handled are compatible with that fluid. In the case of the use of the swivel in submerged service this would include the dust seals and ball bearings.

Dixon always recommends the use of stainless steel ball bearings when building a swivel for submerged service since the standard carbon steel bearings could rust together making it impossible to disassemble the swivel and possibly affecting its operation.

Hammer Unions

- Socket weld configurations and other materials are available, contact the factory for further information.
- Hammer unions work at extremely high pressures. Mismatching components of one series with another (i.e. series 602 with series 1502) can lead to destruction of property, serious bodily injury or death.
- temperature rating: **-25°F** to **200°F**

SAFETY ALERT

Note: non-shocking cold water pressure means that the rated value is the maximum pressure at ambient temperature:

- no spikes higher than this pressure
- no instantaneous pressure increases (0-2000 PSIG in ¼ of a second)
- ambient temperature: 70°F

100 Series

- used on low pressure manifolds and lines and in applications running air, water, oil or gas up to 1,000 PSI NSCWP (non-shock cold working pressure)
- yellow sub, black nut

Products Recommended for Steam Service

Quick Disconnect Fittings

Quick disconnect fittings (socket and plug) are available in solid brass with stainless steel springs and locking balls in sizes ¼" through 1½". For further information see page 92.

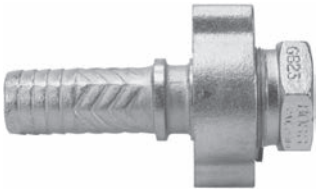

GJ Boss™ Female Ground Joint Fittings

GJ Boss™ female ground joint fittings are available in plated steel and/or iron in sizes ¼" through 6". For further information see page 93.

Boss Female Washer Seal Fittings

Boss female washer seal fittings are available in plated steel and/or iron in sizes 3/8" through 6". For further information see page 94.

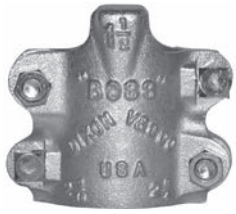

Boss Male Stems

Boss male stems are available in steel bar stock in sizes ¼" through 1"; iron in sizes 1¼" through 4"; 316 stainless steel in sizes ½" through 4" and brass in sizes ¾" through 3". For further information see page 95.

Boss Clamps

Boss clamps in the 2-bolt and 4-bolt style are available in plated iron in sizes ¼" through 3"; stainless steel in sizes ½" through 3" and brass in sizes ½" through 2". Boss clamps in the three-piece style are available in plated iron in sizes 3" through 6". For further information see pages 98 and 99.

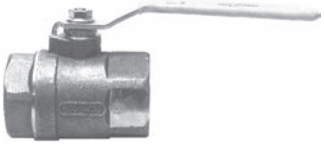

180° Steam Gauge Siphon

180° steam gauge siphon is available in red brass pipe in ¼". In order to prevent live steam from entering a pressure gauge bourdon tube a siphon filled with water should be installed between the gauge and the process line. For further information see page 251.

250 PSIG Steam Ball Valve

250 lb. steam ball valves are available with a threaded bronze valve, 316 stainless steel ball and stem in sizes ½" through 2". For further information see page 542.

Note: Pressurized steam is an extremely dangerous commodity. Only hose, fittings, clamps and accessory items that have been approved for steam service should ever be used! Never use an unapproved item for steam service. Always follow the manufacturer's product recommendations for pressurized steam handling.

SAFETY ALERT

Steam Quick Disconnect Couplings

Designed exclusively for steam applications, the coupler and plug are solid brass with stainless steel springs and locking balls. The coupler has a large plated steel sleeve especially designed for easier gripping with gloves. Two ethylene propylene O-rings in the coupler and one ethylene propylene O-ring in the plug provide double protection against leaks. Rated to **100 PSI** gauge saturated steam **(338°F)**.

SAFETY ALERT ***Warning: Do Not Disconnect Under Pressure!!*** SAFETY ALERT

Boss Coupling System

Features: The spud part of the coupling serves as one half of the connection and is usually fixed to the equipment. The stem part that is clamped to the hose is the other half. The two halves are connected or disconnected by rotating the wing nut onto the spud. When connected they achieve a mechanical, as well as, a pressure seal.

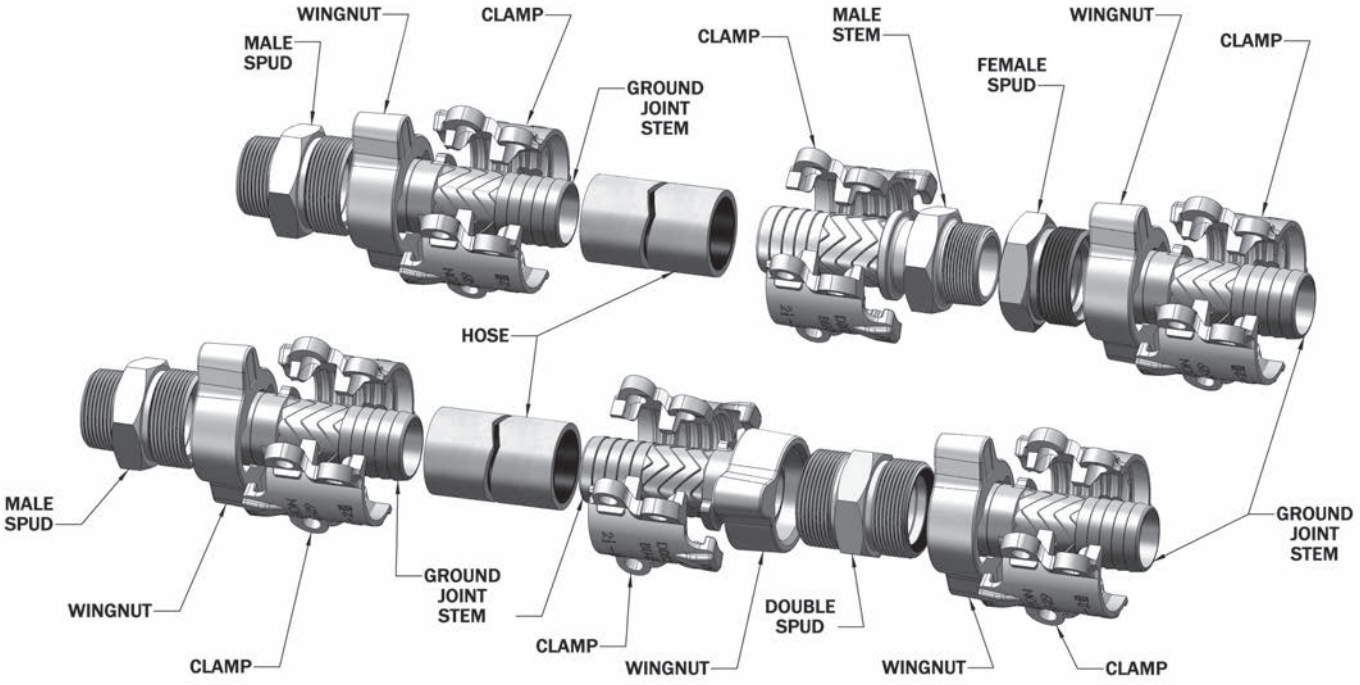

Services: Boss couplings are all-purpose hose couplings, universally recommended for steam hose connections. They are also widely used for air, water, fluid petroleum, chemicals and liquid petroleum gas up to 1" ID. Boss couplings can be applied to many types of rubber, synthetic, plastic, metallic or semi-metallic hose. Consult the factory for specific media capabilities.

Purpose: Boss couplings supply a convenient threaded fitting to connect two lengths of hose, or a single length to a male or female threaded (NPT) outlet.

Material:
- stem: ¼" - 1" plated steel, 1¼" - 4" plated iron, 6" tubular steel
- spud: ¼" - 1" plated steel, 1¼" - 6" plated iron
- wing nut: ¼" - 1" plated steel, 1¼" - 6" plated iron

Seal Types:
- ground joint: copper or polymer seats
- washer: Klingersil® C-4401

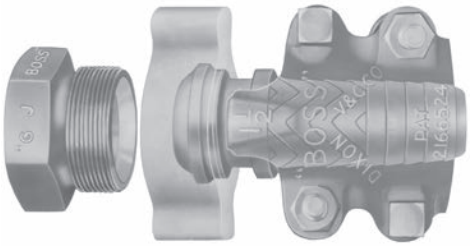

SAFETY ALERT Worn-out hose couplings can be dangerous. They should be checked regularly and replaced when necessary. Each coupling user should review applications and add safety devices where indicated.

GJ Boss™ Ground Joint Seal

Positive Metal-to-Polymer Seal

- A leakproof seal is formed when the metal head of the stem makes contact with the patented polymer seat in the spud.
- The non-metallic polymer seat resists most chemicals found in manufacturing facilities. (reference corrosion resistance chart on pages 642-647)
- recommended for steam service up to **450°F** SAFETY ALERT
- easy to seal
- works with existing fittings
- *plated steel and / or iron*
- use with Boss clamps found on pages 98 and 99.

SAFETY ALERT Boss couplings and the steam quick disconnects on page 92 are the only Dixon couplings recommended for steam service.

Boss Washer Seal

Washer Type

- A Klingersil® C-4401 washer is inserted between the stem and spud.
- A leakproof seal is formed by rotating the wing nut and hammering it tight.
- recommended for steam service up to **450°F** SAFETY ALERT
- easy to seal
- works with existing fittings
- *plated steel* and / or *iron*
- use with Boss clamps found on pages 98 and 99.

[1] 4 gripping fingers
[2] will become obsolete as inventory is depleted
[3] torque applies to plated iron and stainless steel clamps
[4] global investment cast carbon steel
[5] not to be used with GF81, GB26, WF81, B26, RGF81, RGB26, BGF81, BGB26, RWF81, RB26 SAFETY ALERT

- Replacement nuts and bolts are available, contact Dixon for more information.
- The bolts used in the Boss interlocking clamps are not standard bolts. They vary from standard bolts in their length, diameter, overall thread length and material hardness. These bolts can be retorqued, but it is ***not*** recommended that the bolts or clamps be reused, as they are designed for a single bend only. Dixon recommends using only factory supplied replacement bolts. SAFETY ALERT
- Torque values for clamps are based on dry bolts. The use of lubricant on bolts will adversely effect clamp performance. *Do not lubricate nuts and bolts.* SAFETY ALERT
- See page 652 for Fraction to Decimal conversion chart.
- recommended torque rating in ft. lbs. SAFETY ALERT

Dixon Mining Fittings

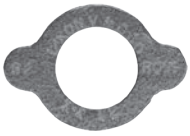

- These lightweight fittings are designed for underground air and water service. Metal to metal taper seat, zinc-plated steel. The fitting system features a plated steel hose stem, nut, and spud. Both the stem and spud have tapered seats which are held together by the nut, creating a positive metal to metal seal. The stem is sized to the hose ID and prior to being inserted into the hose, either a hex nut or wing nut is added to the stem. The hose stem with the nut is then inserted and clamped to the hose using band clamps.
- For ½", ¾" and 1" sizes, spuds or a special pipe nipple with an internal reamed taper, are permanently threaded to either the tool/equipment or air/water supply piping. For 1¼" and 1½" sizes, regular pipe nipples are often used as spuds. When it's desired to connect the equipment to the supply piping, the hose assembly with the clamped on stems and nuts, is simply threaded to the spuds or pipe nipples, on both the tool/equipment or air/water supply piping.

Sand Blast Couplings

Sand blast couplings are designed for use on sand blast hose.

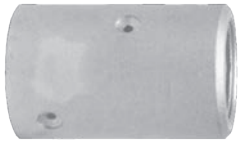

- supplied with screws
- nozzle holders have 1¼" NPSM thread
- rated to **110 PSI** at ambient temperature (70°F)
- *Abrasive blasting equipment must have hose safety cables (page 119) or hose coupling safety locks.* SAFETY ALERT
- Installation:
  1) Ends of hose must be cut square to fit snug against metal end.
  2) Holding hose tight to end of fitting, insert screws and turn in full, putting screw 180° from first to ensure best centering.
  3) After all screws have been placed, check tube opposite screws to be sure screws have not penetrated completely through.
  4) On quick couplings, insert safety clips

[1] global investment cast
[2] Prices for Universal couplings listed above include safety clip (not pictured).

- *The use of an Air King safety clip or wire type retainer is necessary to ensure Air King universal couplings will not become accidentally disconnected.* This guarantees the fittings are properly connected because the safety pin will not go through the holes in mating flanges until couplings are locked in place. Only one Air King safety clip or wire type retainer is required for each Air King universal coupling.
- To provide protection against coupling breakage and related hazards, Dixon recommends the use of a whip hose. See page 6 for Whip Hose safety information.
- Air King is rated to **150 PSI** at ambient temperature (**70°F**).
- Standard Air King fittings come with AWR4 rubber washers.
- Air King meets pressure requirements as specified in A-A-59553 commercial item description superseding Mil Spec. WWC-633D.

SAFETY ALERT

SAFETY ALERT

Air King is for air and water service only *Warning: Never use any Air King coupling for steam service!*
None of Dixon's catalog information is to be interpreted to mean that this type of coupling is suitable for use on steam hose.

Surelock Quick Acting Couplings

The Surelock coupling is a multi-purpose coupling for water and air, commonly used in construction and mining. This coupling excels where ease, economy, safety and speed are paramount. They are stocked in sizes from 3/8" through 2". The pressure activated gasket allows easy coupling (less than 15 lbs. of force is required to connect the coupling) and gaskets seal upon introduction of line pressure. *Safety pin is supplied with each coupling and is required as a safety precaution.* SAFETY ALERT

Specifications:

- body: SG iron AS1831 400-250-12
- bellow seal: natural rubber (patent pending), other seal material available upon request
- working pressure: **500 PSI** at ambient temperature (70°F)

Steel 3500 Nipples with Ferrules

Exclusive interlocking ferrule can be crimped or swaged to achieve maximum coupling sealing and retention. The 3500 steel nipples with ferrules have a low profile, streamline appearance. For crimp dimensions see page 676.

- zinc plated steel 3500 nipple with carbon steel ferrule
- can be crimped or swaged-on
- rated to **600 PSI** working pressure at ambient temperature (70°F)
- *for air and water service only* SAFETY ALERT

Size	Hose OD From:	Hose OD To:	*Steel* Part #	Price/E

The Importance of Whip Hose

SAFETY ALERT

The constant vibration created by air tools, like air drills and pavement breakers, is destructive to air hose couplings, especially the quick-acting type. To provide protection against coupling breakage and related hazards, Dixon recommends the use of a whip hose. To construct a whip hose, connect one end of a short (3' to 10')air hose to the air tool using a 3500 type steel nipple. Connect the other end of the hose to the air supply using the standard quick-acting coupling. The heat-treated 3500 nipple will withstand vibration far better than the standard coupling and provide a safer connection. The whip hose should remain permanently connected to the tool.

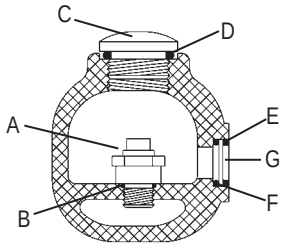

In-Line Lubricators

Designed to protect portable or stationary air tools by efficiently oiling the tool mechanisms. Each time an air tool is operated, a fine mist of oil is injected into it along with the air from the compressor. Installation is recommended within 25 feet of the tool to be lubricated. Refer to the arrow for proper air flow direction. Transparent sight disc allows visual inspection of oil level. Oil flow regulated by screwdriver screw adjustment. Minimum flow rate is 30 SCFM.

Not recommended for constant flow applications. For reciprocating tools only. SAFETY ALERT

Type of oil to use:
Use any petroleum-base, non-detergent light weight oil (SAE 10/150SSU) which will readily break up into a mist, i.e., Mobil DTE light or comparable oil. *Do not use any synthetic oil or oils containing additives or solvents.* SAFETY ALERT
See page 136 for air tool lubricant.

In-Line Air Filters

Designed specifically for the protection of small air tools, such as impact wrenches, nut runners, grinders and screwdrivers. The all-anodized, lightweight aluminum housing is compact and can be used directly before the air tool.

- maximum operating pressure: **500 PSI**
- operating temperatures: **35°F** to **200°F**
- air flow is 140 SCFM
- standard element is 40 micron, which ensures minimum pressure drop
- elements can be replaced quickly

Male NPT	Overall Length	Diameter	Weight Lbs.	*Aluminum* Part #	*Aluminum* Price/E

King Safety Cables

When hose, couplings or clamps fail, or there is an accidental separation of the assembly, King safety cables minimize damage to equipment and injuries to operators. King safety cable reaches across the hose fittings to provide standby safety for hose. Spring-loaded loops in the cable ends open easily to pass over the couplings for a firm grip on the hose. Thoroughly tested with years of service. A positive safeguard for air hose connections - helps you meet today's safety standards. *King safety cable must be installed in the extended position (no slack).* SAFETY ALERT

Features:
- hose-to-hose or hose-to-rigid outlet
- King cable is the low cost answer to eliminate injuries caused by broken air hose connections
- highly resistant to rust and corrosion
- no tools needed - easy to install and remove
- maximum working pressure: **200 PSI**

Spring Guard

with tang

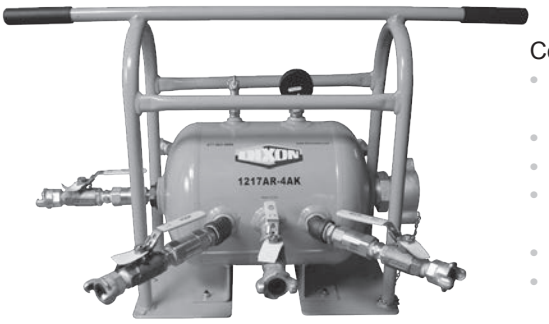

without tang

Protects hose against the effects of flexing at its most vulnerable point - immediately behind the coupling. End 'tang' allows end guard to be secured under a clamp or ferrule. Made of half-round galvanized steel or 304 stainless steel wire to fit most hose OD's from ½" to 3¼". Contact the factory for custom sizes or lengths.

ASME Air Receiver Manifold

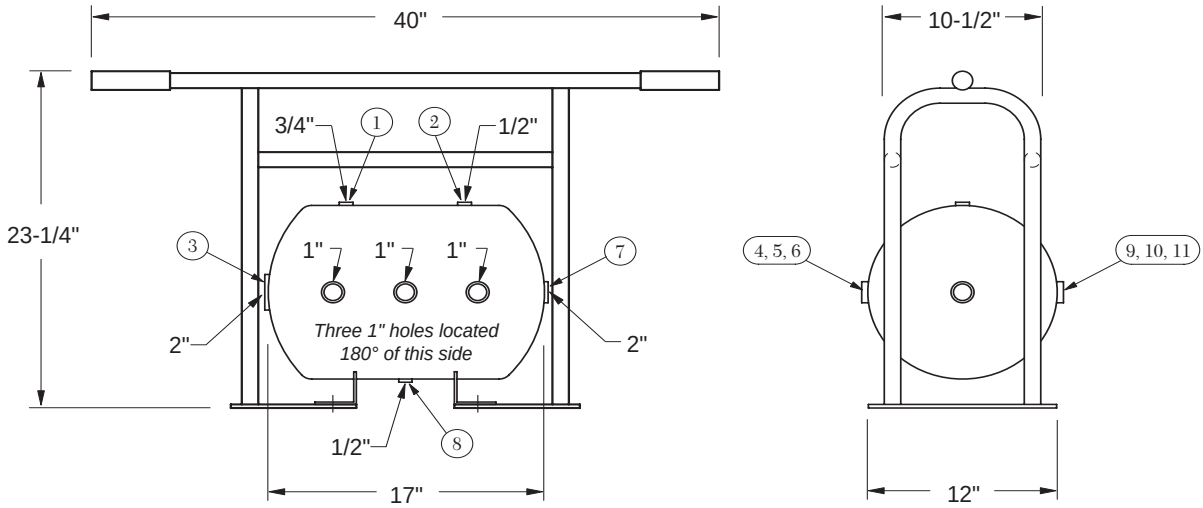

1217AR-4AK

Compressor Air Receiver:
- built to ASME Code, National Board registered
- 7 gallon capacity
- all openings are female NPT thread
- conforms to OSHA standards 1910.169 and 1926.306
- painted safety orange
- **200 PSI** working pressure

1217AR-4FR

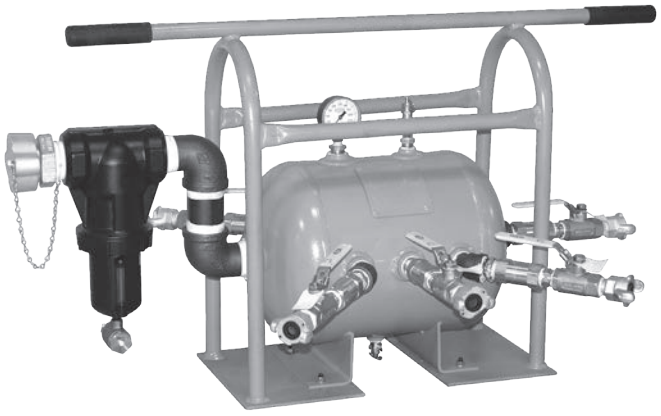

Dixon 1217AR-4AK air receiver manifold assembly with Air King outlet ports includes the following:

Part # / Locations	Description	Price/E	Price
1217AR-4	ASME compressed air receiver	**---**	**$1150.00**

ASME Air Tank with Fittings and Watts Filter

Designed to remove compressed air contaminants such as water, compressor oil, dirt, pipe scale and water particles from the air supply at the point of entry into the ASME air tank.

- includes basic *1217AR-4AK* ASME manifold assembly
- *F602-16WJR* 2" auto drain filter with 26 ounce metal bowl and related plumbing installed on the inlet port of the ASME air tank
- Air supply hose connects directly to *GM28* 2" male spud on the filter air inlet.
- includes a *B27SC* wing nut cap with a chain

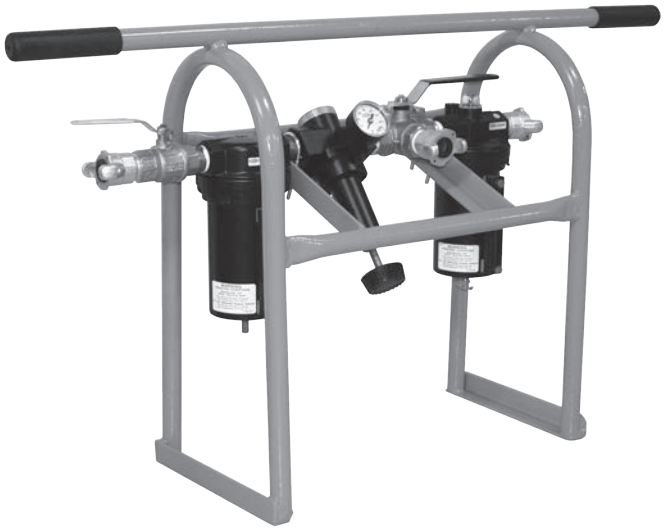

ASME air tank with fittings and Watts filter

Size	Part #	Price/E
2" inlet, ¾" outlets	***1217AR-4AKWF***	**$4623.20**

Wilkerson Combination Unit with Protective Frame

Provides downstream air preparation with protective frame and includes the following components:

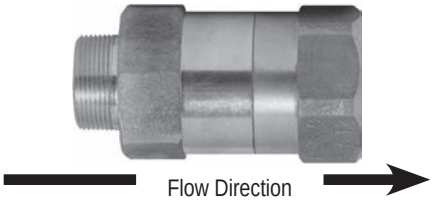

- *C31-08AMB* 1" FRL with metal bowls and auto drain filter
- *FBV100* 1" brass ball valve and *AM12* air king on inlet port
- *BBV100DTW* 2-way ball valve installed between regulator and lubricator provides option for non-lubricated air
- heavy duty frame protects air prep components
- operating conditions:
  maximum pressure: **250 PSIG**
  temperature range: **40°F** to **150°F**
  SCFM: 320

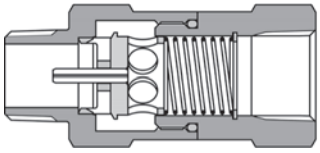

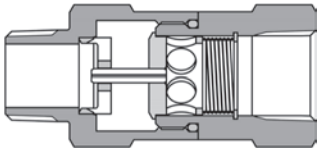

FRL with protective frame

Size	Part #	Price/E
1"	***C31-08FRAME***	**$1840.00**

Safety Check Valves

Check Valve in Open Position

Check Valve in Closed Position

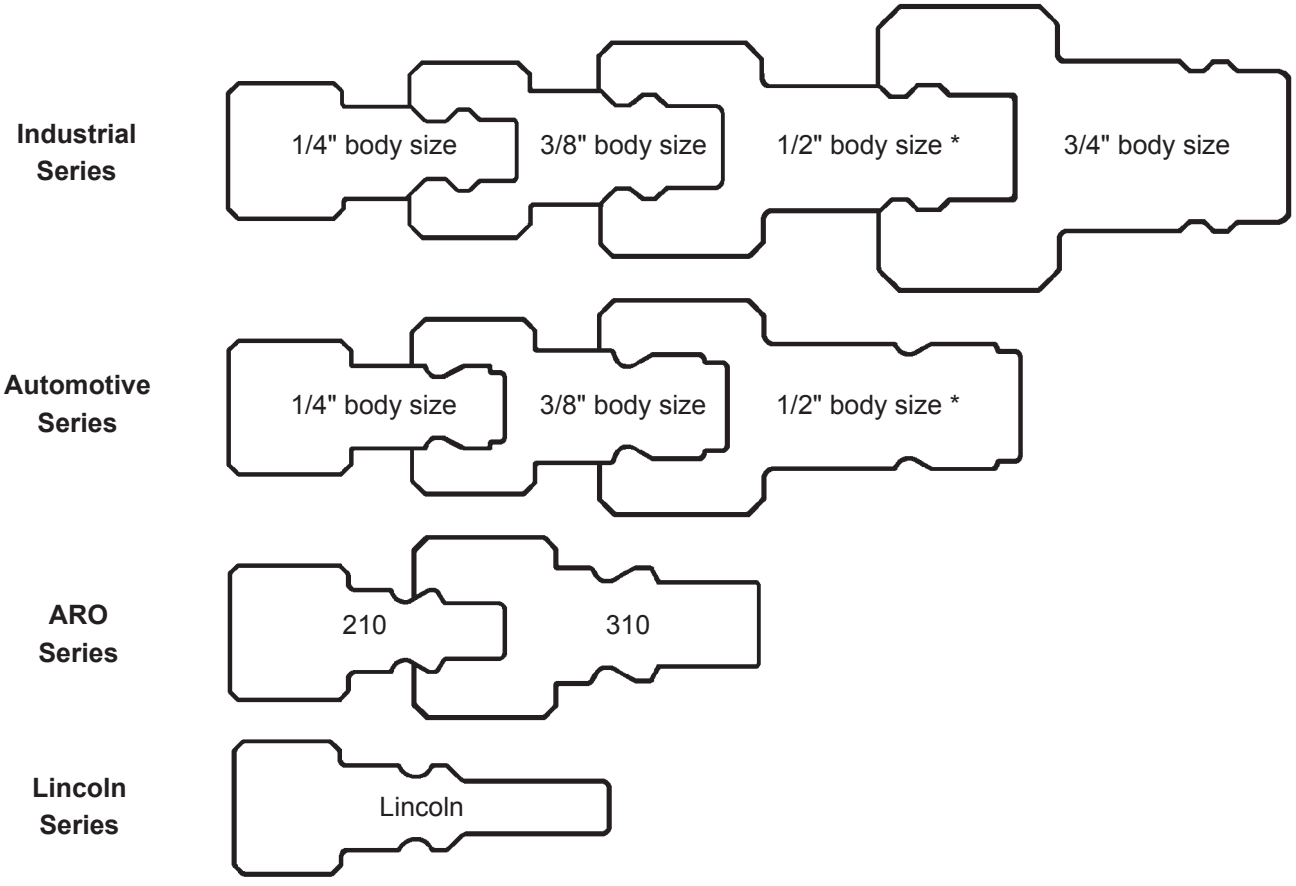

Features:
- high flow valve to provide optimum performance
- controls excess air flow (SCFM) in only one direction
- automatically senses change in air flow and shuts off the flow in the event of a surge in excess of valve flow rating thus preventing hose whip
- conforms to OSHA regulation 1926.302 (b) (7) requiring a safety device at the source of the air supply and at branch air lines
- applications include temporary plant/factory air, construction sites, shipyards or utilities
- *not for use in applications where 100% of the available air is required, i.e. sand blast, pile driving rigs,expansion joint blow down pipes, etc.*
- *does not prevent backflow* SAFETY ALERT

Construction:
- solid brass body and valve
- stainless steel spring and roll pin
- maximum working pressure: **250 PSI**
- maximum temperature: **250°F**

Use:
- Safety check valves operate by using the pressure differential across the valve to operate the valve and spring assembly. The pressure differential is directly related to the flow of air (SCFM) through the valve.
- When the pressure differential is within the operating limits - below the cutoff flow - of the unit, the force on the valve exerted by the spring is greater than that caused by the pressure differential (see "Open Position" graphic above). The valve remains open and normal operation continues.
- When the pressure differential is above the cutoff limit, the force on the valve exerted by the pressure differential is greater than the force exerted by the spring, and the valve closes (see the "Closed Position" graphic above).
- After the repair is made, normal operation is automatically enabled when pressure across the valve equalizes through the bleeder hole.
- The valve spring size can be specified by determining the air flow during normal operation and by estimating the air flow if a failure or rupture occurs.

Parker Ez-Mate Industrial Interchange Couplers

Ez-Mate couplings combine push-to-connect, exhaust-style action with a self-locking valve sleeve to guard against accidental disconnection. Simply follow the direction of the on-off arrow stamped on the yellow chromate valve sleeve. Valve sleeve acts as an integral shut-off valve that allows connection and disconnection at zero pressure. When the sleeve is moved to shut off air flow, it automatically vents downstream allowing for disconnection at zero pressure and eliminating the risk of hose whip.

- rated to **300 PSI**
- temperature range (standard seals): **-40°F** to **+250°F**
- Meet ISO 4414 requirements for a controlled pressure release system.
- not recommended for vacuum service

Legris Automatic Industrial Interchange Safety Couplers

- composite, non-marring body
- 1/4" body size ensures an excellent flow and total security due to disconnection in two steps
- compatible with industrial interchange plugs
- Perfectly suited for numerous installations including:
  - pneumatic tools
  - blow guns
  - pneumatic automotive equipment

1. vents plug side

2. disconnects

Air Chief Automotive Interchange Quick-Connect Plugs

Air Chief automotive quick-connect plugs will interchange with the popular makes of automotive quick-connect fittings such as Amflo, Dill, Milton and Truflate. There are some makes however, which do not interchange with any others. If you plan to interchange these couplings, make sure you have plug ends with the proper configuration.

Air Chief A Series Quick-Connect Plugs

Air Chief A series are intended for use in compressed air service where the convenience of one hand operation and a compact profile is desired. Machined from solid brass bar stock, stainless steel balls and springs maximize corrosion resistance.

- maximum working pressure: **500 PSI** at ambient temperature (70°F)

Air Chief Universal Quick-Connect Fittings

U-series are the first 6-in-1 couplers, works with: ARO 210, MIL-C-4109F, Truflate, Lincoln, Italian Standard and CEJN 320. Euro-style valving ensures maximum flow performance and automatic connection with minimal force required. Couplers have a sleeve-guard lip to reduce the risk of accidental disconnection while in service.

Breather Vents

Breather vents have many applications, including vacuum relief or pressure equalization on gear boxes, oil tanks or reservoirs. Common uses can be found on single acting cylinders or valves to prevent dirt and foreign particles from entering ports open to the atmosphere.

- standard pipe thread fittings for quick assembly and removal for cleaning
- nickel plated steel insert with a bronze filter
- The filter element is rated for 40 micron filtration.
- maximum operating pressure: **150 PSI**
- operating temperatures: **35°F** to **300°F**

Conical Mufflers

Conical mufflers are easy to install, threading the exhaust ports of air tool, valves, cylinders and other pneumatic equipment. They offer an economical method of reducing the noise levels below 90 dBA, conforming with OSHA standards.

- The bronze filter element is rated for 40 micron filtration. The element is bonded directly to the fitting. *These elements are not replaceable.*
- maximum operating pressure: **300 PSI**
- operating temperature: **35°F** to **300°F**

1"	2-7/8"	***CMF88***	**19.70**

Speed Control Mufflers

Speed control mufflers provide an infinite variation of metering air flow at an acceptable sound level on exhaust ports of air valves with complete safety. The speed of an operating cylinder or air tool may be increased or decreased with the adjusting screw. The final position is then locked in place by the lock nut. Objectionable exhaust air noise is eliminated by the surrounding sleeve of sintered bronze.

Air Tool Lubricants

A specially formulated high grade lubricant that prolongs the service life of air tools, cylinders and accessories while permitting maximum performance. It is a #10 weight lubricant. This compound is superior in performance to ordinary lubricants. Prohibits rust and removes moisture as it lubricates. It is non-corrosive, non-reactive and does not decompose. The easy pour spout helps prevent costly spills. Use with the in-line lubricators on page 118.

Brass Flow Control Valves

Series F

- Flow control valves provide precision flow control and full shutoff in one flow direction and automatically allow unrestricted free flow in the opposite direction.
- Two-step needle provides fine adjustments at low flow with the first three turns of the adjusting knob. The next three turns give full-open needle position and conventional throttling control.
- When flow is reversed, the heavy-duty poppet/retainer permits full-flow return capacity.
- Exclusive color coded reference scale on the adjusting knob greatly simplifies flow setting, resetting, adjusting and return to an original flow.
- A simple set screw locks the valve on any desired setting.
- maximum operating pressure: **2000 PSI** at ambient temperature (70°F) for sizes 1/8" - ¾", **500** PSI at ambient temperature (70°F) for 1"
- also available in steel, see page 360

Thread	*Brass* Part #	Price/E

1/2"	***BPF800***	**123.25**

Series N

- Ideal for use as speed controls on pneumatic systems where a reverse flow check valve is not needed.
- Provides excellent control and reliable shutoff in a very small envelope.
- Color coded reference scale on the adjusting knob simplifies setting, resetting, adjusting and quick return to a previous speed setting.
- maximum operating pressure: **2000 PSI** at ambient temperature (70°F) for sizes 1/8" - ¾", **500** PSI at ambient temperature (70°F) for 1"
- also available in steel, see page 360

Air Chief Safety Blow Gun

This basic safety blow gun is designed to conform to OSHA Standard 1910.242 (B) permitting a maximum of 30 PSI outlet pressure when dead ended based on a maximum of 150 PSI inlet pressure as well as OSHA Standard 1910.95 regulating occupational noise level exposure. *Safety glasses or shield must be worn when using any blow gun.* SAFETY ALERT

- Blow gun body is designed to comfortably fit the contour of the hand, minimizing user fatigue.
- Large lever with black vinyl grip further adds to the ergonomic design and allows for easy air flow activation.
- Recessed internal slotted screw allows easy access to valve assembly for repairs or replacement.
- Chrome plated zinc die cast body, nickel plated steel lever, vinyl thumb grip, stainless steel spring, brass valve, Buna-N seals and nickel plated brass tip combine for superior corrosion resistance as well as a contemporary look.
- ¼" female NPT inlet

Part #	Price/E
D204-30	**$18.20**

Note: The Air Chief safety blow gun has a safety tip which prevents buildup of tip pressure in the event the outlet is obstructed or "dead ended". It complies with the requirements for OSHA 1910.242 (B) and 1910.95 when used on air lines of 150 PSI or less. SAFETY ALERT

Premium Safety Blow Gun

The premium safety blow gun features a distinctive black powder coat finish to give it a rich appearance as well as long term protection from corrosion and rough handling. Designed to conform to OSHA Standard 1910.242 (B) permitting a maximum of 30 PSI outlet pressure when dead ended based on a maximum of 150 PSI inlet pressure as well as OSHA Standard 1910.95 regulating occupational noise level exposure. *Safety glasses or shield must be worn when using any blow gun.* SAFETY ALERT

- Blow gun body is designed to comfortably fit the contour of the hand, minimizing user fatigue.
- Large lever with vinyl grip further adds to the ergonomic design and allows for easy air flow activation.
- Zinc die cast body with a black powder coat finish, nickel plated steel lever, vinyl thumb grip, stainless steel spring, brass valve, Buna-N seals and nickel plated brass tip.
- ¼" female NPT inlet

Part #	Price/E
D204-30P	**$19.25**

Note: The premium safety blow gun has a safety tip which prevents buildup of tip pressure in the event the outlet is obstructed or "dead ended". It complies with the requirements for OSHA 1910.242 (B) and 1910.95 when used on air lines of 150 PSI or less. SAFETY ALERT

Safety Air Booster Blow Gun

The multiple holes in the safety booster tip of the safety air booster gun create a venturi effect that increases air flow (working capacity) while still remaining compliant with OSHA Standard 1910.242 (B). *Safety glasses or shield must be worn when using any blow gun.* SAFETY ALERT

- Blow gun body is designed to comfortably fit the contour of the hand, minimizing user fatigue.
- Large lever with vinyl grip further adds to the ergonomic design and allows for easy air flow activation.
- Chrome plated zinc die cast body, nickel plated steel lever, vinyl thumb grip, stainless steel spring, brass valve, Buna-N seals and nickel plated brass Safety Booster tip provide superior corrosion resistance.
- ¼" female NPT inlet

Part #	Price/E
D204-30SB	**$22.60**

SAFETY ALERT Note: The safety air booster blow gun has a safety tip which prevents buildup of tip pressure in the event the outlet is obstructed or "dead ended". It complies with the requirements for OSHA 1910.242 (B) and 1910.95 when used on air lines of 150 PSI or less.

Non-Safety Brass Tip Blow Gun

The ventless, nickel-plated tip provides the most economical means of achieving a concentrated stream of air for many blow-off applications. All other components and design features are the same as our Air Chief safety blow gun (D204-30). *Must be used on air lines having a maximum regulated pressure of 30 PSI in order to comply with OSHA Standard 1910.242 (B). Safety glasses or shield must be worn when using any blow gun.* SAFETY ALERT

- Blow gun body is designed to comfortably fit the contour of the hand, minimizing user fatigue.
- Large lever with vinyl grip further adds to the ergonomic design and allows for easy air flow activation.
- Chrome plated zinc die cast body, nickel plated steel lever, vinyl thumb grip, stainless steel spring, brass valve, Buna-N seals and ventless, nickel plated brass tip provide superior corrosion resistance.
- ¼" female NPT inlet

Part #	Price/E
D605	**$17.80**

SAFETY ALERT Caution: This blow gun does not have a safety by-pass to prevent buildup of tip pressure in the event of tip blockage. It may be used for cleaning purposes only if the air supply (inlet pressure) has been reduced to 30 PSI or less.

Non-Safety Rubber Tipped Blow Gun

The rubber tip will not scratch or mar delicate surfaces. The conical, rubber tip can also be used to create a seal between the blow gun and fluid lines (or any other opening). Base of the tip is nickel-plated brass for additional corrosion resistance. *Must be used on air lines having a maximum regulated pressure of 30 PSI in order to comply with OSHA Standard 1910.242 (B). Safety glasses or shield must be worn when using any blow gun.* SAFETY ALERT

- Blow gun body is designed to comfortably fit the contour of the hand, minimizing user fatigue.
- Large lever with vinyl grip further adds to the ergonomic design and allows for easy air flow activation.
- Chrome plated zinc die cast body, nickel plated steel lever, vinyl thumb grip, stainless steel spring, brass valve, Buna-N seals and rubber tip with a nickel plated brass base provide superior corrosion resistance.
- ¼" female NPT inlet

Part #	Price/E
D201	**$21.10**

SAFETY ALERT Caution: This blow gun does not have a safety by-pass to prevent buildup of tip pressure in the event of tip blockage. It may be used for cleaning purposes only if the air supply (inlet pressure) has been reduced to 30 PSI or less.

Blow Gun Extensions

These extension tips allow easier access to blow-off applications in high or hard to reach places. Supplied with 1/8" male NPT connections. Can be used with all Dixon Air Chief lever operated blow guns as well as most blow guns from other manufacturers. Made from a brass base with a rugged steel extension tube, all nickel plated.

Size Extension	Part #	Price/E
6"	***BGE6***	**$13.40**
10"	***BGE10***	**16.65**
12"	***BGE12***	**17.95**
18"	***BGE18***	**28.70**
24"	***BGE24***	**31.45**

Blow Gun Tips

Nickel plated brass safety tip with 1/8" male NPT connection can be used with all Dixon Air Chief lever operated blow guns as well as most blow guns from other manufacturers.

Part #	Price/E
SST10	**$3.05**

Rubber non-safety tip with nickel-plated brass 1/8" male NPT connection can be used with all Dixon Air Chief lever operated blow guns as well as most blow guns from other manufacturers.

Part #	Price/E
D201RT	**$7.75**

Cannon Blow Guns

High Volume Cannon® Blow Gun

Ideal where a large air supply is available to move heavy, stubborn debris. Designed for, but not limited to, outdoor use. Compliant with OSHA Standard 1910.242 (B). *Safety glasses or shield must be worn when using any blow gun.*

SAFETY ALERT

- ¾" female NPT inlet
- minimum inlet pressure 90 PSI on ½" hose
- consumes 135 CFM at 100 PSI
- 48" long extension

Part #	Price/E
9000-48S	**$367.00**

Multi-Jet Cannon® Blow Gun

Ideal where a large air supply is available to move heavy, stubborn debris. Designed for, but not limited to, outdoor use. Compliant with OSHA Standard 1910.242 (B). *Safety glasses or shield must be worn when using any blow gun.*

SAFETY ALERT

- ¾" female NPT inlet
- minimum inlet pressure 90 PSI on ½" hose
- consumes 120 CFM at 100 PSI
- 2" long extension

Part #	Price/E
9000-MJ	**$383.00**

Heavy Duty - High Volume Blow Guns

- heavy duty - high volume safety blow guns
- requires high volume coupler and plug for optimum performance
- lightweight and ergonomic
- pistol grip / hanging hook handle
- made from high quality aluminum casting
- maximum operating pressure: **150 PSI**
- ¼" female NPT inlet
- *Safety glasses or shield must be worn when using any blow gun.* SAFETY ALERT

Blow Gun with Safety Tip

- reduced to 30 PSI when tip is blocked

Part #	Description	Price/E
HTBG	gun with *no* extension	**$62.75**
HTBG6	gun with 6" extension	**64.25**
HTBG12	gun with 12" extension	**67.00**
HTBG24	gun with 24" extension	**72.00**
HTBG36	gun with 36" extension	**79.00**

SAFETY ALERT Note: The safety air booster blow gun has a safety tip which prevents buildup of tip pressure in the event the outlet obstructed or "dead ended". It complies with the requirements for OSHA 1910.242 (B) and 1910.95 when used on air lines of 150 PSI or less.

Pistol Grip Safety Blow Gun

- conforms to U.S. Department of Labor, OSHA Standard 1910.242 (B) allowing a maximum of 30 PSI outlet pressure at the nozzle when dead-ended
- conforms to U.S. Department of Labor, OSHA Standard 1910.95 regulating noise level exposure
- conforms to Title 41, Walsh-Healy Rules and Regulations P50-204.8, Safety and Health Standards
- Contoured pistol-grip for safe, comfortable handling, even with greasy hands.
- convenient hang-up hook
- ¼" female NPT inlet
- *Safety glasses or shield must be worn when using any blow gun.* SAFETY ALERT

Part #	Price/E
PG700	**$55.90**

Extended Nozzle Pistol Grip Safety Blow Gun

- conforms to U.S. Dept. of Labor, OSHA Standard 1910.242 (B) allowing a maximum of 30 PSI outlet pressure at the nozzle when dead-ended
- conforms to U.S. Dept. of Labor, OSHA Standard 1910.95 regulating noise level exposure
- conforms to Title 41, Walsh-Healy Rules and Regulations P50-204.8 Safety and Health Standards
- Slender 4" extended nozzle allows access to hard to reach places and holes as small as .200".
- variable output trigger enables user to control air flow
- Hook design near trigger provides finger protection as well as easy storage.
- lightweight to help minimize user fatigue.
- Side holes allow air to escape if nozzle tip is dead-ended, thus preventing back pressure buildup.
- pressure rating: **150 PSI**
- ¼" female NPT inlet
- *Safety glasses or shield must be worn when using any blow gun.* SAFETY ALERT

Part #	Price/E
ENBG1	**$35.00**

Polyurethane Whip Hose

fittings included

- bright orange
- for use with jack hammers, chipping hammers, rock drills and other large pneumatic tools
- ½" male NPT swivels on each end
- abrasion resistant
- oil and grease resistant
- working pressure: **200 PSI** at **70°F**
- strain relief steel spring bend restrictors

Hose ID	Length	Male NPT	Part #	Price/E
½"	6'	½"	***PFD068***	**$130.00**

Tire Pressure Gauges and Accessories

Heavy Duty Tire Gauge

- 12" hose with swivel dual foot chuck inflator
- tapered chuck nut fits wheel cover holes on cars and light trucks
- calibrated in 2 PSI increments from **10** to **120 PSI**

Part #	Price/E
D101	**$100.20**

Passenger Car Tire Gauge

- 12" hose with straight-on chuck
- straight chuck nut fits wheel cover holes on cars and light trucks
- ideal for use on wells and reels
- calibrated in 2 PSI increments from **10** to **90 PSI**

Part #	Price/E
D150	**$74.50**

Professional Tire Pressure Gauge

- permanently lubricated
- easy to read, dual calibrated (PSI and kPa), four-sided nylon indicator bar
- body is made of chrome-plated brass, head is chrome-plated zinc
- pocket clip
- calibrated in 2 PSI increments from **10** to **50 PSI**

Part #	Price/E
DFG5	**$11.90**

Dual Foot Gauges

- heavy duty hang-up ring
- calibrated in 2 PSI increments from **10** to **130 PSI**

Part #	Price/E
DFG2	**$35.80**

- handy pocket clip
- calibrated in 2 PSI increments from **20** to **120 PSI**

Part #	Price/E
DFG1	**$17.40**

Brass Tire Inflator Chuck

- ball foot chuck
- for direct connection to live air only
- features a built-in shutoff valve (will not work on inflator gauges)
- ¼" NPT female thread
- maximum pressure is **300 PSI**

Part #	Price/E	Opt Qty
D104	**$7.90**	10

Ball and Push-On Ball Swivels

Ball Swivels

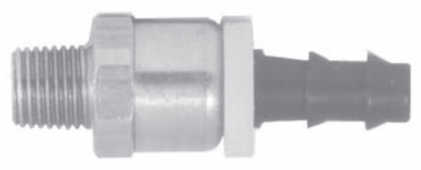

- brass and hardened steel construction
- O-ring seals
- wobble action for increased flexibility with air driven tools

Instrumentation Fittings

Applications:
- high pressure
- high temperature
- nitrogen
- helium
- flammable gases
- hydraulic gases
- corrosive media

Instrumentation fittings come completely assembled.

Installation Instructions:
1. Cut tubing squarely and clean tube end thoroughly to remove burrs.
2. Insert the tubing into the assembly making sure the tubing seats firm against the shoulder of the body and the nut is finger tight.
3. Tighten the nut with a wrench 1¼ turns, while holding the body with a second wrench.

Features:
- fully interchangeable with Swagelok® and Parker A-Lok® fittings
- double collet (ferrule) swaging action
- two positive seal points
- ASTM material construction
- material: 316 stainless steel
- temperature ratings: **-325°F** to **1200°F** (-198°C to 648°C)
- pressure ratings: see chart to the left
  Ratings listed are for reference only.

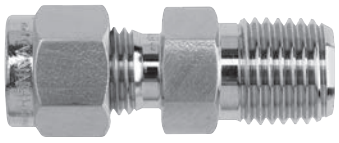

Safety Guidelines:
- Never connect, disconnect or remake a fitting with pressure in the system.
- Make sure all fittings are properly installed.
- It is not recommended to go beyond the pressure rating of the tubing. Elongation could occur in the tubing, shrinking the wall thickness and cause potential harm.
- For proper sealing it is recommended that the tubing and fittings be of like material.
- Always use proper thread lubricant and sealants on tapered pipe threads.
- Never bleed a system by loosening a fitting.

Brass SAE 45° Flare Fittings

Advantages:
- economical fitting resists mechanical pullout
- easy to disassemble and may be reassembled repeatedly, for a leak-proof connection
- manufactured from CA 360, CA 345, or CA377 brass
- manufactured especially for hard-to-hold liquids and gases

Specifications:
- Listed with Underwriter's Laboratories for flammable liquid, marine, refrigeration and gas applications. Meets functional requirements of SAE J512 and J513, ASA and MS (Military Standards).
- temperature range: **-65°F** to **250°F**

Applications:
- use with copper, brass, aluminum and welded steel hydraulic tubing that can be flared

Working Pressure Ranges:
Temperature and type of tubing used are important factors, the following table is a good guide for proper selection.
The PSI rating given is based on a temperature of **73°F** using copper tubing.

PSI	Tube OD	Tube Wall
1400	1/4"	.030
1000	3/8"	.032
750	1/2"	.032
650	5/8"	.035
550	3/4"	.035

Assembly Instructions:
1. Cut tubing squarely and clean tube end thoroughly to remove burrs.
2. Place nut onto tube. Place threaded end of nut toward end of tube.
3. Flare tube end with flaring tool to provide 45° flare. (flare tools are available, please contact the factory for pricing and availability)
4. Clamp tube flare between nut and nose of fitting body by screwing nut on finger-tight. Tighten with a wrench an additional ¼ turn for a metal-to-metal seal.

Long Nuts

- long nut offers additional vibration capacity
- reference SAE 010111

Brass Compression Fittings

Advantages:
- no flaring, soldering or other preparation of tubing necessary to assemble
- manufactured for low and medium pressure tubing connection work where excessive vibration or tube movement is not involved

Specifications:
Underwriter's Laboratories listed for flammable liquid. Compression fittings meet functional requirements of SAE J-512 and ASA.

Applications:
- use with copper, aluminum and Parflex thermoplastic tubing
- not recommended for steel tubing
- not recommended for application using gaseous media

Assembly Instructions:
1. Slide nut, then sleeve onto tubing. The thread end of the nut must face out.
2. Insert the tube into the fitting. Be sure the tube is bottomed on the fitting shoulder.
3. Assemble nut to body, and tighten hand-tight. Then follow the number of wrench turns as indicated in the table to the right.

Fitting Size	Tube Size	Turns required to seal from hand-tight

Brass Push-In Fittings

- Quick connect: simply push tubing in, no tools required. Saves up to 75% of assembly time versus the standard compression fittings.
- Quick disconnect: hold two fingers on insert and pull tubing out, no tools required.
- reusable: connect and disconnect numerous times
- Full flow design provides up to 60% more flow than conventional fittings with internal tube supports.
- positive seal: no leaks, after tubing is inserted, seal is made
- secure tube retention: pulling on tubing only serves to tighten the connection
- Pre-applied PTFE based pipe sealant on all male pipe threads saves customer additional labor.
- Working pressure: fittings are suitable for use up to the maximum working pressure of the plastic tubing used. also suitable for vacuum service
- working temperature: **-10°F** to **200°F**

* UNF - Straight thread, supplied with gasket.

Stainless Steel Legris Push-In Fittings

Suitable for many industries such as: chemical, food, packaging and medical.

Technical characteristics:
- working temperature: **-4°F** to **250°F**
- working pressure: **435 PSI** maximum
  Maximum circuit pressure depends equally on the type and diameter of the tube used. SAFETY ALERT
- no silicone
- conforms to FDA and 1934/2004 CE standards

Compatible with a range of tubes:
- semi-rigid nylon tube
- flexible polyurethane tube
- low density polyethylene
- PTFE tube FEP 140
- stainless steel and copper tube (when grooved)

Materials of construction:
- body - AISI 316 stainless steel
- backup washer - 316L stainless steel
- collet - 303L stainless steel
- seal - FKM O-ring
- Thread sealant does not come pre-applied on male threads, allowing the appropriate sealant for the application to be applied by the user.

Nickel-Plated Brass Legris Push-In Fittings

Technical characteristics and materials of construction:

- brass body with external and internal nickel plating
- chemical (electroless) nickel plated
- working temperature: **5°F** to **180°F**
- seal: Buna-N
- pressure: vacuum to **290 PSI**
  Maximum circuit pressure depends equally on the type and diameter of the tube used. SAFETY ALERT
- thread: length of threads in accordance with ISO 7.1 standards
- pre-applied thread sealant on all male NPT threads
- no silicone

Features and benefits:

- nickel-plated brass push-to-connect fitting
- tube compatibility: urethane, nylon, polyethylene, PTFE, metallic tubes (stainless steel and copper, when grooved)

Applications:

- A solution for pneumatic applications and fluids in aggressive environments where stainless steel is not necessary.
- various fluids: compressed air and fluids compatible with materials of construction
- typical industries: automotive, packaging, paper mills, wood working, factories with wash-down processes

Nylon/Nickel-Plated Brass Legris Push-In Fittings

- materials:
  - nickel-plated brass threads; black body is glass-filled nylon; Buna-N D seal; polypropylene release button; silicone free
- positive seal: sealing and holding is accomplished instantaneously
- reusable: connect and disconnect numerous times
- full flow: fitting seals on outside diameter of tubing
- working pressure: fittings rated to **290 PSI** at ambient temperature. *Maximum circuit pressure depends equally on the type and diameter of the tube used.* SAFETY ALERT
- working temperature: **-4°F** to **175°F**
- pre-applied thread sealant on all tapered male pipe threads
- compatible tubing: semi-rigid nylon, polyurethane and polyethylene tube
- vacuum capability: vacuum of 28" Hg (99% vacuum)

Gripping Ring Technology

Quick Connect and Disconnect:
- To connect, simply push tubing in.
- To disconnect, press the release ring towards the fitting and pull tubing out.
- No tools required.

Legris Composite Mini Ball Valves

Mini ball valves enable in-line opening and closing of a pneumatic circuit. Compact and lightweight, they are suited to all types of installations. Their screwdriver slot allows opening and closing even when access is difficult. The handle is differentiated by a blue color and marked with the corresponding pneumatic symbol in order to enable immediate identification by the user. 2-way, non-venting valve

Materials:
- nylon body
- nickel-plated brass ball

Technical specifications:
- suitable fluid: compressed air
- maximum pressure: **145 PSI**
- vacuum capability: vacuum of 28" Hg (99% of vacuum)
- working temperature: **-4°F** to **175°F**

Size	Part #	Price/E
5/32"	***79100400***	**$34.30**
1/4"	***79105600***	**33.20**

3/8"	***79106000***	**38.45**

Legris Quick Exhaust Valves

The quick exhaust valve can be used in all pneumatic equipment. It dramatically increases system efficiency and speed of a cylinder by purging cylinder air at the cylinder port rather than the control valve.

Materials:
- body: nickel-plated brass
- piston: polyurethane
- seals: nylon

Technical specifications:
- working pressure: **10 PSI** to **150 PSI**
- working temperature: **0°F** to **160°F**

NPT Thread	Part #	Price/E
1/8"	***79821111***	**$15.25**

1/2"	***79822222***	**32.45**

Legris Flow Control Valves

Push-to connect, unidirectional flow control valves, with one-piece design. Controls the speed of a cylinder by regulating air exhaust. Intake air flows freely through the flow control and exhaust air is metered out through a specially designed fine adjustment screw. Control pressure range: **15 PSI** to **145 PSI**. Temperature range: **30°F** to **160°F**.

Legris In-Line Flow Control Valves

Push-to connect flow control valve for use where cylinder access is difficult or another fitting is attached to the cylinder port. Stackable using 2 joining clips supplied, or panel mountable using existing holes.

Materials:
- body: nylon
- gripping ring: stainless steel
- adjustment screw: nickel-plated brass
- locking nut: nickel-plated brass

Technical specifications:
- working fluid: compressed air
- working pressure: **15 PSI** to **145 PSI**
- working temperature: **30°F** to **160°F**

Tube OD	Part #	Price/E	Pkg Qty

Legris Threaded In-Line Flow Control Valves

Threaded in-line flow control valves are unidirectional flow control valves. Intake air flows freely through the flow control; exhaust air is metered out through a specially designed adjustment screw. An arrow on the body of the valve indicates the direction of controlled flow. The valves may be installed as meter in or meter out devices.

Technical specifications:
- working fluid: compressed air
- working pressure: **15 PSI** to **145 PSI**
- working temperature: **30°F** to **160°F**

Materials:
- body: nylon with nickel plated brass thread
- adjustment screw: nickel-plated brass
- locking nut: nickel-plated brass
- threads: nickel-plated brass

1/2"	***77752222***	**74.70**

Legris Non-Return In-Line Check Valves

Allows air to pass in one direction while blocking flow in the other direction. A pressure of more than 7 PSI will overcome the spring pressure and allow flow. An arrow indicates free flow direction. Maximum working pressure: **145 PSI** at ambient temperature (70°F)

Tube OD	Part #	Price/E	Pkg Qty
5/32"	***79960400***	**$25.75**	10
6mm	***79960600***	**26.60**	10

5/16"	***79960800***	**33.25**	10

Legris In-Line Check Valves

These in-line check valves allow air to pass in one direction while blocking flow in the other direction. Their extreme compactness and light weight make them suitable as a safety item in compressed air circuits. The body of the fitting contains an arrow to indicate the direction of flow. A pressure of more than 7 PSI will overcome the spring pressure, which is keeping the valve closed, thus allowing the passage of air. Meter out check valve.

Technical specifications:
- working pressure: **15 PS**I to **145 PSI** at ambient temperature (70°F)

Materials:
- body: nylon with nickel plated brass base
- pre-applied thread sealant on tapered threads

* UNF - Straight thread, supplied with gasket

Stainless Steel Legris Uni-Directional Check Valves

Stainless steel valve blocks the fluid passage when the pressure differential is lower than 3.6 PSI.

Technical specifications:
- working pressure: **7 PSI** to **580 PSI**
- working temperature: **-4°F** to **360°F**

Materials:
- body: 316L stainless steel
- shut-off valve: 316L stainless steel
- return spring: 302 stainless steel
- seals: Viton®

Tubing

Polyurethane Tubing

- naturally transparent
- temperature range: **-40°F** to **165°F** (working pressure given at 75°F)
- designed for use with the push-in fittings sold on pages 163-170
- excellent memory, flexibility and resistance to kinking
- good resistance to fuels and oils
- low gas and vapor permeability
- high compressive strength
- low compressive set and extractability levels
- outstanding abrasion resistance

Polyethylene Tubing

- designed for FDA applications
- temperature range: **-50°F** to **140°F** (working pressure given at 70°F)
- designed for use with the push-in fittings sold on pages 163-170
- flexible, lightweight, low-density polyethylene (LDPE) tubing
- for use with plastic or metal inserts with outer sleeve; ferrule or clamps
- formulated to resist stress cracking

Polyurethane - 95 Durometer Tubing

Polyurethane tubing has high flexibility and a small bend radius and thus is very good for applications where space is tight. For applications where the tubing will be exposed black tubing is recommended.

- working temperature: **-40°F** to **165°F** (working pressure given at 75°F)

Fluoropolymer FEP 140 Tubing

Fluoropolymer tubing is of food quality and provides excellent resistance to aggressive and corrosive agents as well as high temperatures.

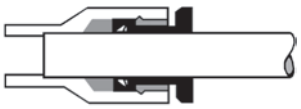

- FDA compliant materials
- maximum working temperature: **300°F** (working pressure given at 75°F)

Size OD	Size ID	Wall Thickness	Working Pressure at 75°F	Length	Clear Part #	Clear Price/Length

Metric Push-In Fittings

- materials:
  - nickel-plated brass threads; black body is glass-filled nylon; Buna-N D seal; polypropylene release button; silicone free
- positive seal: sealing and holding is accomplished instantaneously
- reusable: connect and disconnect numerous times
- full flow: fitting seals on outside diameter of tubing
- working pressure: fittings rated to **290 PSI** at ambient temperature
- working temperature: **-4°F** to **175°F**
- pre-applied thread sealant on all tapered male pipe threads
- compatible tubing: semi-rigid nylon, polyurethane and polyethylene tube
- vacuum capability: vacuum of 28" Hg (99% vacuum)

Gripping Ring Technology

Quick Connect and Disconnect:
- To connect, simply push tubing in.
- To disconnect, press the release ring towards the fitting and pull tubing out.
- No tools required.

D.O.T. Push-In Fittings

- materials of construction:
  - body is composite; brass collet; stainless steel tube support; threads are brass
  - Buna-N O-ring
- pressure range: up to **250 PSI** at ambient temperature
- working temperature: **-40°F** to **200°F**
- suitable fluids: compressed air only (lubricated or non-lubricated)
- complies with the performance requirements of D.O.T FMVSS 571.106 (SAE J1131) and SAE J2494-3
- *These fittings are designed for use on all pneumatic circuits other than air brake assemblies between the frame and axle or between towed and towing vehicle.* SAFETY ALERT

Air Brake Fittings

Compression style air brake fittings utilizes ribbed sleeve for compression and positive grip.

- materials: machined from CA360, CA345, or CA377 brass
- pre-applied thread sealant (Loctite Vibra-Seal 516) on all male pipe threads
- working pressure: **150 PSI** maximum
- working temperature: **-40°F** to **200°F**
- compatible tubing: SAE J844 type A and B
- specifications: meets D.O.T FMVSS 571.106 and SAE J1131, and SAE J2494
- *These fittings are designed for use in air brake systems or in cab controls.*

Assembly Instructions:

1. Cut tubing squarely - maximum of 15° angle allowable.
2. Check that port or mating part is clean and free of debris.
3. Insert tubing into fittings until it bottoms on seat.
4. Tighten nut with wrench until one thread remains visible on the fittings body; (this will allow for a number of remakes) or, the nut should be screwed down finger tight, then wrench-tightened as indicated in the chart below.

Wilkerson Miniature Regulators

- 2-125 PSI adjusting range
- balanced valve design
- self-relieving standard
- non-rising push/pull locking adjustment knob
- two 1/8" NPT gauge ports standard on models without gauge, one 1/8" NPT gauge port standard on models with gauge - can be used for additional outlet ports.
- models supplied without gauge use a GC620 gauge.
- panel mount nuts sold separately
- maximum operating conditions:
  300 PSIG (20.17 bar) and **32°F** to **125°F** (0°C to 52°C)

Wilkerson Miniature Combination Units
(Filter, Regulator, Lubricator)

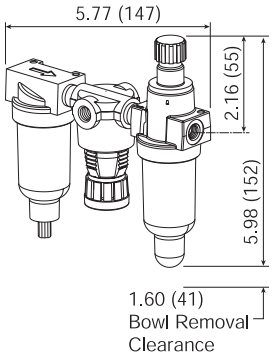

- maximum operating conditions:
  transparent bowl: **150 PSIG** (10.3 bar) and **32°F** to **125°F** (0°C to 52°C)
  metal bowl: **250 PSIG** (17.2 bar) and **32°F** to **175°F** (0°C to 80°C)

Filter series F03:
- 5 micron element
- .5 oz. bowl

Regulator series R03:
- 2-125 PSI adjusting range
- balanced valve design
- self-relieving
- supplied with a GC620 gauge
- Regulator can be mounted with knob in up or down position.

Lubricator series L03:
- 1 oz. bowl
- adjustable oil feed
- full view sight dome

Included components:
- (2) adapters

SAFETY ALERT

SCFM ratings at 150 PSIG inlet pressure.

Wilkerson Manual In-Line Desiccant Dryers

Manual air dryers are used to remove water vapor from compressed air systems, in applications such as paint spraying, laboratory instruments and small control air systems. Filtration for absorber type dryers is important to protect the desiccant bed from contamination. Cleaner incoming air will result in better performance, longer life and fewer service problems. To regenerate silica gel desiccant, it must be heated to at least 350°F for approximately 3 hours or until color has changed from pink to blue. Allow desiccant to cool to room temperature before pouring back into unit bowl.

SAFETY ALERT An after-filter should be placed downstream from the desiccant dryer to ensure solid contaminants such as desiccant dust do not migrate downstream.

with metal bowl

- 1.64 lb. bowl
- will dry up to 4400 standard cubic feet of air
- desiccant is good for approximately 440 minutes at maximum continuous air flow before regeneration is required
- silica gel changes from blue to pink to indicate the need to replace or regenerate the desiccant
- slotted bowl guard for visual detection of color change
- no electrical connection necessary
- provides atmospheric dew point of -45°F with dry desiccant at **100 PSI** and **70°F**
- maximum operating conditions:
  transparent bowl: **150 PSIG** (10 bar) and **125°F** (52°C)
  metal bowl: **150 PSIG** (10 bar) and **150°F** (66°C)

See page 208 for silica gel refill.

Wilkerson Dial Air Regulators

Dial-air regulators feature a transparent, pressure-calibrated, non-rising adjustment dial for quick adjustment of secondary pressure. The full reduced pressure range can be dialed in less than 270° of dial rotation. This feature is particularly advantageous if secondary pressure must be changed frequently. Dial air regulators can be mounted in any position so dial face is always visible. All dial-air units have a slight constant air bleed.

- 0-160 PSI adjusting range
- balanced valve design
- relieving type
- non-rising pressure adjusting dial
- piston operated
- two ¼" NPT gauge ports standard on models without gauge, one ¼" NPT gauge port standard on models with gauge - can be used for additional outlet ports.
- models supplied without gauge use a GC230 gauge
- maximum supply pressure: **300 PSIG** (20.7 bar)
- operating temperature: **32°F** to **150°F** (0°C to 65.5°C)

Wilkerson High Flow Regulators

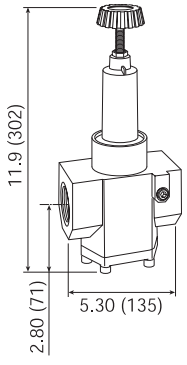

- 0-125 PSI adjusting range
- self-relieving standard
- piston operated
- can be installed with the adjusting knob in any position
- To increase regulated pressure, pull adjusting knob up and turn clockwise. To reduce pressure, turn knob counter clockwise.
- two ¼" NPT gauge ports standard on models without gauge, one ¼" NPT gauge port standard on models with gauge - can be used for additional outlet ports
- models supplied without gauge use a GC230 gauge
- maximum operating conditions:
  300 PSIG (20.7 bar) and **32°F** to **150°F** (0°C to 65.5°C)

SAFETY ALERT

FRL's are designed for air service only, unless otherwise indicated.

SCFM ratings at 100 PSIG inlet pressure.

Wilkerson Compact Filter / Regulators

Over-under units are space savers and provide for installation in tight areas. One common inlet/outlet for both filter and regulator saves on piping costs.

- 0-125 PSIG adjusting range
- 5 micron reusable element
- 5 oz. bowl
- self-relieving standard
- diaphragm operated
- quick-disconnect bowl guard with integral plastic bowl and safety latch standard
- Two ¼" gauge ports are provided in either side of the regulator body for installation of a gauge or to use as an additional outlet port. Plug unused port(s).
- supplied with GC230 gauge
- maximum operating conditions:
  transparent bowl: **150 PSIG** (10.3 bar) and **32°F** to **125°F** (0°C to 52°C)
  metal bowl: **200 PSIG** (13.8 bar) and **32°F** to **150°F** (0°C to 65.5°C)

SCFM ratings at 100 PSIG inlet pressure.

Wilkerson EconOmist® Type Lubricators

Designed so that all the oil flow observed in the sight dome is broken into a mist and delivered via the airflow to the application. The oil in the bowl can be filled or replenished without interrupting airflow or bleeding pressure from the system. Once the oil-fill cap is removed, the bowl is depressurized and isolated from line pressure, and the bowl itself can then be removed for faster refill, if desired. The bowl can be filled right to the top.

with metal bowl

- 5 oz. bowl
- full view sight dome
- fill under pressure design
- maximum operating conditions:
  transparent bowl: **150 PSIG** (10.3 bar) and **32°F** to **125°F** (0°C to 52°C)
  metal bowl: **200 PSIG** (13.8 bar) and **32°F** to **150°F** (0°C to 65.5°C)

SAFETY ALERT

FRL's are designed for air service only, unless otherwise indicated.

SCFM ratings at 150 PSIG inlet pressure.

Wilkerson Lubricators

Flow Guide®

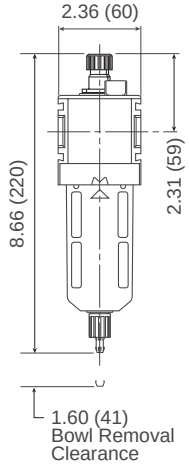

The elastomer disc-shaped device is located in the throat of all Wilkerson lubricators and automatically maintains a constant ratio of oil flow to airflow regardless of changing rates of airflow. This allows one lubricator to serve several pneumatic components operating together or intermittently.

Type of oil to use:

For all Wilkerson lubricators, use any petroleum-base, non-detergent light weight oil (SAE 10/150SSU) which will readily break up into a mist, i.e., Mobil DTE light or comparable oil. Do not use any synthetic oil or oils containing additives or solvents. See page 136 for air tool lubricants.

Wilkerson EconOmist® Compact Lubricators

- 4.09 oz. bowl
- manual drain
- high flow capacity
- can be filled under pressure
- To adjust and set oil delivery rate the unit must be pressurized and air must be flowing through the unit. Turn the sight dome, located on the top of the unit, counter clockwise to initiate oil delivery. If flow increases or decreases, the oil delivery rate will increase or decrease proportionally. Turning the sight dome clockwise will stop all oil delivery.
- maximum operating conditions:
  transparent bowl: **150 PSIG** (10.3 bar) and **32°F** to **125°F** (0°C to 52°C)
  metal bowl: **250 PSIG** (17.2 bar) and **32°F** to **150°F** (0°C to 65.5°C)

- 10 oz. bowl

Regulator series R26:
- 0-125 PSI adjusting range
- self-relieving
- supplied with a GC230 gauge

Lubricator series L26:
- 10 oz. bowl
- adjustable oil feed
- full view sight dome

Included components:
- (2) modular sleeves
- (2) mounting brackets (sleeve and bracket)
- (2) end blocks

SAFETY ALERT

FRL's are designed for air service only, unless otherwise indicated.

SCFM ratings at 150 PSIG inlet pressure.

Wilkerson Standard Combination Units

- modern design and appearance
- quick disconnect bowl / bowl guard

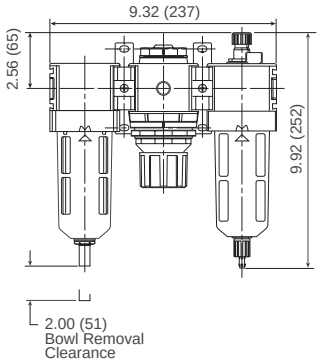

- maximum operating conditions:
  transparent bowl: **150 PSIG** (10.3 bar) and **32°F** to **150°F** (0°C to 65.5°F)
  metal bowl: **250 PSIG** (17.2 bar) and **32°F** to **150°F** (0°C to 65.5°F)

Filter series F28:
- 5 micron element
- 6 oz. bowl

Regulator series R28:
- 0-125 PSI adjusting range
- self-relieving
- supplied with a GC230 gauge

Lubricator series L28:
- 6.11 oz. bowl
- adjustable oil feed
- full view sight dome

Included components:
- (2) end blocks
- (2) mounting brackets with joiner set and port O-ring

FRL's are designed for air service only, unless otherwise indicated.

SAFETY ALERT

SCFM ratings at 120 PSIG inlet pressure.

Wilkerson Combination Unit with Protective Frame

Provides downstream air preparation with protective frame and includes components:

- *C31-08AMB* 1" FRL with metal bowls and auto drain filter
- *BBLV100* 1" brass ball valve and *AM12* air king on inlet port
- *BBV100DTW* 2-way ball valve installed between regulator and lubricator provides option for non-lubricated air
- heavy duty frame protects air prep components
- operating conditions:
  maximum pressure: **250 PSIG**
  temperature range: **40°F** to **150°F**
  SCFM: 320

FRL with protective frame

Size	Part #	Price/E
1"	***C31-08FRAME***	**$1840.00**

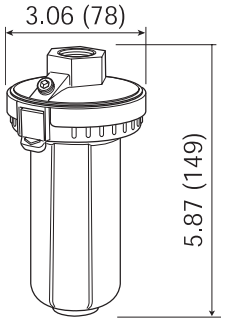

SAFETY ALERT

FRL's are designed for air service only, unless otherwise indicated.

Wilkerson Automatic Drain

As liquid contaminants collect in the bowl, they raise a closed-cell cellular float. When the liquid level reaches a given point, the float triggers a mechanism which pilots line pressure against a large area piston or diaphragm which snaps open the drain valve. The contaminants are discharged from the drain orifice at line pressure. As the liquid level falls, the pilot valve closes, line pressure against the piston/diaphragm returns to atmosphere and the drain valve snaps closed. A 1/8" NPT drain discharge orifice allows the liquid discharge to be piped to a container or sewer.

- 5 oz. bowl
- fully automatic, float operated
- full ½" NPT drain inlet
- quick-disconnect clamp ring for easy bowl removal when servicing
- no electrical connections
- easily installed
- maximum operating conditions:
  transparent bowl: **150 PSIG** (10.3 bar) and **32°F** to **125°F** (0°C to 52°C)
  metal bowl: **200 PSIG** (13.8 bar) and **32°F** to **150°F** (0°C to 65.5°C)

Wilkerson Automatic Drain Valve

Automatically drains liquid water and oil from compressed air receivers and systems. Drain valve automatically opens and closes every time the system pressure drops approximately 10 to 20 PSIG (0.7 to 1.4 bar) during the compressor cycle. An internal piston design, which utilizes no floats, minimizes the risks associated with drain failures.

- for up to 100 HP compressors
- maximum pressure: **200 PSIG** (13.5 bar)
- temperature range: **32°F** to **150°F** (0°C to 65.5°C)
- minimum differential pressure required: 20 PSIG (1.4 bar)
- inlet/outlet ports: ¼" NPT (F)
- screen adapter: 3/8" NPT (M) inlet, ¼" NPT (M) outlet

Size	Part #	Price/E
1/4"	***X51-02***	**$134.85**

FRL's are designed for air service only, unless otherwise indicated.

Modular Sleeve with Wall Mounting Brackets

- Designed for mounting a single unit or combination of units directly to the wall.
- The sleeve and mounting bracket can be ordered assembled from the factory, or just the mounting bracket alone to be used on existing modular sleeves.

Used On	Description	Part #	Price/E
F16, F26	bracket	***GPA-95-968***	**$14.40**
	sleeve and bracket	***GPA-95-969***	**32.45**

GPA-95-969

Wilkerson Filter Accessories

Modular Sleeve

GPA-95-292

- Unique modular sleeve design easily and quickly connects one or more units and accessories together without pipe nipples.
- Hand tightening the threaded pin provides a tight seal between the units.

Used On	Description	Part #	Price/E
F16, F26	modular sleeve	***GPA-95-292***	**$17.00**

End Blocks

GPA-97-019

- When used with the modular sleeve, end blocks allow a single unit or a combination of units to be piped into the air system in the modular mode.
- allows ease of unit servicing or replacement without disturbing the air line connections
- set of 2 blocks (inlet and outlet)

Used On	Description	Part #	Price/E
F08	end block set, 1/4" NPT	***GPA-97-019***	**$35.80**
	end block set, 3/8" NPT	***GPA-97-020***	**35.80**

Modular Blocks

GPA-95-919

Manifold Block

- allows easy design flexibility
- can be installed after the filter or regulator, providing three additional ¼" NPT tapped auxiliary ports
- inlet/outlet ports are 1/2" non-tapped
- 1-17/32" width

End Block

- When used with the modular sleeve, end blocks allow a single unit or a combination of units to be piped into the air system in the modular mode.
- allows ease of unit servicing or replacement without disturbing the air line connections
- set of 2 blocks (inlet and outlet)

GPA-95-321

Wilkerson Filter Accessories

Modular Shut-Off Valves

- can be installed immediately upstream of a single unit or combination of units
- secured to the unit with a modular sleeve or modular sleeve wall mounting bracket
- ball-type valve operates with a 1/4 turn from open to shut position
- useful for isolating and depressurizing a downstream unit requiring maintenance or replacement
- can be locked in the open position
- left to right flow

GPA-95-098

Used On	Description	Part #	Price/E
F16, F26	1/4" NPT safety shut-off valve	***GPA-95-096***	**$135.85**
	3/8" NPT safety shut-off valve	***GPA-95-097***	**135.85**
	1/2" NPT safety shut-off valve	***GPA-95-098***	**135.85**

Differential Pressure Indicators

- used to replace damaged indicators on filters and modular coalescing filters
- Pressure loss changes color of indicator window from green to red.

R18, R28	end block, 1/4" NPT	***GPA-96-610***	**27.80**
	end block, 3/8" NPT	***GPA-96-611***	**27.80**
	end block, 1/2" NPT	***GPA-96-612***	**27.80**
	end block, 3/4" NPT	***GPA-96-613***	**27.80**
	end block, G1/4"	***GPA-96-620***	**29.90**
	end block, G3/8"	***GPA-96-621***	**29.90**
	end block, G1/2"	***GPA-96-622***	**29.90**
	end block, G3/4"	***GPA-96-623***	**29.90**

GPA-96-610

Modular Adapters

- When used with the modular sleeve, adapter inserts allow a single unit or a combination of units to be piped into the air system in the modular mode.
- allows ease of unit servicing or replacement without disturbing the air line connections
- set of 2 blocks

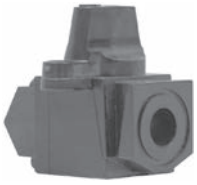

GPA-95-037

Used On	Description	Part #	Price/E
R16, R26	1/4" NPT pipe adapter	***GPA-95-035***	**$43.50**
	3/8" NPT pipe adapter	***GPA-95-036***	**43.50**
	1/2" NPT pipe adapter	***GPA-95-037***	**43.50**

Modular Shut-Off Valves

- can be installed immediately upstream of a single unit or combination of units
- secured to the unit with a modular sleeve or modular sleeve wall mounting bracket
- ball-type valve operates with a 1/4 turn from open to shut position
- useful for isolating and depressurizing a downstream unit requiring maintenance or replacement
- can be locked in the open position
- left to right flow

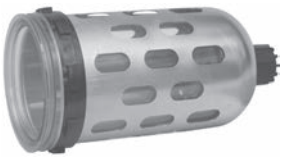

GPA-95-098

Used On	Description	Part #	Price/E
R16, R26	1/4" NPT safety lock-out valve	***GPA-95-096***	**$135.85**
	3/8" NPT safety lock-out valve	***GPA-95-097***	**135.85**
	1/2" NPT safety lock-out valve	***GPA-95-098***	**135.85**

see page 254 for replacement gauges

Wilkerson Lubricator Accessories

Modular Sleeve with Wall Mounting Brackets

- Designed for mounting a single unit or combination of units directly to the wall.
- The sleeve and mounting bracket can be ordered assembled from the factory, or just the mounting bracket alone to be used on existing modular sleeves.

GPA-95-969

Used On	Description	Part #	Price/E
L16, L26	bracket	***GPA-95-968***	**$14.40**
	sleeve and bracket	***GPA-95-969***	**32.45**

Modular Sleeve

- Unique modular sleeve design easily and quickly connects one or more units and accessories together without pipe nipples.
- Hand tightening the threaded pin provides a tight seal between the units.

GPA-95-292

Used On	Description	Part #	Price/E
L16, L26	modular sleeve	***GPA-95-292***	**$17.00**

End Blocks

- When used with the modular sleeve, end blocks allow a single unit or a combination of units to be piped into the air system in the modular mode.
- allows ease of unit servicing or replacement without disturbing the air line connections
- set of 2 blocks (inlet and outlet)

GPA-97-019

Used On	Description	Part #	Price/E
L08	end block set, 1/4" NPT	***GPA-97-019***	**$35.80**
	end block set, 3/8" NPT	***GPA-97-020***	**35.80**

Modular Blocks

Manifold Block

- allows easy design flexibility
- can be installed after the filter or regulator, providing three additional ¼" NPT tapped auxiliary ports
- inlet/outlet ports are 1/2" non-tapped
- 1-17/32" width

End Block

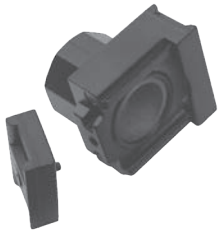

- When used with the modular sleeve, end blocks allow a single unit or a combination of units to be piped into the air system in the modular mode.
- allows ease of unit servicing or replacement without disturbing the air line connections
- set of 2 blocks (inlet and outlet)

GPA-95-919

GPA-95-321

GPA-96-610

Used On	Description	Part #	Price/E

Wilkerson FRL Display

Increase your sales with this heavy duty, point-of-purchase Dixon FRL Display, designed to highlight the features and benefits of a modular Filter-Regulator-Lubricator Combination Unit for air line services. The display is perfect for your "Will Call" or showroom sales area.

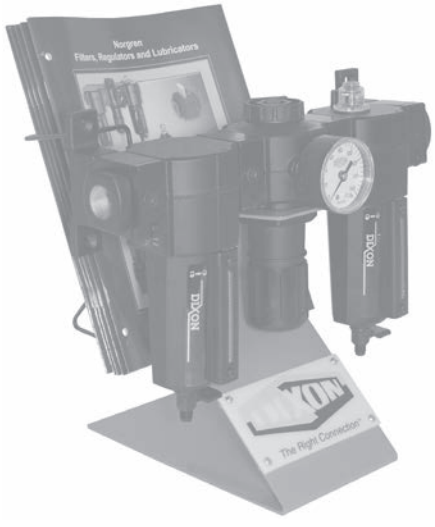

The display features:
- FRL combination unit with standard metal bowl with sight glass
- manual drain
- modular mounting clamps
- pipe adapters

Note: assembly is required.

Part #	Price/E
WILK26DISPLAY	**$808.40**

Series 1 FRL Display

Increase your sales with this heavy duty, point-of-purchase Dixon FRL Display, designed to highlight the features and benefits of a modular Filter-Regulator-Lubricator Combination Unit for air line services. The display is perfect for your "Will Call" or showroom sales area.

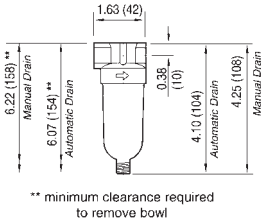

The display features:
- 74 Series basic combination unit with metal bowl with sight glass
- manual drain
- modular mounting clamps
- pipe adapters

Note: assembly is required.

Part #	Price/E
NORG74DISPLAY	**$802.35**

Norgren Series 1 Carded Miniature FRL's

Dixon offers the Series I line of miniature filters, filter/regulators, regulators and lubricators in prepackaged clear plastic units suitable for hanging on store peg racks or displays. The primary features of each unit are printed on the packaging. Each package contains 1 miniature filter, filter/regulator, regulator or lubricator and instruction sheet.

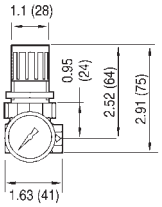

- 5 micron element
- 1 oz. reservoir
- inlet pressure **150 PSI** maximum at ambient temperature (70°F)

SAFETY ALERT

FRL's are designed for air service only, unless otherwise indicated.

SCFM ratings at 100 PSIG inlet pressure.

Norgren Series 1 Oil Removal (Coalescing) Filters

** Minimum clearance required to remove bowl.

- in-line or modular installation
- quick-release bayonet bowl
- prismatic lens liquid level indicator
- provides air quality class 2 hydrocarbon and class 1 particulate removal per ISO 8573-1
- element removes particles down to 0.01mm. Maximum remaining oil content of air leaving the filter is 0.01 ppm at 70°F (21°C) with an inlet concentration of 8 ppm
- service life indicator turns from green to red when element needs to be replaced
- For maximum service life install a general purpose filter upstream of the oil removal filter.

Norgren Series 1 Oil Vapor Removal Filters

† Minimum clearance required to remove bowl.

- in-line or modular installation
- quick-release bayonet bowl
- Activated carbon cartridge filter element absorbs oil vapors and removes most hydrocarbon odors.
- provides air quality class 1 particulate removal per ISO 8573-1, when used with the F74C series
- Filter and element designs optimizes air velocity and contact time to reduce oil content of air leaving the filter to 0.003 ppm at 70°F (21°C).
- Minimum service life of 400 hours can be expected if the vapor removal filter is protected upstream by an oil removal (coalescing) filter and if the filtration temperature is in the region of **70°** to **80°F** (21° to 26°C). Above this range, oil vapor content of compressed air increases substantially and element service life is reduced.
- Carbon cartridge element provides long service life.
- For maximum service life install a general purpose filter and an oil removal filter upstream of the oil vapor removal filter.

FRL's are designed for air service only, unless otherwise indicated. SAFETY ALERT

SCFM ratings at 100 PSIG inlet pressure.

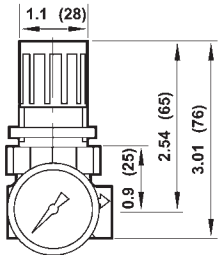

Norgren Series 1 Miniature Water Regulator

Designed for use with deionized water and potable water systems. Plastic and metals in contact with fluid are approved by the National Sanitation Foundation (NSF) or the Food and Drug Administration (FDA) for use in potable water systems. Elastomers are food grade.

- non-relieving type
- models supplied with GC620 gauge

Port Size	GPM	with Gauge	
		Part #	Price/E
1/4"	1.75	***R91-221RG***	**$83.15**

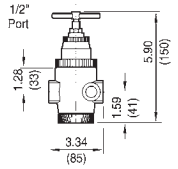

Norgren Series 1 Water Regulators

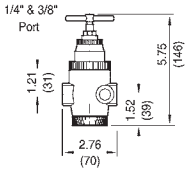

Used in water systems to reduce and maintain pressure at a nearly constant level despite changes in the inlet pressure and changes in downstream flow requirements. Brass body and aluminum bonnet.

- 5-125 PSI range
- inlet pressure: **400 PSI** at ambient temperature (70°F)
- T-handle adjustment
- non-relieving type
- gauge port is full-flow and can be used as an outlet port
- models supplied with GC230 gauge

Port Size	GPM	with Gauge

SAFETY ALERT

SCFM ratings at 100 PSIG inlet pressure.

Norgren Series 1 Micro-Fog Lubricators

- Micro-fog lubricators, identified by a red adjusting screw, are used for applications containing one or more points of lubrication, cylinders and multiple or single tools.
- Air flow through the lubricator lifts oil from the reservoir to the sight-feed dome. Oil is dropped into the fog generator and atomized into a fine mist. Lightweight particles are delivered downstream for lubrication. Heavier particles fall back into the reservoir.
- The micro-fog lubricator delivers 10% of the oil drops visible through the transparent sight-feed dome.
- *Micro-fog lubricators cannot be filled under pressure.* SAFETY ALERT

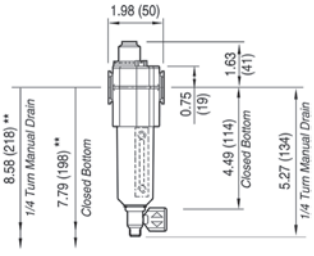

with transparent bowl

- 2 oz. reservoir
- in-line or modular installation
- quick release bayonet bowl
- micro-fog design delivers aerosol mist
- recommended lubricants: misting type oil rated 50 to 200 SSU (ISO Grade 7 to 46) at 100°F
- maximum operating conditions: transparent bowl: **150 PSI** and **125°F** metal bowl: **250 PSI** and **175°F**

FRL's are designed for air service only, unless otherwise indicated. SAFETY ALERT

SCFM ratings at 100 PSIG inlet pressure.

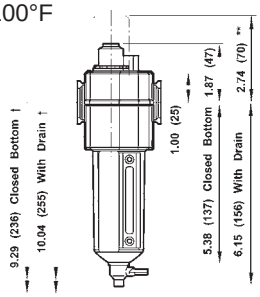

Norgren Series 1 Micro-Fog Lubricator with Pyrex® Sight Feed Dome

- Designed for use with alcohol or other anti-freeze agents when units are installed in cold temperature environments.
- Pyrex® sight feed dome with aluminum case and fluorocarbon O-Rings and seals; Pyrex® sight glass on bowls and metal petcock drain.
- Micro-fog lubricators, identified by a red adjusting screw, are used for applications containing one or more points of lubrication, cylinders and multiple or single tools.
- Air flow through the lubricator lifts oil from the reservoir to the sight-feed dome. Oil is dropped into the fog generator and atomized into a fine mist. Lightweight particles are delivered downstream for lubrication. Heavier particles fall back into the reservoir.
- The micro-fog lubricator delivers 10% of the oil drops visible through the transparent sight-feed dome.
- *Micro-fog lubricators cannot be filled under pressure.* SAFETY ALERT

metal bowl

- 4 oz. reservoir
- in-line or modular installation
- quick release bayonet bowl
- micro-fog design delivers aerosol mist
- recommended lubricants: misting type oil rated 50 to 200 SSU (ISO Grade 7 to 46) at 100°F
- inlet pressure: **250 PSI**
- maximum temperature: **175°F**

SAFETY ALERT *FRL's are designed for air service only, unless otherwise indicated.*

SCFM ratings at 100 PSIG inlet pressure.

Norgren Series 1 Oil-Fog Lubricators

- Oil-fog lubricators, identified by a green adjusting screw, are used for lubricating a single air tool or air motor, and are located as near the device as possible.
- All the oil visible dropping through the transparent sight-feed dome goes to the airstream.
- L72C, L73C and L74C OIL-FOG lubricators can be filled under pressure.

- 2 oz. reservoir
- in-line or modular installation
- quick release bayonet bowl
- micro-fog design delivers aerosol mist
- can be filled under pressure
- recommended lubricants: misting type oil rated 50 to 200 SSU (ISO Grade 7 to 46) at 100°F
- maximum operating conditions: transparent bowl: **150 PSI** and **125°F** metal bowl: **250 PSI** and **175°F**

SAFETY ALERT

FRL's are designed for air service only, unless otherwise indicated.

SCFM ratings at 100 PSIG inlet pressure.

Norgren Series 1 Combination Units

- These units are intended for use in industrial compressed air systems only. Not for use with fluids. They must not be used where pressure or temperature may exceed maximum rated operating conditions.
- Combination Units are supplied with micro-fog lubricators.
- The polycarbonated plastic bowls used on these units can be damaged and possibly burst if exposed to such substances as certain solvents, strong alkalies, compressor oils that contain ester-based additives or synthetic oils. Fumes of these substances in contact with the polycarbonate bowl, externally or internally, can also result in damage. Use metal bowl in applications where a plastic bowl might be exposed to substances that are incompatible with polycarbonates. Clean with warm water only.

SAFETY ALERT

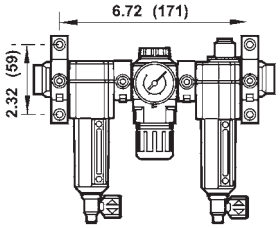

- 5-125 PSI range
- 1 oz. reservoir
- inlet pressure **150 PSI** maximum at ambient temperature (70°F)
- models supplied with a GC620 gauge

Desiccant Compressed Air Dryers

- Compressed air dryers help to eliminate condensation at the point of use. A replaceable element filters outlet air to help prevent desiccant dust migration downstream.
- Silica gel desiccant changes color from blue to pink when desiccant replacement is needed. Desiccant can be dried and reused by heating to 275°F, or replaced. Moisture indicator on top of body.
- An after filter should be placed downstream from the desiccant dryer to ensure solid contaminants such as desiccant dust do not migrate downstream.

7 oz. reservoir:
- uses 1 gel packet
- nominal air drying capacity 750 cubic feet at 100 PSI and 77°F
- maximum inlet pressure: **150 PSI**

F74	O-rings, seals, and gaskets	***4380-700***	**14.35**

Norgren Series 1 Regulator Accessories

Replacement Springs

4432-02

Used On	Description	Part #	Price/E
R72	5-60 PSI	***4232-02***	**$15.60**
	5-150 PSI	***4232-03***	**13.55**
R73	5-60 PSI	***4432-01***	**15.60**
	5-150 PSI	***4432-02***	**15.60**
R74	5-60 PSI	***4332-01***	**13.80**
	5-150 PSI	***4332-02***	**13.80**

Tamper Resistant Cover and Seal Wire

tamper resistant cover

- helps prevent unauthorized adjustment to the pressure setting
- cover can be locked in place with up to four padlocks
- installs on adjusting knob

Used On	Description	Part #	Price/E
R72	tamper proof kit	***4255-51***	**$16.95**
R73	tamper proof kit	***4455-51***	**22.20**
R74	tamper proof kit	***4355-51***	**22.50**

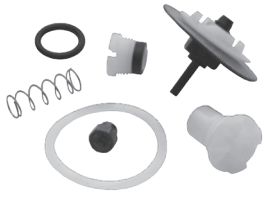

Panel Nuts

panel nut

Used On	Description	Part #	Price/E
R07	plastic panel nut	***2962-89***	**$8.45**
R08	plastic panel nut	***5191-89***	**16.40**
R17	metal panel nut	***5226-97***	**35.60**
R22	stainless steel panel nut	***5988-02***	**106.50**
R72	plastic panel nut	***4248-89***	**10.40**
R73	zinc panel nut	***5191-88***	**11.95**
R74	zinc panel nut	***4348-89***	**10.25**

Repair Kits

3407-01

4381-700

Used On	Description	Part #	Price/E
R06	diaphragm, relieving	***3407-01***	**$29.35**
R07	diaphragm, relieving	***3407-02***	**29.35**
R08	diaphragm, relieving	***5298-14***	**70.95**
R11	diaphragm, relieving	***529-03***	**113.50**
R17	diaphragm, relieving	***5578-02***	**102.15**
R18	seal kit only	***5945-40***	**34.15**
R72	diaphragm, relieving	***4381-500***	**25.00**
R73	diaphragm, relieving	***4381-600***	**37.70**
R74	diaphragm, relieving	***4381-700***	**43.65**

Norgren Series 1 Regulator Accessories

Mounting Brackets

Used On	Description	Part #	Price/E
R07	mounting bracket with plastic panel nut	***18-025-003***	**$18.20**
R08	mounting bracket with plastic panel nut	***5203-06***	**32.35**
R17	mounting bracket with plastic panel nut	***5570-04***	**45.50**
R22	mounting bracket	***18-001-962***	**85.70**
	mounting bracket with panel nut	***18-001-959***	**272.20**

18-025-003

5203-06

Wall Mounting Brackets

- For use instead of quick-clamps and pipe adapters to secure to a wall, machine panel or other flat surface
- Use close nipples to connect combination unit and then place in bracket.

Used On	Description	Part #	Price/E
R72	wall mounting bracket for all R72 series	***4224-50***	**$20.70**
R73	wall mounting bracket for all R73 series	***4424-50***	**19.25**
R74	wall mounting bracket for all R74 series	***4324-50***	**25.50**

4324-50

Quick Clamps and Brackets

Quick-clamp

- provides modular installation capability
- flanges on the products slide into V grooves in clamp
- face-sealing O-rings provide a positive seal when clamp is closed and screw tightened

Bracket for quick-clamp

- provides secure mounting to a wall, machine panel or other flat surface

Used On	Description	Part #	Price/E
R72	quick-clamp	***4214-51***	**$18.20**
	quick-clamp service kit (2 O-rings)	***4384-570***	**13.00**
	wall bracket for quick-clamp (uses 3/16" screws)	***4213-89***	**13.00**
	quick-clamp and bracket assembly	***4214-52***	**23.40**
R73, R74	quick-clamp	***4314-51***	**19.65**
	quick-clamp service kit (2 O-rings)	***4384-770***	**14.35**
	wall bracket for quick-clamp (uses 7/32" screws)	***4313-50***	**15.60**
	quick-clamp and bracket assembly	***4314-52***	**29.90**

quick-clamp

bracket

quick-clamp with bracket

Blocks

- installs with quick-clamps
- provides additional outlets and manifolding capability

Used On	Description	Part #	Price/E
R72	porting block, three 1/4" PTF outlets	***4216-50***	**$37.30**
	manifold block, three 3/8" PTF outlets	***4228-01***	**84.15**
R73, R74	porting block, three 1/4" PTF outlets	***4316-50***	**39.50**
	manifold block, three 3/4" PTF outlets	***4328-50***	**78.45**

porting block

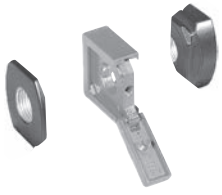

manifold block

Adapters

- installs with quick-clamps
- provides PTF connections to system piping
- sold individually

Used On	Description	Part #	Price/E
R72	1/4" PTF connections	***4215-02***	**$31.20**
	3/8" PTF connections	***4215-03***	**20.80**
R73, R74	1/4" PTF connections	***4315-01***	**27.30**
	3/8" PTF connections	***4315-02***	**27.30**
	1/2" PTF connections	***4315-03***	**28.55**
	3/4" PTF connections	***4315-04***	**27.30**

pipe adapters

see page 254 for replacement gauges

Norgren Series 1 Lubricator Accessories

Bowls and Bowl Guards

3776-54

Used On	Description	Part #	Price/E
L07	polycarbonate bowl with manual drain	***3646-54***	**$20.80**
L08	transparent bowl with manual drain	***3776-54***	**74.70**
L73	transparent bowl with manual drain	***4425-50RL***	**70.15**
L74	metal bowl with Pyrex® liquid level indicator and ¼ turn manual drain	***4303-77R***	**137.85**
	transparent bowl with manual drain	***4325-50R***	**65.05**
	bowl guard only	***4326-01***	**27.50**

Auto and Manual Drain

2796-52

Used On	Description	Part #	Price/E
L08, L17	manual drain assembly	***2796-52***	**$16.40**

Seal Wire

- provides tamper resistant protection of the lubricator drip rate setting

seal wire

Used On	Description	Part #	Price/E
L73, L74	metal	***2117-01***	**$14.80**

Domes, Caps and Plugs

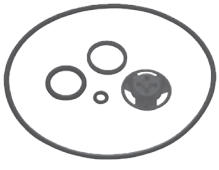

18-011-021

5605-50

Used On	Description	Part #	Price/E
L08	quick fill cap	***18-011-024***	**$29.35**
L17, L74	quick fill cap	***18-011-021***	**41.85**
L72	acetal fill plug	***4272-99***	**13.00**
L73, L74	aluminum fill plug	***5301-55***	**13.65**
L72, L74, L73	sight feed dome (micro-fogging design)	***4055-50***	**29.60**
	sight feed dome (oil-fogging design)	***4055-51***	**29.60**
L72, L74	Pyrex® sight feed dome	***5605-50***	**164.00**
L74	liquid level indicator repair kit	***4380-050***	**32.20**

Seal Kits

5771-02

Used On	Description	Part #	Price/E
L17	O-rings, seals, and gaskets	***5771-02***	**$14.70**
L72	O-rings, seals, and gaskets	***4382-500***	**13.35**
	Viton® seal	***2325-10***	**9.50**
	buna seal	***720-01***	**13.80**
L73	O-rings, seals, and gaskets	***4382-600***	**15.20**
L74	O-rings, seals, and gaskets	***4382-700***	**13.00**
	Viton® seal	***2325-13***	**14.35**

Mounting Brackets

mounting bracket
6212-50

Used On	Description	Part #	Price/E
L07	mounting bracket only	***5095-17***	**$15.60**
L08	mounting bracket only	***3783-52***	**52.20**
L17	mounting bracket kit for ¾" and 1" ported units	***6212-50***	**117.55**
	mounting bracket kit for 1¼" and 1½" ported units	***6212-51***	**128.55**

Norgren Series 1 Lubricator Accessories

Wall Mounting Brackets

- For use instead of quick-clamps and pipe adapters to secure to a wall, machine panel or other flat surface

Bi-Metal Thermometers

- case: sturdy, corrosion resistant series 304 stainless steel case and bezel
- crystal: optically clear, strong glass, gasketed to maintain weather-tight integrity is standard
- stem: 304 series stainless steel, welded at tip and case connector to prevent leakage, ¼" (6.35 mm) diameter is standard
- hermetic seal: hermetically sealed per ASME B40.3 external reset: slotted-hex adjustment head offers screwdriver or wrench use to field calibrate the thermometer
- bi-metal element: an extremely responsive temperature sensing helix which has been carefully sized and tested, heat treated and aged to relieve inherent stresses and insure continued accuracy
- dampening: bi-metal helix is coated with a viscous silicone to minimize pointer oscillation and to improve temperature transmission
- immersion: for accurate temperature readings, immerse stem a minimum of 2" (50 mm) in agitated liquids or 4" (100 mm) in moving air or gas
- over range: temporary over or under range of 50% of scale up to 260°C or **500°F** will not affect the instrument accuracy
- accuracy: guaranteed to be accurate to within 1% of full scale (Grade A per ASME B40.3) (The American Society of Mechanical Engineers issued a new standard for Bi-Metal Thermometers in 1990 referred to as ASME B40.3.) Standard Connection is ½" male NPT

180º Steam Gauge Siphons

In steam service, the siphon will prevent hot steam from entering a pressure gauge, diaphragm seal or transmitter. Recommended for applications involving temperatures above 100°F (37°C). Also *use siphons whenever condensing hot vapors* (not just steam) *are present*.

SAFETY ALERT

- red brass pipe
- complies with ASTM B-43
- withstands pressure of **200 PSI** at **406°F**

Dixon Gauges

All of the gauges supplied by Dixon are designed for long, reliable service under rugged conditions. Typical applications include those on pumps, hydraulic and pneumatic systems, compressors, machine tools and many other installations where it is necessary to have a gauge with a non-corrosive movement. The gauges available include standard dry and liquid-filled pressure gauges, compound pressure gauges, vacuum gauges and welding gauges. Materials available include brass, stainless steel and plastic.

Fig. Inter. - Figure Interval. Increments between PSI numbers on gauge face.

Grad. Inter. - Graduation Interval. Fractional increments between PSI numbers on gauge face.

Brass Standard Dry Gauges

- ASME B40.1 Grade B (± 3/2/3% accuracy)
- polished brass case
- polished brass ring
- copper alloy bourdon tube
- dual PSI / kPa scale dial
- ambient temperature range of **-40°F** to **140°F**

Process Gauges

Specifically designed for process, chemical and petroleum industries, these process gauges are engineered to deliver years of accurate service while withstanding vibration, corrosive media and corrosive atmosphere.

- ambient process temperature: dry **-40°F** to **200°F** (-40°C to 93°C)
- case: black impact resistant thermoplastic, with safety blowout back, solid front, integral back flange (dry)
- ring: ethylene propylene
- wetted parts: 316L stainless steel
- window: polycarbonate
- dial: white aluminum
- pointer: black aluminum
- accuracy: ± 0.5% ANSI/ASME Grade 2A
- scale: single scale PSI only

General Purpose Digital Gauges

New for 2012

General purpose digital gauges are suitable not only for dry air applications but other media as well. Gauge offers selectable units of measure so rather than purchasing one gauge for each unit of measure required, the solution is one gauge for multiple units of measure.

- operating temperature: **14°F** to **140°F** ((-10°C to 60°C)
- case: Noryl (thermoplastic)
- wetted parts: 17-4 PH stainless steel sensor with 316 stainless steel socket
- batteries included: two AAA Alkaline
- 9 engineering units (accessed through keypad): PSI, in. HG, cm Hg, mm Hg, KPA, Mpa, BAR, KG/cm2, ft H20
- accuracy ± 0.5% ASME B40.7
- window: polycarbonate
- dial: white aluminum
- pointer: black aluminum
- ideal for test applications and for use in technicians tool kits

FlutterGuard™ Dry Gauges

FlutterGuard™ virtually eliminates pointer flutter, making the gauge easier to read and reducing excessive movement wear. Liquid-free casing results in lighter weight and eliminates the chance of gauge leakage.

- ASME B40.1, Grade B (± 3-2-3% accuracy)
- ABS plastic case
- C-shaped bronze safety bourdon tube (600 PSI and lower)

King Combination Nipples

- Combination nipples are recommended for low-pressure discharge and suction service for compatible liquids. **They are not for compressible products such as air or nitrogen on sizes 1¼" and above.** SAFETY ALERT
- **King Combination Nipples are not recommended for steam**.
- *The working pressure may vary with the construction of the hose, the type of clamping system used and the application. Consult the factory for recommendations.* SAFETY ALERT
- In accordance with the R.M.A. bulletin for oil suction and discharge hose, a coupled length of hose in any size, should be tested to 1½ times the working pressure and held for fifteen minutes without leaking or coupling movement. For additional information and detailed instruction on testing procedures, see the Rubber Manufacturers Association (R.M.A.) handbook.

External Swage Notched NOS Stems and Ferrules

- The largest advantage of the notched design is that the coupling can be removed from a damaged hose by cutting away the ferrule, without necessarily damaging the fitting. *After inspection of the fitting to determine its suitability for reuse,* it can be reinstalled into another hose by using a *new ferrule*.
- The notched system allows you to better manage your inventories. You can stock one stem and two ferrules, and cover the same hose range with less inventory. *You must purchase a fitting and the matching ferrule to create an assembly*.

SAFETY ALERT

SAFETY ALERT

STC200NOS

- For hose outside diameters of 2-4/64" and below, *the couplings are crimp only*.
- For hose outside diameters of 2-5/64" and above, the couplings can be crimped or swaged.
- See page 39 for cam and groove style notched NOS fittings.

SAFETY ALERT

SAFETY ALERT

Only use the NOS shank with the NOS ferrules.
Due to differences in dimensions and tolerances for safety reasons,
do not use other manufacturer's stems or ferrules with Dixon Holedall products.

PF Shank King Combination Nipples

- PF shank King Combination nipples have the same shank pattern as found on the PF style cam and groove fittings sold on page 43. This shank design was developed specifically for chemical transport hoses having Crosslinked Polyethylene (XLPE) or Ultra High Molecular Weight Polyethylene (UHMW) tubes, where shank retention can be a problem when using conventional band clamps.
- recommended for discharge and suction service
- ***Not intended for compressed air*** SAFETY ALERT
- working pressure is given at 70°F maximum
- *The working pressure may vary with the construction of the hose, the type of clamping system used and the application. Consult the factory for recommendations.*

Notched Turned Back Nipples

- When used with an appropriate notched ferrule, these fittings can be swaged or crimped onto hose, thereby providing improved shank retention.
- The stem can be removed from a damaged hose by cutting away the ferrule, without necessarily damaging the fitting. *After inspection to determine its suitability for reuse,* it can be reinstalled into another hose by *using a new ferrule*.
- When used with double bolt or band clamps, notched turned back nipples will provide shank retention similar to that of the King turned back nipples.
- Notched turned back nipples let you use the same ferrules used with the notched (NO) cam and groove on page 38. This lets you *maximize your inventory usage and reduce costs*. *You must purchase a fitting and the matching ferrule to create an assembly*.
- Stems are for use with lap joint flanges on page 573.

SAFETY ALERT

Dixon stems and ferrules are specifically designed to be used together as a coupling system. Due to differences in dimensions and tolerances for safety reasons, do not use other manufacturer's stems or ferrules with Dixon Holedall products.

Crimp Style King Combination Nipples

SAFETY ALERT

Only use the crimp style shanks with the crimp style sleeves and ferrules.
Due to differences in dimensions and tolerances for safety reasons, do not interchange other manufacturer's products with Dixon products.

SAFETY ALERT

- There are two grooves on the crimp style King Combination nipples. The second groove is the roll stamp groove which has the part number and 'call Dixon' stamped on it. This groove is a smooth concentric groove so that the stamp can be legible.

* consult factory for pressure rating

[1] based on using King combination nipples

Crimp Style Ferrules

Only use the crimp style shanks with the crimp style sleeves and ferrules. Due to differences in dimensions and tolerances for safety reasons, do not interchange other manufacturer's products with Dixon products.

Steel Dixon Hose Menders

- **They are not for compressible products such as air, nitrogen or steam.** SAFETY ALERT
- *The working pressure may vary with the construction of the hose, the type of clamping system used and the application. Consult the factory for recommendations.*
- In accordance with the R.M.A. bulletin for oil suction and discharge hose, a coupled length of hose in any size, should be tested to 1½ times the working pressure and held for fifteen minutes without leaking or coupling movement. For additional information and detailed instruction on testing procedures, see the Rubber Manufacturers Association (R.M.A.) handbook.

Strainer with Spring Loaded Check Valves

- brass with NBR seat, stainless steel strainer
- soft seat for bubble tight shutoff, spring loaded for fast seating action
- flow profile designed to minimize head loss
- temperature range: **10°F** to **210°F** (-10°C to 100°C)
- cracking pressure: **0.50 PSI**
- pressure rating: 1½"-2" **400 PSI** WOG, 3"-4" **175 PSI** WOG
- Underwriters approved

Size	Part #	Price/E

Quick Connect Fittings

- The primary applications for these fittings are irrigation and suction lines.
- The hot dipped, galvanized quick connect fittings has a double pin locking lever for smooth closing action.
- Type A (*Agri-Lock style*) locks on the female side. Type B (*Bauer style*) locks on the male side.
- Each coupler is equipped with a safety pin to prevent accidental openings.
- These fittings are not recommended for chemicals or any hazardous type materials where the possibility of leakage would result in health or environmental concerns. Consult the factory for recommendations.

LIQUIfit™ Fittings

The LIQUIfit fitting is suitable for water, potable liquids and neutral gas applications, including water filtration, water coolers, coffee machines and beverage dispensers.

Features:
- EPDM seal secures connection with larger surface area than standard O-rings
- engineered polymer allows superior mechanical strength and chemical resistance
- full stainless gripping ring eliminates the need for locking clips
- release button protects and supports tubing
- FDA compliant
- NSF-51 listed for contact with food
- NSF-61 list C-Hot rated
- in compliance with the following standards:

Specifications:
- working pressure:
  - 1/4" **230 PSI** from **35°F** to **100°F**
    150 PSI at **150°F**
    60 PSI at **200°F**
  - 3/8" **190 PSI** from **35°F** to **100°F**
    100 PSI at **150°F**
    60 PSI at **200°F**
  - 1/2" **160 PSI** from **35°F** to **100°F**
    100 PSI at **150°F**
    60 PSI at **200°F**
- maximum torque values for NPT threads:
  - 1/8" and 1/4" 1.0 ft. lbs. / 1.5Nm
  - 3/8" and 1/2" 2.2 ft. lbs. / 3.0Nm

LIQUIfit™ Ball Valves

These corrosion resistant, all-plastic designed ball valves are ideal for water filtration units, coffee and beverage machines and a wide variety of other fluid applications.

Features:
- EPDM seal secures connection with larger surface area than standard O-rings
- full flow self-cleaning ball
- high-temperature, scale resistant Polysulfone ball
- glass-reinforced Polypropylene body
- FDA compliant
- NSF-51 listed for contact with food

Specifications:
- temperature range: **0°F** to **225°F** (-18°C to 107°C)
- O-ring seal material: EPDM
- Pressure rating to **150 PSI** with a 600 PSI burst pressure. Actual working pressures will be lower at elevated temperatures.

LIQUIfit™ Check Valves

Push-to connect check valves ensure protection against reversal of flow. The valves have an arrow molded into the body to indicate the direction of flow. Valves are designed for connection with either thermoplastic or soft metal tubing and are intended *for use with liquids only*.

- body material: polypropylene
- O-ring: EPDM
- metal grip edge: 300 stainless steel
- NSF-51 listed
- working pressure: up to **150 PSI**, depending on tubing used
- temperature range: **34°F** to **150°F** (1°C to 65°C)
- cracking pressure: 1/3 PSI

Sharkbite® Push-Fit Fittings

- for ***water***, ***dry, clean air*** or ***100% glycol solutions*** only
- connects copper, CPVC, and PEX pipe in any combination
- no soldering, clamps, unions or glue needed
- certified to **200 PSI** and **200°F**
- approved for use underground and behind walls without access panels
- integral tube liner for PEX installations
- Fittings can be rotated after assembly for easier installation in tight spaces.
- easy to disconnect if needed
- design certified and listed to ASSE 1061/NSF 61
- listed by IAMPO
- meet UPC, IPC and cUPC requirements

Water-Steam Washdown Station

Fail-safe mixing station, bronze, wall mounted, safely blends steam and cold water for hot water on demand. Should cold water fail, the steam is instantly shut-off. **150 PSI** maximum, **200°F** maximum.

station is not supplied with hose and nozzle

Unit is furnished with the following:

- control valves
- dial thermometer
- in-line check valves
- ¾" inlet and outlet
- stainless steel hose rack
- mounting plate and hardware

Part #	Price/E
SWDS	**$3456.75**

Thermal-Gard™ Elevated Temperature Spray Nozzle

The Thermal-Gard™ elevated temperature spray nozzle protects the operator from extreme hot water temperatures that exceed the comfort zone of standard hot water nozzles. 3/8" female NPT inlet. Black cover.

- Assembly includes required special rigid, stainless steel adapter, (3/8" male NPT x 1/2" female NPT).
- Thermal insulating sleeve reduces overall heat during elevated temperature conditions.
- Stainless steel lever handle is coated for additional thermal protection, and operator comfort.
- Lightweight aluminum alloy body reduces overall weight.
- Corrosion resistant body is anodized for additional corrosion protection.
- Recommended for water temperatures above **140°F** to a maximum temperature of **200°F**.
- **14 GPM** flow capacity
- working pressure: **150 PSI**

Aluminum	
Part #	Price/E
AWSG-TG	**$355.80**

New for 2012

Stainless Mini Spray Nozzle

- ½" female NPT inlet
- not for use with steam SAFETY ALERT
- specifically designed as an industrial lightweight nozzle with heavyweight performance
- Nozzle cover is not only durable, but also protects the user from hot surfaces produced by high temperature wash down applications.
- reduces hand fatigue and offers smooth lever action
- variable spray patterns, from fan spray to solid stream
- Water conservation is assured upon release of the lever by the drip-free automatic shutoff feature.
- rated to **150 PSI** / **200°F**
- **9.6 GPM** flow capacity at **100 PSIG**

Stainless Steel with dark blue cover

Part #	Price/E
DM150SDB	**$192.50**

Stainless Spray Nozzle

- ½" female NPT inlet
- specifically designed to prevent accidental spray
- durable dark blue cover design prevents front-mounted lever from being accidentally activated if nozzle is dropped
- design also reduces hand fatigue and offers smooth lever action
- trigger locking mechanism provides safe and secure method of keeping the nozzle open during any spray pattern
- variable spray patterns, from fan spray to solid stream
- drip-free automatic shut-off feature
- rated to **150 PSI** / **200°F**
- **9.6 GPM** flow capacity at **100 PSIG**

Stainless

Part #	Price/E
D150SDB	**$379.75**

Washdown Wand

- Designed to provide user with a means of 'reaching' desired washdown locations previously deemed unreachable by extending the nozzle by 3'.
- Adjustable spray tip can be changed from fan to solid spray by twisting the tip until the desired flow pattern is achieved.
- quick disconnect feature allows user to quickly connect wand to the nozzles above
- *Minimum pressure is 75 PSI, wand is not for use with steam.* SAFETY ALERT

300 series Stainless Steel

Part #	Price/E
D150S-WAND	**$388.15**

Temperature Indicating Spray Nozzle

When you uncoil your hose and walk away from the hot and cold water mixer, you can no longer read the dial thermometer on the mixer. With the temperature indicating spray nozzle, you take your thermometer with you. ½" female NPT inlet. Black cover.

- Easy to read dial thermometer is located at the rear of the nozzle for accurate and continual monitoring of water temperature.
- The dial thermometer is all stainless steel with a plastic sight window, and the entire gauge assembly is recessed into the rubber cover for complete protection.
- Alerts the operator to shut-down the steam valve upon cold water failure, preventing scalding and steam burn injuries (ensures operator safety).
- ensures a more accurate discharge water temperature reading
- recommended for water temperatures to **200°F**
- maximum operating pressure: **150 PSI**
- **14 GPM** flow capacity

Bronze

Part #	Price/E
BWSG-TI	**$427.75**

Stainless Steel Industrial Grade Spray Nozzle

The stainless steel industrial grade spray nozzle is recommended for use on corrosive applications where bronze and aluminum are not suitable.

- heavy duty 300 series stainless steel body and barrel
- variable spray pattern adjusts from a soft spray to a solid stream
- Replaceable rubber cover is specially formulated to resist a wide range of oils and chemicals. Rubber cover also protects surrounding equipment.
- maximum operating pressure: **150 PSI**
- **8 GPM** flow capacity at **100 PSI**
- ½" female NPT inlet
- **200°F** maximum

300 series Stainless Steel	
Part #	Price/E
300SSSG	**$661.30**

Brass Industrial Grade Front Lever Spray Nozzle

The brass industrial grade spray nozzle provides effortless one hand operation: by actuating the operating lever the valve is opened/closed and the jet power is regulated from spray to concentrated jet.

- maximum operating pressure: **350 PSI**
- suitable for hot water up to **122°F**
- The adjusting screw on the back of the gun allows you to fix the desired form of jet. The fixing clamp for the operating lever allows permanent service.
- **6.6 GPM** flow capacity at **72 PSI**
- ½" female NPT inlet
- durable nozzle constructed of a high quality brass and steel combination

Brass	
Part #	Price/E
DWG050	**$195.00**

Pressure Spray Guns

- 3/8" female inlet
- 1/4" female outlet
- **8 GPM**
- operating pressure: **4500 PSI**
- temperatures to **300°F**
- anti-fatigue pressure compensating design
- W = weeping, for the car wash industry, allows a small stream of water / leak

Part #	Price/E
HPSG	**$81.40**
HPSGW	**92.40**

- 3/8" female inlet
- 1/4" female outlet
- **6.6 GPM**
- operating pressure: **3625 PSI**
- temperatures to **140°F**

Part #	Price/E
HPSGC	**$61.40**

- 3/8" female inlet
- 1/4" female outlet

HPSGHD	**$103.75**

- 3/8" female inlet
- 22 mm x 14 mm female outlet
- **8 GPM**
- operating pressure: **3700 PSI**
- temperatures to **104°F**
- extension length: 14"

Part #	Price/E
AL9	**$70.10**

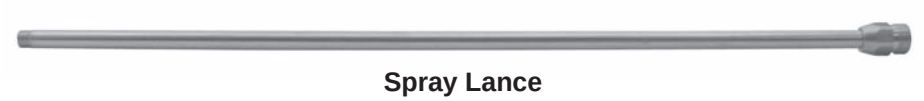

Kit includes:

- gun: 22 mm male inlet ,22 mm x 14 mm female outlet end, operating pressure **2500 PSI**
- lance: 18" with vari-spray nozzle 1.25 mm with 22 mm male inlet
- hose: 25', ¼" ID with 22 mm x 14 mm female ends
- nozzle: 4.0 variable nozzle 0° to 80°

Part #	Price/E
BIT-KIT	**$184.60**

Spray Lances and Extensions for Pressure Gun

- for use with ***AL9*** spray gun ***only***
- operating pressure: **4000 PSI** maximum
- temperatures to **300°F**

Spray Lance

Part #	Description	Length	Price/E
AL248	*zinc*, 22 mm x 14 mm male inlet x ¼" male outlet	24"	**$25.50**

Dual Spray Lances

- for use with ***HPSG***, ***HPSGC, HPSGHD*** and ***HPSGW***
- for soap and water
- temperatures to **300°F**
- **GPM: 10.5**
- requires 1 high pressure nozzle and 1 soap nozzle (pg. 299)
- Allows quick adjustment from high to low pressure with a twist of the handle; low pressure setting allows for use of soap.

AL344

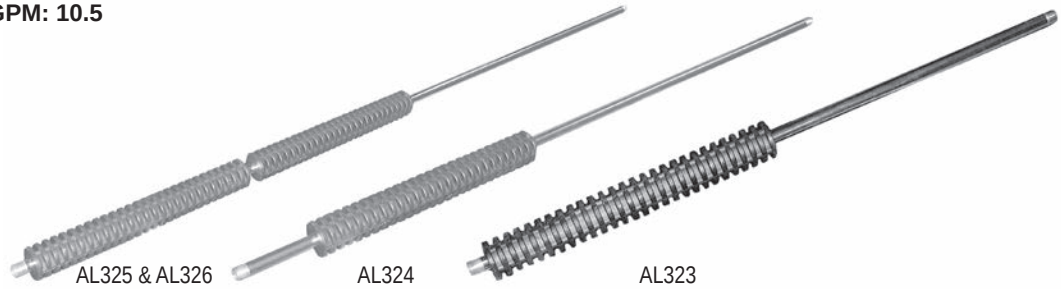

AL333

Part #	Description	Length	Max. Operating PSI	Price/E
AL333	*zinc*, ¼" male inlet 2 each ¼" female outlets	40"	**3,650**	**$134.00**
AL344	*stainless steel*, ¼" male inlet, 2 each ¼" female outlets	40"	**4,000**	**182.75**

Molded Grip Extensions

- for use with ***HPSG***, ***HPSGC, HPSGHD*** and ***HPSGW***
- operating pressure: **5000 PSI** maximum
- temperatures to **300°F**
- maximum **GPM: 10.5**

AL325 & AL326 AL324 AL323

Part #	Description	Length	Price/E
AL323XX	*zinc,* ¼" male inlet x ¼" male outlet	24"	**$21.55**
AL324XX	*zinc*, ¼" male inlet x ¼" male outlet, 4" space from the end	36"	**24.60**
AL325XX	*zinc*, ¼" male inlet x ¼" male outlet, 2 grips	48"	**42.90**
AL326XX	*zinc*, ¼" male inlet x ¼" male outlet, 2 grips	59"	**47.80**

Vented Grip Lances

- for use with ***HPSG***, ***HPSGC, HPSGHD*** and ***HPSGW***
- for hot water
- operating pressure: **5000 PSI** maximum
- temperatures to **300°F**
- maximum **GPM: 10.5**

AL361

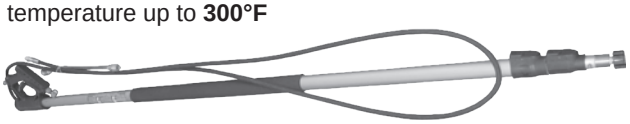

AL362

Part #	Description	Length	Price/E
AL361	*zinc*, ¼" male inlet x ¼" female outlet, straight	36"	**$49.90**
AL362	*zinc*, ¼" male inlet x ¼" female outlet, bent	48"	**73.55**

Telescoping Lance and Belt for Pressure Gun

- 3/8" female (pipe thread) inlet
- 1/4" female (quick connect) outlet
- operating pressure: **4000 PSI** maximum
- 1/4" steel braided hose
- **GPM: 7**
- length is in three sections
- temperature up to **300°F**

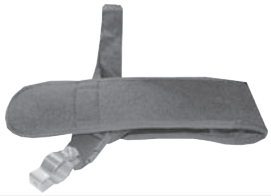

Part #	Description	Length	Price/E
ARTEL18A	aluminum telescoping lance	6' - 18'	**$553.70**

Telescoping Lance Belt

- made of nylon
- adjusts from a minimum of 33" waist to a maximum of 58"

Part #	Description	Price/E
ARTEL-BELT	telescoping lance belt	**$54.45**

Quick Couplings and Plugs

Swiveling Couplings

- operating pressure: **3650 PSI**
- **GPM: 7.8**
- temperature up to **300°F**

1/4" female x 22 mm x 1.5 mm swivel

Part #	Description	Price/E
AL450	*swiveling* quick coupling	**$16.15**

1/4" male x 22 mm x 1.5 mm swivel

Part #	Description	Price/E
AL451	*swiveling* quick coupling	**$16.15**

3/8" female x 22 mm x 1.5 mm swivel

Part #	Description	Price/E
AL453	*swiveling* quick coupling	**$19.35**

for use with ***AL456*** *only*

3/8" female x female swivel

Part #	Description	Price/E
AL462	*swiveling* quick coupling	**$30.70**

for use with ***AL464*** *only*

Fixed Plugs

- operating pressure: **3650 PSI**
- **GPM: 7.8**
- temperature up to **300°F**

1/4" female x 22 mm x 1.5 mm male

Part #	Description	Price/E
AL454	*fixed* quick coupling plug	**$11.75**

1/4" male x 22 mm x 1.5 mm male

Part #	Description	Price/E
AL455F	*fixed* quick coupling plug	**$11.75**

3/8" female x 22 mm x 1.5 mm male

Part #	Description	Price/E
AL456	*fixed* quick coupling plug	**$15.10**

for use with ***AL453*** and ***AL9***

3/8" female x male plug

Part #	Description	Price/E
AL464	*fixed* quick coupling plug	**$17.20**

for use with ***AL462*** *only*

Injector Nozzles

AL477

For injection of cleaning solutions into high pressure discharge lines

- 3/8" male inlet and outlet
- operating pressure: **4000 PSI**

Part #	Description	Orifice	GPM	Price/E
AL472	adjustable, green	1.8 mm	2 - 3	**$52.85**
AL477	adjustable, red	2.1 mm	3 - 4	**53.25**
AL478	adjustable, blue	2.3 mm	4 - 5.5	**53.25**

Line Strainer

- operating pressure: **100 PSI**
- ½" female inlet, ½" male outlet
- .60 mesh cuffed filter
- 2 additional ¼" side ports
- maximum **GPM 8**

Part #	Description	Price/E
AR3000-A2	aluminum line strainer	**$37.45**

Nozzles

High Pressure Spray Soap Nozzles

Part #	Description	Price/E
NZ4040S	¼" male inlet, 40° spray angle, size #40	**$10.80**
NZ8040S	¼" male inlet, 80° spray angle, size #40	**10.80**

High Pressure Spray Nozzles

Part #	Description	Price/E
NZ1504	¼" male NPT inlet, 15° spray angle, size 4	**$16.20**
NZ2504	¼" male NPT inlet, 25° spray angle, size 4	**16.20**
NZ4004	¼" male NPT inlet, 40° spray angle, size 4	**16.20**

Quick Connect Soap Nozzle

Part #	Description	Price/E
NZ6540QCS	¼" straight through plug inlet, 65° spray angle, size #40	**$15.20**

To be used with ¼" couplers on page 358.

Quick Connect Spray Nozzles

Part #	Description	Price/E
MSP415	¼" straight through plug inlet, 15° spray angle, size #4, yellow	**$16.50**
MSP425	¼" straight through plug inlet, 25° spray angle, size #4, green	**16.50**
MSP440	¼" straight through plug inlet, 40° spray angle, size #4, white	**16.50**

To be used with ¼" couplers on page 358.

Multi-Pack Quick Connect Nozzles

Part #	Nozzle	Description	Price/E
MSP4PAK	NZ6540QCS MSP415 MSP425 MSP440	¼", 65° spray angle, size #40 ¼", 15° spray angle, size #4, yellow ¼", 25° spray angle, size #4, green ¼", 40° spray angle, size #4, white	**$65.25**

Multi-Pack High Pressure Spray Nozzles

- ¼" quick connect nozzle multi-packs include: 0° red, 15° yellow, 25° green, 40° white and 50° black soap nozzles

Nozzle Holders

AL414

AL416

- temperatures to **300°F**

Part #	Description	GPM	Operating PSI	Price/E
AL414	adjustable hi/low nozzle holder with nozzle protector, ¼" female inlet and outlet	**7.8**	**3,650**	**$47.25**
AL416	change over nozzle, ¼" female inlet, 2 each ¼" female outlet	**8**	**2,900**	**63.30**

Inlet Filter for Turbo Nozzles

- ¼" female inlet, ¼" male outlet
- temperatures to **212°F**
- 100 mesh filter

Part #	Description	GPM	Operating PSI	Price/E
AR3500	stainless steel, inlet water filter	**8**	**5,000**	**$37.50**

Braided Rubber Hose

Part #	Pressure PSI	Length	Inside Diameter	Male Swivel Inlet	Male Swivel Outlet	Price/E
AR503830SSP	**4,000**	50'	3/8"	3/8"	3/8"	**$242.65**

Hand Crank Hose Reel

- operating PSI: **3,000 PSI**
- temperature to: **160°F**
- 3/8" male outlet
- steel
- 3/8" female inlet
- holds 100' of 3/8" pressure hose

Part #	Price/E
AR-REEL100	**$397.80**

Unloader Valves

Pressure regulating unloader valves automatically relieves pressure from the pump at shut-off.

- temperatures to **190°F**
- inlet: 2 each, 3/8" female NPT
- outlet: 3/8" female NPT
- bypass: 2 each, 3/8" female NPT

Part #	Description	GPM	Operating PSI	Price/E
AL605	yellow spring	8 gallons maximum	**2,320**	**$169.30**
AL606	blue spring	8 gallons maximum	**3,650**	**169.30**
AL607	black spring	8 gallons maximum	**4,500**	**174.40**

- temperatures to **190°F**
- inlet: 3/8" female
- outlet: 3/8" male
- bypass: 3/8" female

Part #	Description	GPM	Operating PSI	Price/E
AR20831	VR-35 unloader valve	9	**5,100**	**$215.60**

Valves

Thermal Relief Valve

- operating PSI: **200 PSI**
- temperature to: **140°F**
- inlet: ½" male

Part #	Price/E
TPP140	**$22.70**

Safety Release Valve

- operating PSI: **1,000** to **4,000 PSI**
- temperature to: **200°F**
- inlet: 3/8" male
- **6 GPM**

Part #	Price/E
AR5000-1	**$34.35**

Balance Release Valve

- operating PSI: **4,000 PSI**
- temperature to: **195°F**
- **6.6 GPM**
- inlet/outlet: 3/8" female NPT
- bypass: 3/8" female NPT

Part #	Price/E
AL702	**$107.80**

Water Broom

- operating PSI: **4,000 PSI**
- ¼" quick connect plug
- stainless steel

Part #	Description	Price/E
AR-BROOM16	16", 4 nozzle broom	**$135.30**

Garden Hoses
Perfect Water Hose

New for 2012

- for residential and industrial use
- lightweight, easy handling
- heavy duty male and female garden hose fittings
- blue cover
- polypropylene double helix construction with TPE cover
- flexible and kink-free
- working pressure: **100 PSI** at 70°F
- burst pressure: 300 PSI at 70°F
- temperature range: **-20°F** to **158°F**

Part #	Size	Price/E
PWH25	5/8" x 25'	**$84.00**
PWH50	5/8" x 50'	**155.00**
PWH100	5/8" x 100'	**288.00**

Top Level PVC Hose

New for 2012

- heavy-duty ¾" brass couplings
- kink resistant
- green cover
- drinking water safe
- working pressure: **100 PSI**
- temperature range: **15°F** to **150°F**

Part #	Size	Price/E
GGH25	5/8" x 25'	**$29.00**
GGH50	5/8" x 50'	**47.00**
GGH75	5/8" x 75'	**66.00**

Premium Flexzilla™ Hose

- temperature range: **-40°F** to **150°F**
- premium hybrid polymer material
- anodized aircraft aluminum fittings on both ends of hose
- kink resistant under pressure
- no memory - lays flat, coils easily
- abrasion resistant
- ¾" - 11½ GHT fittings
- rugged bend restrictors
- lightweight

Part #	Size	Price/E	Pkg Qty
KRH50	5/8" x 50'	**$125.00**	1
KRH75	5/8" x 75'	**161.00**	1
KRH100	5/8" x 100'	**196.00**	1

Flexogen® Hose

- heavy-duty, crush resistant, full-flow brass couplings with a built-in washer for tight sealing
- coils and handles easily in all weather
- patented 8-ply construction
- lightweight
- maximum kink resistance
- flow guard plus protective collar resists kinks at faucet
- polished surface resists abrasions, stains and mildew
- machined brass ends standard

Part #	Size	Price/E	Pkg Qty
FGH25	5/8" x 25'	**$50.60**	1
FGH50	5/8" x 50'	**85.75**	1

Rubber Vinyl Garden Hose

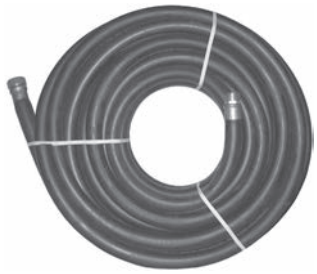

- extra tough, five-ply construction
- exclusive, soft textured, abrasion-resistant green cover
- dual reinforced, heavy-duty, flexibility, kink resistance
- combines durability of rubber, easy handling of vinyl
- SEAL-TITE® leakproof coupling
- working pressure: **150 PSI**
- temperature range: **0°F** to **140°F**

Part #	Size	Price/E	Opt Qty
SGH25	5/8" x 25'	**$49.25**	5
SGH50	5/8" x 50'	**85.00**	5
SGH75	5/8" x 75'	**115.60**	3
SGH100	5/8" x 100'	**160.00**	3
SGH50-75	3/4" x 50'	**116.00**	5
SGH75-75	3/4" x 75'	**176.50**	3

Garden Hoses

Contractors Rubber Water Hose

- heavy duty, crush proof solid brass couplings with wrench grips
- EPDM tube
- spiral synthetic cord reinforcement
- black EPDM cover
- working pressure: **150 PSI**
- temperature range: **-20°F** to **180°F**

Part #	Size	Price/E	Opt Qty
CWH50	3/4" x 50'	**$172.00**	5

Premium Rubber Hose

- professional grade reinforcement provides maximum strength
- heavy-duty flexibility
- ultimate kink resistance
- SEAL-TITE® leakproof coupling
- EPDM tube
- black EPDM cover
- working pressure: **125 PSI**
- temperature range: **-20°F** to **160°F**

Part #	Size	Price/E	Opt Qty
PGH50	5/8" x 50'	**$112.20**	5
PGH75	5/8" x 75'	**158.40**	3

Hot Water Rubber Reinforced Hose

- industrial style reinforcing for flexibility, high burst strength
- extra heavy-duty, crush-proof, machined brass couplings
- maximum wear, abrasion-resistant red cover
- withstands extensive hot water **(200°F)** use
- working pressure: **130 PSI**

Part #	Size	Price/E	Opt Qty
HWH50	5/8" x 50'	**$128.00**	5
HWH50-75	3/4" x 50'	**189.50**	3

Marine, Camper, Patio & Pool Hose

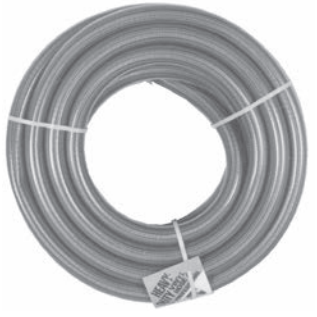

- lightweight to handle, easy to store
- USFDA - approved tube materials for food contact use
- nickel plated couplings
- white cover
- working pressure: **80 PSI** at ambient temperature (70°F)

Part #	Size	Price/E	Opt Qty
MCH50	5/8" x 50'	**$74.25**	5

Country Club® RT Hose

- for golf courses, parks, nurseries
- premium PVC for high strength, flexibility
- lightweight, easy handling
- industrial knit reinforcing for kink resistance
- heavy duty 1" NPSH brass couplings
- green cover
- working pressure: **150 PSI** at ambient temperature (70°F)
- burst pressure: **450 PSI**

Part #	Size	Price/E	Opt Qty
CCH50	1" x 50'	**$316.70**	2

Nozzles

Brass / Rubber Power Flow Water Nozzle

- all metal body and handle
- curved design to fit the contour of your hand
- overmold for comfortable handling
- built in flow control to regulate the amount of water flow
- locking feature to make extended watering easy
  large easy-turn dial

Inlet Thread	Part #	Price/E
GHT	***PNB75GHT***	**$39.80**

Insulated Water Nozzles

- clip locks any spray pattern
- chrome plated all zinc body
- industrial strength nylon handle
- rubber handle guard
- GHT thread on head
- heavy duty brass valve and adjusting nut
- hot water up to **180°F**

Inlet Thread	Part #	Price/E
GHT	***SN75***	**$23.50**

Pistol-Grip Water Nozzle

- clip locks any spray pattern
- easy squeeze on/off lever
- heavy duty all zinc metallized body
- brass valve and adjusting nut
- stainless steel spring with lifetime packing
- rubber handle guard

Part #	Price/E
CSN75	**$13.45**

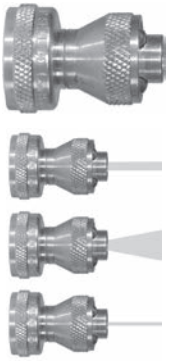

Brass Twist Nozzles

- brass
- for use up to **150 PSI** (water only)
- ***500-AN4*** and ***500-AN7*** are imported

Thread Size	Length	Part #	Price/E
¾" GHT	4"	***BTN75***	**$17.90**
¾" GHT	4"	***500AN4***	**12.38**
¾" GHT	6"	***500-AN7***	**36.48**

Adjust-a-Power Nozzle

- ideal for patio, auto and boat, driveway and garden
- produces 50% more power than twist nozzles
- does not require a washer
- leave nozzle in the open position when not in use
- brass construction with stainless steel bearings
- for use up to **100 PSI** (water only) at ambient temperature (70°F)

Thread Size	Part #	Price/E
¾" GHT	***AAPN75GHT***	**$24.00**

Nozzles and Accessories

Green Constant Flow Nozzle Display

- shatterproof and UV resistant GE Lexan® is able to withstand tough environmental conditions
- easy twist spray pattern adjustment
- sold in case quantity only, with display
- 25 nozzles per case

Thread Size	45° Spray GPM @ **100 PSI**	Part #	Price/case
¾" GHT	25.1	***FNB75GHT-GD***	**$493.00**

Green Constant Flow Nozzle with Bumper

- green plastic
- steel stem
- can be used as a replacement for nozzles in the case listed above

Thread Size	45° Spray GPM @ **100 PSI**	Part #	Price/E
¾" GHT	25.1	***GNB75GHT***	**$20.30**

Fire Hose Nozzle with Bumper

- red polycarbonate with brass stem
- adjusts from Straight Stream to Fog
- for use up to **100 PSI** (water only) at ambient temperature (70°F)

Thread Size	Solid Stream @ **100 PSI**	45° Spray GPM @ **100 PSI**	120° Spray GPM @ **100 PSI**	Part #	Price/E
¾" GHT	20	25.1	30.9	***FNB75GHT***	**$40.80**

Brass Sweeper Nozzle

Thread Size	Discharge	Length	Part #	Price/E
¾" GHT	3/16"	2"	***PSN76***	**$7.75**

Brass Plain Hose Nozzle

- brass with satin finish
- for use up to **100 PSI** (water only) at ambient temperature (70°F)

Thread Size	Discharge	Length	Part #	Price/E
¾" GHT	¼	6"	***BN6***	**$41.75**

Hydrant Adapter

- cast brass

Female NST	Male GHT	Part #	Price/E

Compression bibb faucets sold on pages 306 and 534.

Garden Hose Accessories

Standard Flow Fittings

Flexible Water Nozzle

- bends for water flow, shuts off when released
- ¾" GHT

Part #	Price/E
8005	**$41.15**

Radiator Bibb

- vinyl spout
- ¼" female pipe thread connection

Part #	Price/E
8013	**$30.20**

Garden Hose Gooseneck

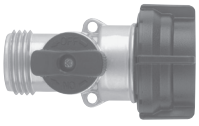

- powder-coated zinc gooseneck connector angles hose away from hose bib
- **125 PSI** at ambient temperature (70°F)

Part #	Price/E
GHGN	**$14.00**

Straight GHT Valve

- powder-coated zinc shut-off valve
- hot water up to **160°F**
- **150 PSI**

Part #	Price/E
GHV	**$12.20**

GHT Twin Valve

- powder-coated zinc with twin shut-off valves
- hot water up to **160°F**
- **150 PSI**

Part #	Price/E
GHYV	**$17.00**

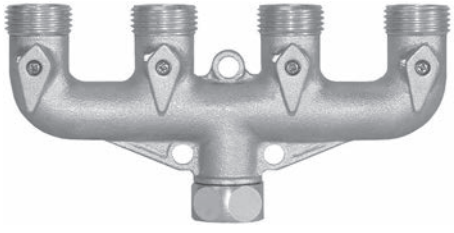

GHT Y

- powder-coated zinc with twin outlet
- includes one end cap
- hot water up to **160°F**
- **150 PSI**

Part #	Price/E
GHY	**$9.75**

GHT 4-Valve Manifold

- forged brass
- stainless balls
- PTFE seats
- swivel inlet

Part #	Price/E
500-GH4V	**$89.66**

Compression Bibb Faucets

- rough brass finish
- nozzle end is GHT
- *for water use only*

Male NPT Inlet Size	*Brass* Part #	Price/E
½"	***35-201-10***	**$28.70**
¾"	***35-202-10***	**28.70**

GHT Zinc Hose Fittings

female

male

mender

- premimum brass and zinc construction for maximum strength and durability
- patented impact resistant clamp design
- non-corroding high grade 410 stainless steel screws will not strip when tightened
- leakproof, reusable
- for rubber or plastic hose
- **fits all 5/8" and 3/4" hose**

Opt Qty	Female Part #	Price/E	Male Part #	Price/E	Mender Part #	Price/E
48	***M5834F***	**$14.60**	***M5834M***	**$13.00**	***M5834HM***	**$20.25**

GHT Coupler and Adapter

New for 2012

male adapter x female GHT

Size	*glass reinforced nylon* Part #	Price/E
¾"	***75-AGH-NY***	**$7.65**

female coupler x male GHT

Size	*glass reinforced nylon* Part #	Price/E
¾"	***75-BGH-NY***	**$16.40**

Brass Garden Hose Quick Connectors

- Precision machined from solid brass with easy push-pull ring for long lasting and quick hose attachments.
- maximum operating pressure: **200 PSI** at ambient temperature (70°F)

Description	Part #	Price/E	Opt Qty
complete assembly	***DGH7***	**$14.44**	25
male plug	***DGH7P***	**4.57**	25
female coupler	***DGH7C***	**9.87**	25
seal	***DGHW7***	**0.77**	25
valved coupler - water shutoff	***DGH7CV***	**13.82**	25
complete valved assembly	***DGH7V***	**18.39**	25

New for 2012

Spray Valve and Hose Assembly

Spray Valves

- even spray valve mist provides the proper moisture on paper roll ends
- helps eliminate wrinkles and folder delivery problems, increasing pressroom production and reducing waste
- A slight flex of the hose in any direction (360°) activates the spray.
- quick action with no protruding levers, thumb depressors, triggers or other devices utilized
- Positive water seal when hose is released causes the internal valve to close and immediately shut off spray.
- sealed mechanism with no packing gland

valve with hook

Female NPT Size	Description	Part #	Price/E
1/4"	valve, no hook	***83304***	**$48.64**
3/8"	valve, no hook	***83306***	**48.64**

Tool for Push-On Fittings

- cuts push-on style hose and inserts the fitting
- Built-in cutter slices through ¼" - ¾" ID reinforced push-on hose without fraying.
- Clamp hose into tool's vice and apply light pressure on handle to drive in the fitting.
- tool has four 7/16" diameter mounting holes for bench mounting
- overall size is 13-1/2" long x 2-3/8" wide x 7" height

Size	Part #	Price/E
all	***270AT***	**$1078.20**

Assembly Instructions:

1. Trim hose end with smooth square cut
2. Lubricate either push-on fitting, hose or both.
3. Insert push-on fitting into hose until first barb is in hose.
4. Place end of fitting against a flat object (bench, wall, etc.) and grip the hose one inch from end. Push with a steady force until end of hose is covered by yellow plastic cap.

Disassembly Instructions:

1. Leaving push-on fitting in place, make a 1" cut in the hose along the barbed end of the fitting. Note: Be careful not to nick barbs when cutting the hose.
2. With firm grip on hose, give a sharp downward pull to release the fitting from the hose.

SAFETY ALERT *Caution:* Push-on fittings will properly grip push-on hose only when pushed all the way in, with the cut end of the hose completely concealed by the plastic cap.

Reusable Fittings

Reusable fittings are recommended for low pressure air hose applications. They offer a more durable hose connection and easily repaired. Maximum working pressure: **250 PSI** at ambient temperature (70°F). *Caution: Check hose OD and ID accurately before ordering.* SAFETY ALERT

reusable male fittings

* These dies for use with 5111A and 1765A ferrule machine. Other sizes are available.
Ribbed Dies per set: **$190.00**; Plain Dies per set: **$190.00**

sold in package quantities only

Manually - Operated Brass Ferrule Crimper

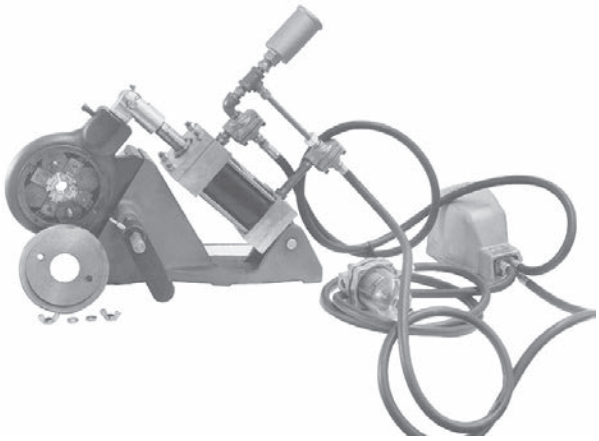

- crimps all brass ferrules shown on previous page
- Dies for ferrule machines are available in standard sets for all ferrules as tabulated (4 segments to a set).
- Dies are supplied with plain or ribbed crimping surface.
- does not include dies
- height: with handle upright 27"
- base: 8" x 3"
- body: 7-3/8"
- weight: 25 lbs.

Part #	Price/E
5111A	**$1770.00**

Air - Operated Brass Ferrule Crimper

- The mass production assembly of hose, ferrules and fittings is efficiently handled with this air-operated unit.
- The foot pedal permits the use of both hands, reduces fatigue and speeds production.
- complete with air cylinder, ferrule machine (less dies), fitted hose lengths and necessary control valves
- ready for work bench installation
- crimps all brass ferrules shown on page 328
- weight: 91 lbs.

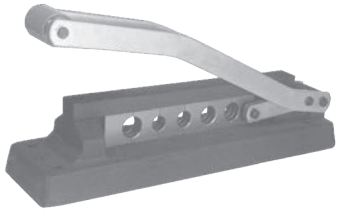

Part #	Price/E
1765A	**$8090.00**

Die sizes for ferrules and machine numbers 1765A and 5111A on page 328.

Hose Crimper

- 855 crimper with 5 dies for 31/64" (0.484") to 45/64" (0.703") OD hose
- 855A crimper with 5 dies for 28/64" (0.437") to 43/64" (0.671") OD hose
- optional dies up to 52/64" OD
- replacement dies: **$42.00**
- Hose crimper provides "big tool" crimping advantages at a fraction of the cost.
- rugged, portable and easy to use
- # 855 weight: 10 lbs.
- # 855A weight: 10 lbs.

Crimper Part #	Price/E
855	**$298.20**
855A	**309.20**

Large Hose Crimper

(Sold without dies)

- for crimping 1/2" to 1" ID hoses with larger OD's, from 11/16" to 1-1/2"
- crimps standard brass or aluminum ferrules
- order separate dies for each hose diameter
- weight: 10 lbs.

Polypropylene Non-Spill Chemical Transfer Couplings

The non-spill coupling virtually eliminates fluid loss upon disconnection. It is designed to help meet the demand for closed system transfer and dispensing of chemicals with minimal environmental contamination. The push-to-connect design allows ease of connection/disconnection and the flush valve enables ease of cleaning. They can be used with concentrated or diluted agricultural chemicals when transferring from bulk storage tanks, returnable containers, applicators, etc.

Materials:
- body - polypropylene
- springs - 316 stainless steel
- seals - chemical resistant fluorocarbon

Acetal Push-In Fittings

Construction:
- material - acetal copolymer
- O-ring - nitrile rubber
- three piece construction, body, collet and O-ring pre-assembled
- collets are produced with stainless steel locking teeth

Working Pressure and Temperature Range:
- temperature range: **-20°F** (-20°C) to **185°F** (85°C)
- maximum water pressure: ¼": **230 PSI**; 3/8" and ½": **170 PSI**

Advantages:
- FDA compliant and NSF 51 listed non toxic material
- Easy to install - no tools required. Easy to disconnect and reuse

Applications:
- Water conditioning, filtration, reverse osmosis, soft drink, beer and condiment dispensing equipment where no metal contamination can be present.
- Industrial applications include low pressure pneumatic, hydraulic and vacuum lines commonly used in packaging systems, robotics, machine tools, agricultural spraying, car and industrial wash systems and air logic systems.

PVC Tubing and Hose Cutters

- rugged construction permits cutting up to ¾" tubing or hose
- corrosion resistant hardened steel blade ensures straight, crisp cuts for optimum fit

Part #	Price/E
TC97	**$17.00**
TC97RB *(replacement blade)*	**5.75**

- cuts low pressure fabric reinforced hose up to 1" OD
- reversible blade

Part #	Price/E
HC90	**$26.55**
HC90RB *(replacement blade)*	**11.15**

- cuts hose and tubing up to 2" OD; Polyethylene up to 1½" ID; PVC up to 1¼" ID
- stainless steel blade

Part #	Price/E
LHC95	**$47.70**
LHC95RB *(replacement blade)*	**19.00**

Copper Tubing Cutters

Hi-Duty Tube Cutter

- for 1/8" through 1-1/8" OD tubing
- rugged aluminum alloy body is nickel chrome plated
- Foldaway hardened steel reamer with turned cutting edge removes burrs cleanly, filing surface removes outside burrs.
- includes 2 general purpose cutter wheels
- chromium steel cutting wheels
- replacement parts available, contact the factory for more information

Description	Part #	Price/E
length 5", weight 6.5 oz.	***TC-1000***	**$104.10**

Ratcheting Tube Cutter

- for 1/8" through 5/8" OD tubing
- use cutter with or without handle - snaps into place in seconds
- includes 1 general purpose cutter wheel
- Enclosed feed screw minimizes contamination ensuring continued smooth operation.
- corrosion resistant stainless steel rollers positioned at bottom of cutter allows for easier cutter engagement on tubing and smoother cutting action
- replacement parts available, contact the factory for more information

Description	Part #	Price/E
length with handle 4¾", weight 4 oz., 4" swing radius with handle	***TC-1050RH***	**$84.85**

Tube Cutter

- for 3/8" through 1-1/8" OD tubing
- includes 2 general purpose cutter wheels
- replacement parts available, contact the factory for more information

Description	Part #	Price/E
length 2-11/16", weight 5 oz., 1-15/16" swing radius	***174-F***	**$98.65**

Properties of Tuff-Lite Materials

Nylon fittings should not be used with acid-based fertilizers, bromine, chlorine, fluorine, hydrochloric acid, iodine, nitric acid, phosphoric acid, sulfuric acid or xylene. Made with material approved by FDA. Nylon should not be used with compressed gas. Parts are white.

SAFETY ALERT

Polypropylene fittings should not be used with aromatic hydrocarbons, carbon tetra-chloride, gasoline, hexane, kerosene, nitric acid, sodium hydrochlorite, toluene, trichloroethylene or xylene. Polypropylene should not be used with compressed gas. Parts are black.

SAFETY ALERT

Male Inserts

- Parts showing package quantities are sold in package quantities only.

Stepless® Ear Clamps

Technical Information:

Stepless® ear clamps hold against pressure and vibration or material shrinkage due to temperature changes or aging. A built-in spring action permits the clamp to breathe without loosening. When installing Stepless® ear type clamps over an object, please note that each ear must be crimped closed to obtain a proper seal.

- once installed and clamped, any tampering is easily visible
- *Clamps are not reusable*; they should not be pried open, doing so renders the clamps nonfunctional. SAFETY ALERT
- When ordering Stepless® ear clamps, select the nominal size nearest to, but always larger than, the outside diameter of the material to be clamped. The outside diameter should be determined with connection fully assembled.
- sold in quantities of 100 per bag

Features:

- 304 stainless steel
- ensured clamping seal
- for low durometer and/or thin-walled hose/tubing
- for silicon, vinyl, polyurethane or other high-tech materials
- Smooth inner band prevents damage to the hose while the tongue-in-groove design provides a 360° seal.
- no steps or gaps inside the clamp
- Install clamps using 1098 or 1099 clamp tools below.

Clamp Service Kit

Plastic kit box contains zinc plated 2-ear clamps:

- 15 of part #0709
- 15 of part #0811
- 15 of part #1113
- 15 of part #1315
- 15 of part #1518
- 12 of part #1720
- 12 of part #2023
- 12 of part #2225
- 12 of part #2327
- 1 pair of standard jaw pincers, part # 1098

Part #	Price/E
SK1098	**$184.70**

Clamp Construction Kit

Plastic construction clamp kit box contains the following:

- 50 of part #2225 (zinc plated, 2-ear clamps)
- 40 of part #2731 (zinc plated, 2-ear clamps)
- 6 hose menders (½", plastic)
- 1 pair of long handle pincers

Part #	Price/E
18500116	**$351.00**

Oetiker® Clamp Tools for Pinch-On Clamps

straight jaw

Part #	Price/E
9901	**$104.95**

standard jaw

Part #	Price/E
1098	**$61.10**

side jaw

Part #	Price/E
1099	**$74.55**

Dixon Worm Gear Clamps

- four-piece construction
- clamp meets SAEJ1508 which supercedes Mil Spec WW-C-440B
- screw design: 5/16" slotted hex head
- maximum recommended torque 50 in. lbs.
- *all clamps sold 10 per box*

Style HS material:
- band and housing: SAE 201/301 series stainless
- screw: SAE 1018 case-hardened, hex-free chrome zinc-plated steel

Style HSS material:
- band and housing: SAE 300 series stainless
- screw: SAE 300 series stainless

Aero-Seal® Liner Clamps

New for 2012

- The integral extension of the band as a liner (no rivets or welds) protects soft surface hose (silicone and others) from damage caused by extrusion or shearing through the band slots.
- screw design: 5/16 hex slotted hex head

Style DL material:
- band, saddle, housing: stainless steel
- screw: plated carbon steel

Style DLS material:
- band, saddle, housing: stainless steel
- screw: 410 stainless steel

HTM Hi Torque Clamps

- withstands more than three times the SAE torque requirements for worm-driven clamps
- eight screw threads are engaged in the band simultaneously for incredible torquing drive (over 150 in. lbs.), sealing pressure and vibration resistance
- slotted hex head screw design

Material:
- band and housing: 300 series half hard stainless
- screw: 410 stainless steel screw

Make-A-Clamp Kits

This is a maintenance clamp system in a box. By simply cutting off a piece of banding from a continuous roll, you can make any size stainless steel worm-driven clamp from 3" diameter and up. It is a must for anyone likely to encounter requirements for varying sized large clamps.

- reusable
- band width: 1/2"
- band thickness: .023"
- screw design: 5/16" slotted hex head
- band and housing material: 302 stainless, screw material: 410 stainless

Band Clamps - K series

The Universal Preformed Clamp

- can be center punched or rolled over, for use with the center punch or roll over tools located on page 351
- on stainless clamps, bands are 300 series stainless steel, buckles are 302 series stainless steel
- Fast-Lok™ tools: F1, F40, F100 (page 351)
- Super Strap Tools: 51960 screw action with 51970 adapter (page 352)
- Bandit®: S100 air tool with S180 Jr. head, C-001 hand tool with J001 Jr. adapter, S350 air tool with S260 Jr. head, T-240 for 3/8" only or T-250 for 3/8" and 5/8", S-38 for 3/8" and 5/8", J-102 Pok-It™ for 3/8" only.
- Punch-Lok® tools: P-1000 for 3/8" and 5/8", P-3000 for 3/8" only, P-38 for 3/8" and 5/8"
- sold in package quantities only

Dixon Smooth ID Clamps

As industrial hose made of stiffer, thinner thermoplastics replaces soft, spongy thick-walled rubber, a new generation of hose clamps has been developed to prevent leak problems. The smooth ID clamp is manufactured in a wide variety of widths, sizes and materials that provide a uniform, gap-free inside diameter, and strong holding power. For use with roll over type clamp tools and most common band clamp tools such as the 51960 and 51970 band tools on page 352.

Dixon Smooth ID Center Punch Clamps

Center punch clamps are double wrapped and locked with the conical punch of the F100 tool (page 351). Recommended for use in applications where conditions are highly corrosive.

- unique dimple design offers excellent sealing strength while maintaining radial compression
- heavy buckle provides optimal holding power
- ideal for thin wall hose
- low profile clamp
- clamp can be applied with the F100 hand tool located on page 351
- band width: 5/8"
- band thickness: .025"

Strap-Grip Saddles and Male Stems

Strap-Grip saddles are designed to provide greater resistance to end pull than conventional band clamps alone. The male fittings shown below are designed for use with Strap-Grip saddles. Cam and Groove fittings are available on page 60. Saddles are designed for use with 3/4" or 5/8" wide bands. A band clamp should first be applied to OD to seal the hose in sizes 3" and over. Then Strap-Grip saddles should be banded on top of initial clamps to anchor the fitting in the hose.

- measure hose OD accurately before ordering clamps
- Torque values for clamps are based on dry bolts. The use of lubricant on bolts will adversely effect clamp performance.

SAFETY ALERT

- Consult Dixon when using double bolt clamps on helical wire hose.

without saddles

Spring Hose Clamps

- Single wire clamps have the most effective holding force and clamping strength. The single wire concentrates the clamping force in one specific area around the hose.
- *Safety glasses should be worn when installing parts*. SAFETY ALERT
- sold in box quantity only

Spring Hose Clamp Pliers

Install single wire spring hose clamps quickly and easily using this simple hand tool.

- rugged construction
- easy to use, designed for efficiency

Part #	Price/E
SHCP	**$138.30**

Spiral Clamps

For use on convoluted cover hose. To determine which style clamp is needed for your hose look at the end of the hose; if the helix spirals in a clockwise direction away from you (along the hose), a clockwise clamp is needed. If the helix spirals in a counterclockwise direction away from you, a counterclockwise clamp is needed. Examples include, but are not limited to: Kuriyama convoluted hose uses counter clockwise clamps; Pacific Echo and Kana Flex use clockwise clamps; Goodyear uses both counter clockwise and clockwise. More than one clamp may be needed per size, contact the hose manufacturer for more information.

- due to fluctuations in the OD of hose each individual installation should be checked SAFETY ALERT

SAFETY ALERT

** Operating pressures for the standard hose barbs utilizing hose barb end connections may be dramatically reduced to that of the hose rating and/or hose and end connection combination. Consult hose manufacturer's catalog for hose end connection ratings. If in doubt, test under controlled conditions for suitability to application. Dixon cannot assume liability for misapplication of products resulting in equipment down-time, lost production, property damage and/or personal injury including death.*

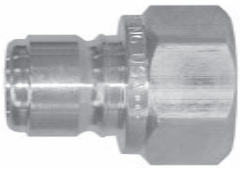

Straight Through Quick-Connect Fittings

These plugs have no internal valves, providing maximum flow with minimum pressure drop. Interchanges with Parker-Hannifin SST/BST, Foster FST and Hansen ST couplings. See Hydraulic Profile Chart on page 671.

- *Do Not Disconnect with pressure in line*. SAFETY ALERT

Steel Flow Control Valves

Series F

Two-step needle provides fine adjustments at low flow with the first three turns of the adjusting knob. The next three turns give full-open needle position and conventional throttling control. When flow is reversed, the heavy-duty poppet/retainer permits full-flow return capacity. Exclusive color-coded reference scale on the adjusting knob greatly simplifies flow setting, resetting, adjusting and return to an original flow. A simple set screw locks the valve on any desired setting.

- maximum operating pressure: **5000 PSI** at 70°F for 1/8" - 1/2", **3000 PSI** at 70°F for 3/4" - 2"
- also available in brass, see page 140

Thread Size	*Black Oxide Steel* Part #	Price/E
1/8"	***SFC200***	**$62.10**
1/4"	***SFC400***	**72.20**

1½"	New ***SFC2400***	**1370.65**
2"	***SFC3200***	**2718.10**

Series PF

Utilizes a ball type check that meters the flow of hydraulic oil in one direction and allows for free flow in the reverse direction. Recommended for use in non-shock applications.

- maximum operating pressure: **5000 PSI** at 70°F, **5 PSI** cracking pressure
- also available in brass, see page 140

Thread Size	*Zinc Plated Steel with a dichromate seal* Part #	Price/E
1/4"	***SPF400***	**$53.30**
3/8"	***SPF600***	**71.00**
1/2"	***SPF800***	**92.35**

Series N

Ideal for use as speed controls on hydraulic systems where a reverse flow check valve is not needed. Provides excellent control and reliable shutoff in a very small envelope. Color-coded reference scale on the adjusting knob simplifies setting, resetting, adjusting and quick return to a previous speed setting.

- maximum operating pressure: **5000 PSI** at 70°F for 1/8" - 3/4", **3000 PSI** at 70°F for 1" - 1¼"
- also available in brass, see page 140

Series MV

With these high-precision metering and shutoff valves, you can readily make fine adjustments and reset with the exclusive color code 5000 that shows when you reach the desired setting.

- body components are precision-turned from solid barstock
- all models have 416 stainless steel needles
- maximum operating pressure: **5000 PSI** at 70°F

Thread Size	*Steel* Part #	Price/E

Mini Needle Valves

Mini needle valves are available in a variety of materials, and handle options. A Viton® O-ring seal and a PTFE back-up ring below the threads protects the mini valve from corrosion and galling. The stem threads are rolled for strength and ease of operation, and the metal-to-metal hard seat design is 100% helium leak tested to 1 x 10-4 ml/s at 200 PSI on each mini valve.

- 1/8" and 1/4":

Industrial Hydraulic Quick-Connect Fittings

- The Industrial Quick Connect series features poppet style shut-off valves in both the coupler and the plug.
- designed to prevent fluid loss when the coupler is disconnected
- meets dimensional requirements of Series B in ISO 7241-1
- interchangeable with Parker-Hannifin 60 series
- seal material is Buna-N
- Contact the factory if you intend to use the fittings on a compressed air system.
- see Hydraulic Profile Chart on page 671

3000 Series Hydraulic Quick-Connect Fittings

Threaded union locking system and precision ball-type check valves are designed for extreme high pressure applications such as hydraulic rams and pumps where low flow and pressures up to 10,000 PSI are encountered. Interchanges with Parker 3000, Bruning IP 370 and Enerpac C 604. Seals are polyurethane. See Hydraulic Profile Chart on page 670.

Agricultural Hydraulic Quick-Connect Fittings

The Agricultural Quick-Connect features ball style shut-off valves in both the coupler and the plug. Agricultural series couplers are used on construction equipment, farm implements and most other mobile equipment. The International Standard Organization (ISO) has adopted specifications regarding dimensions and interchangeability. Interchangeable with Pioneer 4000 series, Safeway Agricultural series and ISO5675. See Hydraulic Profile Chart on page 671.

7800 Series Hydraulic Thread-to-Connect Fittings

Designed for applications requiring a coupling that can be connected under pressure with minimum spillage and air inclusion. Widely used on dump trailer wet-line hydraulic systems and oil field equipment. Not recommended for continuous hydraulic impulse applications. Interchanges with Aeroquip 5100 series, Parker 6100 series and Snap-Tite 78 series. See Hydraulic Profile Chart on page 670.

Blowout Prevention Safety

- fire tested and Lloyd's certified to 700°C (**1300°F**) in accordance with API 16D (Certificate #NAO 0601041/1)
- designed for hazardous area service where couplings are required to operate under fire conditions in an emergency
- Sleeve is cast using a unique process that provides better surface finishes, tighter tolerance control, and excellent repeatibility.
- Blowout Prevention Couplings are individually marked with the BOP series designation.

5600 Series Hydraulic Quick-Connect Fittings

The two-way check valves in the plug and socket automatically balance in flow position and provide instant shut off when disconnected. To connect, simply retract sleeve, insert plug, and release sleeve. Permits fast connection and disconnection of gas or fluid lines with minimal loss of media from either end. Interchangeable with the Aeroquip 5600, Parker 6600, and ISO A interchange. Non-valved, slotted valve and straight through units available on request. See Hydraulic Profile Chart on page 671.

Flush Face Hydraulic Quick-Connect Fittings

Flush face valve design minimizes fluid loss resulting in a cleaner, safer work environment. Automatic, push-to-connect couplings provide high flow with low pressure drop assuring maximum hydraulic tool performance. To reduce the possibility of accidental disconnect, a sleeve lock safety feature requires turning the collar to unlock the coupling. Conforms to ISO16028 interchange standard. Interchanges with Aeroquip FD89, Parker FE, Snap-tite 74, Faster FF and Holmbury Series A. See Hydraulic Profile Chart on page 670.

VH Series Hydraulic Quick-Connect Fittings

General purpose hydraulic quick-connect provides superior flow characteristics with built-in reliability. VH Series interchanges with Snap-tite H Series. Standard seal is Buna-N. See Hydraulic Profile Chart on page 670.

Hydraulic Water-Blast Quick Fittings

- plug mounted sleeve guard protects against accidental disconnection
- smooth bore full-flow design ensures maximum flow with minimal pressure drop
- Steel body components maximize service life by resisting the effects of brinneling and internal erosion.
- Heavy duty knurled sleeve with locking pin provides maximum protection against brinneling and accidental disconnection.

Note: return line clamps must be used with these fittings.

Clamps

- measure hose OD accurately before ordering clamps
- Torque values for clamps are based on dry bolts.
  The use of lubricant on bolts will adversely effect clamp performance.
- Consult Dixon when using double bolt clamps on helical wire hose.

Hydraulic Flange Adapters

Flange adapters for hydraulic systems make installation of components easier, especially in applications with limited space. Flanges are constructed with an O-ring seal to eliminate leakage. Flange adapters vary in size and are divided into Code 61 or Code 62. Pressures listed are at 70°F.

Hydraulic Pipe Swivel Adapters

- Hydraulic pipe swivel adapters are designed to prevent hose stress due to twisting during assembly.
- compact design provides ease of assembly in confining areas
- female NPSM swivel seals on a 30° seat
- male NPTF must have a 30° chamfer to seal

Holedall Coupling Machines

Rams securely attach Holedall couplings to hose. Five machines meet every hose service requirement.

Rams, are powerful finely engineered machines designed specifically to externally swage and internally expand Holedall couplings by hydraulic pressure. Since each ram generates all the hydraulic pressure required to attach the Holedall coupling, one person can easily operate the equipment.

15 Ton Ram

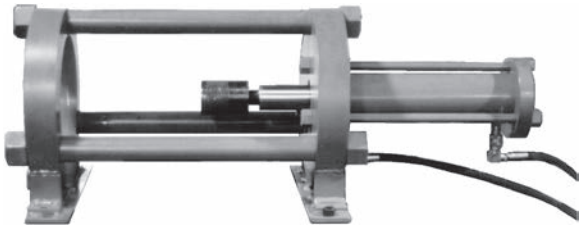

Specially designed ram for internally expanded couplings only. Bench mounted model (optional stand available), producing up to 10,000 PSI, for up to 15 tons of ram force. Capable of expanding 1" through 3" steel fittings and ¾" through 4" brass Holedall Petroleum fittings. The motor is ½ h.p., 115 volt 60 cycle, single phase with foot pedal.

25 Ton Ram

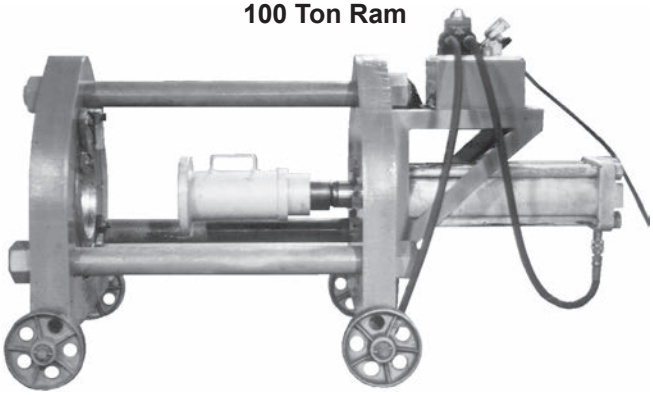

Free standing model producing up to 10,000 PSI of line pressure for up to 25 tons of ram force. Capable of external swaging ¼" through 4" ID hose and internal expanding 5/8" through 4" ID hose, with proper equipment. The motor is ½ h.p., 115 volt 60 cycle, single phase with foot pedal. High speed pump kit option is available.

50 Ton Ram

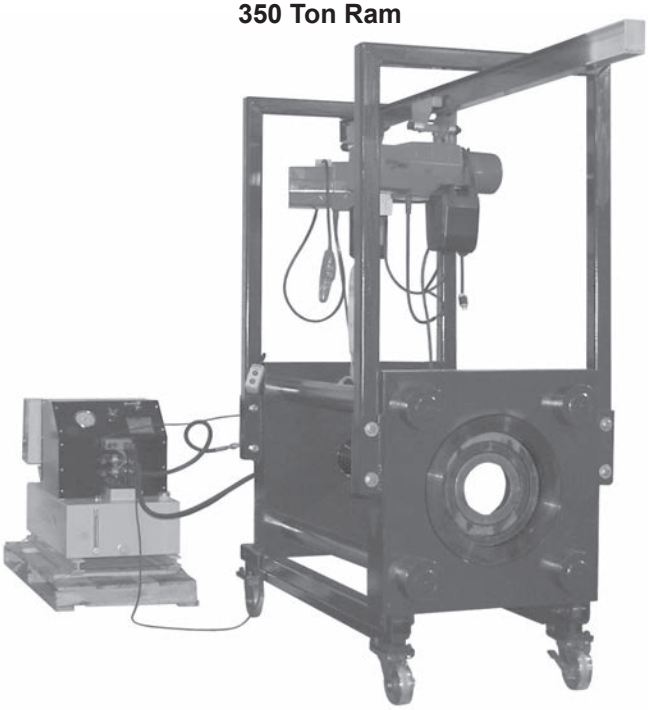

Bench mounted model (optional stand available), producing up to 10,000 PSI, for up to 50 tons of ram force. Capable of external swaging 1¼" through 6" ID hose and internal expanding 5/8" through 6" ID hose, with proper equipment. A 1-1/8 h.p., 115 volt, 60 cycle, single phase motor is standard with remote, (220/440 volt motors are available).

100 Ton Ram

Used for externally swaging Holedall fittings to hose from 1¼" through 10" ID With optional accessories, this ram may be used for internally expanded couplings on hose from 1¼" through 6". This machine is capable of producing up to 100 tons of ram force. A 1-1/8 h.p., 115 volt, 60 cycle, single phase motor is standard with remote, (220/440 volt motors are available).

350 Ton Ram

Used for externally swaging Holedall and Rotary fittings. This ram is capable of producing up to 354 tons of ram force for swaging. A 14" 150 lb. flange will fit through the bed plate. This ram has 36" of stroke. A 12.5 h.p., 230 volt, 60Hz, 3 phase motor is standard with remote.

All Rams require dies of the proper size to reduce the ferrule to the proper diameter for a good grip on the hose. Pushers of the proper size must be used on the end of the Ram to push the Holedall fitting through the die. Die and pusher selection depends on the sizes and types of hoses being coupled. Ferrule recommendations and a Die Chart binder are available upon request. Consult your Dixon representative for specific details.

Recommended Working Pressures

SAFETY ALERT

Holedall couplings, regardless of coupling style, are never to be used for steam service at any pressure. Holedall fittings listed below are not to be used with cable reinforced high-pressure hose, 4 or 6 braid wire hydraulic hose or any other service not listed in recommendations. In addition, Internally Expanded Holedall couplings are not to be used with plastic lined chemical hose. Consult Dixon for recommendations on usage.

Holedall couplings (Externally Swaged), to perform satisfactorily, must be applied properly in accordance with Dixon's assembly procedures, using correct die and ferrule for that particular hose end OD. Dixon's Die and Ferrule Recommendation Guide is to be used to select correct dies and ferrules. If you do not have the updated Die and Ferrule Recommendation Guide, consult the Dixon factory. Strict adherence to ferrule OD range (Internally Expanded) for each hose end to be assembled is essential for satisfactory performance.

Note: Hose service working pressure (including surges and spikes) is never to exceed the maximum recommended working pressure for the fitting (reference chart below)*. Media being transported through the hose should be compatible with the stem material. Compatibility of ferrule material with the environment in which it will be used is recommended. Consult Compatibility Chart on pages 635-640 or the Dixon factory for material compatibility. For applications other than the ones listed, please consult the Dixon factory.

[1] maximum recommended working pressures, in PSI, at **70°F** ambient temperature

* The assembly's (hose + coupling) maximum working pressure is the lesser of:
1) The hose rated working pressure, or
2) The coupling rated working pressure

** For hoses which use IXF48-3 to IXF48-5 and IXF64-2 to IXF64-5, consult the Dixon factory for working pressures. See notes below for specific recommendations.

Standard Fittings

Recommended for use on most one and two wire braid reinforced hoses, fiber reinforced (braided or spiraled) with or without helical wire such as: oil suction and discharge hose, barge and dock loading and unloading hose as well as L.P. gas hose, anhydrous ammonia hose, acid chemical hose and high pressure air and water hose.

Long Style Fittings

Recommended for use on hose as listed under standard fittings where additional retention is required due to higher working pressures or end pull. Consult maximum working pressure chart or call the Dixon factory.

Holedall II Fittings

Recommended for Royalflex 1193 and 1196 hose or hoses with similar construction, having helical wire for a given OD range.

Light Duty Fittings

Recommended for use in the same applications as standard fittings above where lower working pressures are encountered. Consult maximum working pressure chart or consult the Dixon factory.

Internally Expanded Fittings

Recommended for concrete placement, grout and plaster, food, dairy, pharmaceutical as well as other applications where increased flow capacity is important. Consult maximum working pressure chart or call the Dixon factory for additional application and working pressure information.

Holedall External Swage Coupling System

The Holedall coupling system provides outstanding strength, durability and safety.

The Holedall system is a method of attaching couplings to hose utilizing a progressive swage. The patented Holedall couplings include a Holedall stem and a specially engineered ferrule. The hydraulic swaging of the coupling to the hose is accomplished by pushing the ferrule through a die which reduces the ferrule OD, thus providing a 360° uninterrupted compression band around the hose.

A hydraulic ram is the only piece of machinery necessary to accomplish the coupling. Available in five different sizes - 15, 25, 50, 100 and 350 ton - these rams will accommodate dies and pushers of various sizes so that hoses up to 10" in diameter may be coupled.

This multi-purpose, high pressure coupling system requires no bolts and results in a clean coupling with no protrusions. The swaging operation is fast and hose of various lengths and different styles can be coupled. Ease of operation, flexibility and economy make the Holedall method an unequalled assembly system.

The Holedall coupling - the most adaptable coupling available.

Holedall couplings provide long-lasting efficiency and safety.

Couplings are available in stainless steel and carbon steel.

Couplings are furnished with pipe thread, plain end, victaulic grooved or flanged ends.

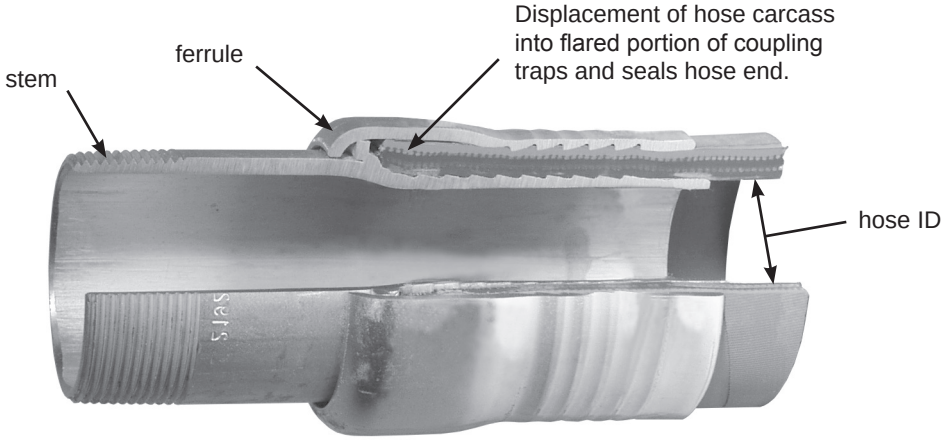

Dixon Holedall stems and ferrules are specifically designed to be used together as a coupling system.

SAFETY ALERT

Due to differences in dimensions and tolerances, for safety reasons, do not use other manufacturer's stems or ferrules with Dixon Holedall products.

SAFETY ALERT

Streamlined, lightweight coupling consisting of ferrule and stem.
No protrusions to snag on equipment.

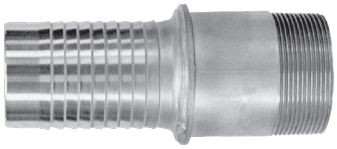

Cross-section of holedall externally swaged assembly

External Swage Stems

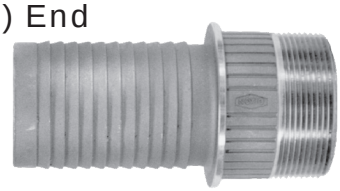

- Designed for hose ID's 1¼" - 10". The ferrule size depends on the hose OD. Consult the next page for selection of the correct ferrule. Stems are supplied in plated carbon steel and 316 stainless steel.
- for higher working pressure applications use long style stems and ferrules

External Swage Ferrules

The selection of ferrules is very important to achieve the proper coupling-to-hose assembly.

- ferrules are plated carbon steel
- style F ferrules are used with all standard length male stems
- style FL ferrules are extra long and are used with all long style stems

Holedall II External Swage Ferrules

For use with Royal-Flex™ thin wall hose. These specially designed carbon steel ferrules have serrations on the outside and should be used with stem styles TM, TP and TG stems on page 394.

External Swage Notched NOS Stems and Ferrules

- The largest advantage of the notched design is that the coupling can be removed from a damaged hose by cutting away the ferrule, without necessarily damaging the fitting. *After inspection of the fitting to determine its suitability for reuse,* it can be reinstalled into another hose by using a *new ferrule*. SAFETY ALERT
- The notched system allows you to better manage your inventories. You can stock one stem and two ferrules, and cover the same hose range with less inventory. *You must purchase a fitting and the matching ferrule to create an assembly*. SAFETY ALERT
- For hose outside diameters of 2-4/64" and below, *the couplings are crimp only*. SAFETY ALERT
- For hose outside diameters of 2-5/64" and above, the couplings can be crimped or swaged.

- See page 39 for cam and groove style notched NOS fittings.

STC200NOS

RST150NOS

SAFETY ALERT

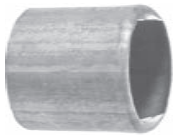

Only use the NOS shank with the NOS ferrules.
Due to differences in dimensions and tolerances for safety reasons,
do not use other manufacturer's stems or ferrules with Dixon Holedall products.

External Swage Uni-Range Male Couplings

Designed for smaller hose systems, these couplings may be used for hose ID's of ¼" - 1" and come complete with factory assembled stem and ferrule combination.

- can be swaged or crimped
- other hose OD's available, consult the factory
- stainless steel stems are investment cast

- plated carbon steel stem and ferrule

External Swage High Pressure Couplings

These couplings are for services requiring a fitting which will withstand extremely high pressures (up to **3,000 PSI** at 70°F) and severe operating conditions, such as on small and medium size drilling rigs, used for slim hole, core drill, workover, seismograph, water well, blast or shot holes, etc. These long, rugged fittings are machined from seamless pipe and tubing with specially designed serrations. The mating ferrules are machined from heavy wall material incorporating matching serrations. These couplings are shipped with matching ferrules. Please provide hose OD when ordering for properly sized ferrule. Make sure both ends of the hose are measured for OD. Must be swaged with 50 Ton or 100 Ton Ram.

- An accurate hose OD must be provided to complete the part # and to ensure proper retention.
- The LM fittings are sold as a complete coupling, including stem and ferrule.
- API and NPT sizes are interchangeable

Stem and Ferrule Complete Assemblies

Holedall Internal Expansion Couplings

The Dixon Internally Expanded Couplings are essential when maximum flow is important. Only one expansion tool is needed for each hose ID. Some recommended applications of these fittings are: concrete pump hose, plaster and grout hose, oil suction and discharge hose, multi-purpose heavy duty air hose, jetting hose, barge loading hose and bottom loading hose.

Benefits of Internal Expansion Fittings:
- maximum flow of media
- reduction of turbulence through hose
- excellent sealing and retention characteristics
- outperforms band clamps
- easy and consistent installation

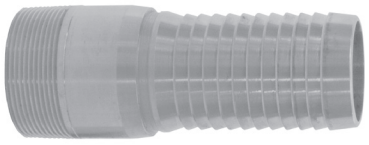

End Configurations Available:
- male NPT
- raised California
- victaulic
- others available on request

Dixon Holedall stems and ferrules are specifically designed to be used together as a coupling system.
SAFETY ALERT
Due to differences in dimensions and tolerances, for safety reasons, do not use other manufacturer's stems or ferrules with Dixon Holedall products.
SAFETY ALERT

Clamps for IXH Raised End (California Style) Stems

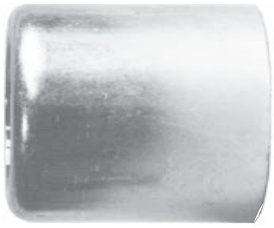

Cast steel clamps for fast assembly when connecting heavy-duty raised end fittings used for concrete. These clamps can be used to connect the ends of pipes or hoses which use the Raised End or California style fittings listed above. Shipped with double lipped gasket and safety pin. All sizes are painted green. Clamp should only be used with safety pin in place.

[1] For hoses using ferrule sizes IXF48-3 thru IXF48-5 and IXF64-2 thru IXF64-5, consult the factory for working pressures.

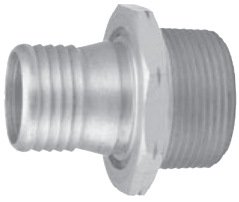

Internally Expanded Permanent Couplings - Scovill Style

SAFETY ALERT Do not interchange with other manufacturer's fittings. SAFETY ALERT

Brass internally expanded permanent couplings are recommended for discharge and suction service. Commonly used in the transfer of fuel to homes, airplanes, ships, etc. The working pressure of the 520-H fitting varies with the size of the fitting, the size and construction of the hose and the media being conveyed. Consult the factory for recommendations. Dixon Holedall stems and ferrules are specifically designed to be used together as a coupling system.

Both the male and female have octagonal facets for tightening with a wrench. The female in 1½" and larger sizes has lugs for tightening. The stem is expanded to nominal ID of hose for a rigid, uniform, full-flow area.

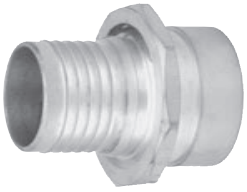

- Male and female stems are machined from bar stock or solid brass forgings; ferrules are available in brass and stainless steel.
- Couplings are compact, light and streamlined to eliminate catching on curbs and shrubs.
- The H520 fittings are designed for internal expansion only.
- Couplings are pre-lubricated for assembly.
- Hand and electrically operated installation equipment is available. Consult factory for pricing and availability.

Note: The fittings on this page are intended for fuel delivery service. See page 402 for information on API 1529 certification.

520-H Ferrules

A wide range of 520-H ferrules permits a perfect assembly of a coupling to a corresponding size of hose within commercial tolerances regardless of wall thickness. Eliminates need for large stock of coupling bodies. Consult Dixon for other hose OD's.

Permanent Couplings for Pump Hose

The most economical and trouble-free couplings for gas pump hose. Serrations on the stem become imbedded in the hose eliminating wicking and leakage. The shell extends beyond the stem to prevent cutting of interior walls. Tapered ends of stem and shell protect hose when flexed.

- Couplings provide tamper-proof static connection which cannot be broken without completely damaging coupling and hose.
- internal expansion of stem to nominal ID of hose provides full flow
- Broad, firm grip of coupling extends hose life by making it possible for hose to withstand more flexings.
- Hand and electrically operated installation equipment are available. Consult factory for pricing and availability.
- **Caution**: *Reattach static wire if required.* SAFETY ALERT

HB Coupling Expander Machine

- hand operated, pull-through type expander
- for use in a fixed location for small production runs or as a portable repair type expander
- attaches sizes ¾" through 2" of the 520-H Series couplings, and all sizes of 570-H and 580-H Series couplings
- expander tooling sold separately

Dubl-Grip® Re-attachable Couplings for Curb Pump Hose

Two-piece re-attachable coupling made of chrome-plated brass for pump hose. Streamlined design prevents damage to hose and fits smartly on new pump equipment. Wide, flat surfaces of body threads protect inside of hose from breaking. Tapered surfaces of sleeve and body cradle hose, prevent one-point strain from flexing. Hose is gripped on its full circumference in two places, ensuring a rigid leakproof connection.

- couplings have standard male NPT threads
- worn portion of hose can be removed and Dubl-Grip® can be reapplied
- easy assembly:
  Hose is held in position by sleeve as body is threaded home.
  Only a wrench is required to assemble the Dubl-Grip®.
- **Caution**: *Reattach static wire if required.* SAFETY ALERT

CIP Internal Expansion (IX) Sanitary Style Hose Couplings

- **Clean-In-Place** (CIP) compliant
- Flow Chief internal expansion (IX) fittings are only to be used with Flow Chief stainless steel ferrules.
- Flow Chief Sanitary fittings are used in the food, dairy and beverage industries.

Sanitary Clamp End Stems

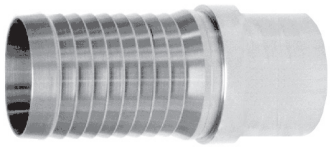

- see pages 421-425 for sanitary style gaskets
- see pages 408-409 for sanitary style clamps
- special plug is required to expand CIP compliant fittings
- special adapter plate is required to expand 1½" CIP compliant fittings
- 3A compliant when assembled by 3A authorized hose shop

Clamps

Service pressure ratings are based on the following parameters: matching elastomer gaskets and weld ferrules properly aligned and assembled with the clamps tightened to the required torque (**25 in. lbs.**). Tests are done hydrostatically with no water hammer or shock loads. Please note the pressure ratings of the described unions are above the recommended pipe line operating pressures.

Accessories

Spring Loaded Nut - *13SLN*

- Lines using PTFE gaskets that are subject to large temperature swings can benefit from this special product. As the PTFE is compressed through the cycling of the lines, the spring load will help keep the connection from leaking.
- If the lines suffer from vibration and bolted clamps are not an option, refitting single pin clamps with this nut will keep the connections from leaking for a longer time than the standard wing nuts.
- If you transport material in tanks via truck, the vibrations can loosen the standard single pin clamps. Spring loaded nuts can add a level of insurance to the shipment.
- *Note:* can be used on all wing nut style clamps

Thread	A	B	*304 Stainless Steel* Part #	Price/E
5/16 - 18	1.73	.875	***13SLN***	**$99.40**

* torque to 50 in. lb.

Torque-Rite® Nuts - *13TR*

- an audible "*click*" indicating correct inch/pounds force
- maintains constant 30 or 50 inch/pounds force
- manual override feature
- retrofits all sanitary clamps, ¾" through 12"
- works in rupture disk applications
- no torque wrench or special training required

Description	Part #	Price/E
Torque-Rite® 30 in. lb nut	***13TR-30***	**$309.25**
Torque-Rite® 50 in. lb nut	***13TR-50***	**309.25**

SAFETY ALERT

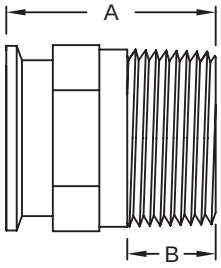

Use of PVC tubing requires special techniques to prevent leakage. All assembly work must be done with heated tube. Cold durometer is 90 as opposed to rubber hose at 65 to 70 durometer. Banding buckles must be at 180° from one another.

Clamp Gaskets

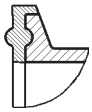

Gasket material approved by 3A (3A), USDA and complies with FDA's 21CFR177.2600 and 1550. PSI Service Ratings for the sanitary clamps *DO NOT APPLY* to connections (1" and above) using any PTFE gaskets, due to the potential for cold flow under normal operating conditions. PTFE gaskets, when used with any clamp, are likely to leak at pressures far below the published service ratings. This restriction *does not apply* to the fractionally sized ½" and ¾" connections, due to their recessed, fully contained design.

Mini

Metal Detectable Clamp Gaskets

Metal detectable gaskets are impregnated with stainless steel particles. The addition of stainless steel allows a gasket or gasket pieces to be found with metal detection equipment.

Buna-N

Size	Part #	Price/E
1"	***40MP-UZ100***	**$3.75**
1½"	***40MP-UZ150***	**3.50**
2"	***40MP-UZ200***	**3.80**
2½"	***40MP-UZ250***	**5.90**
3"	***40MP-UZ300***	**6.40**
4"	***40MP-UZ400***	**6.45**

Type 1 - Standard
1" and larger

- minimum temperature: **-20°F**
- maximum temperature: **212°F**
- good general use where temperature extremes do not exist

EPDM

Size	Part #	Price/E
1"	***40MP-EZ100***	**$5.25**
1½"	***40MP-EZ150***	**5.10**
2"	***40MP-EZ200***	**5.35**
2½"	***40MP-EZ250***	**6.95**
3"	***40MP-EZ300***	**7.70**
4"	***40MP-EZ400***	**10.20**

Type 1 - Standard
1" and larger

- minimum temperature: **-70°F**
- maximum temperature: **310°F**
- excellent base, steam and water resistant

Viton®

Size	Part #	Price/E
1"	***40MP-SFYZ100***	**$11.70**
1½"	***40MP-SFYZ150***	**11.25**
2"	***40MP-SFYZ200***	**11.55**
2½"	***40MP-SFYZ250***	**17.40**
3"	***40MP-SFYZ300***	**23.60**
4"	***40MP-SFYZ400***	**30.50**

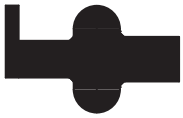

Type 1 - Standard
1" and larger

- minimum temperature: **-20°F**
- maximum temperature: **410°F**
- provides high acid, steam and heat resistance

Clamp Gaskets

Buna-N Flanged Clamp Gaskets - *Black*

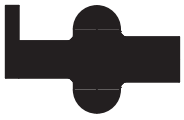

Type 2 - Flanged
1" and larger

- color code: red dot
- meets 21CFR 177.2600
- not recommended for use with bolted clamps

4"	1.675	4.000	***15R-G400***	**82.80**

Bevel Seat End Caps

Plain Bevel Seat Solid End Caps - *16A*

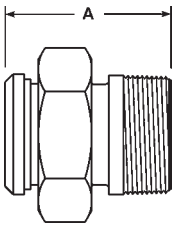

Tube OD	Dimension A	*304 Stainless Steel* Part #	Price/E
1"	1.312	***16A-G100***	**$9.55**
1½"	1.843	***16A-G150***	**16.85**
2"	2.375	***16A-G200***	**25.30**
2½"	2.906	***16A-G250***	**33.80**
3"	3.437	***16A-G300***	**49.55**
4"	4.500	***16A-G400***	**89.30**

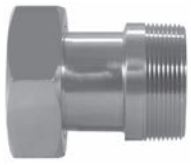

Bevel Seat Adapters

Plain Bevel Seat x Male NPT Adapters with Hex Nut - *14-19*

Tube OD	Dimension A	*304 Stainless Steel* Part #	Price/E
1½"	3.250	***14-19-G150***	**$380.40**
2"	3.312	***14-19-G200***	**463.45**
3"	4.250	***14-19-G300***	**557.80**

- hex nut is CF8 (304 stainless steel)

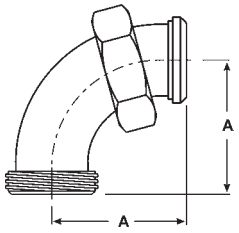

Bevel Seat Elbows

Threaded Bevel Seat x Plain Bevel Seat with Hex Nut 90° Elbows - *B2F* A3

Tube OD	Dimension A	*304 Stainless Steel* Part #	Price/E
1½"	2.968	***B2F-G150***	**$246.25**
2"	3.750	***B2F-G200***	**255.95**
2½"	4.625	***B2F-G250***	**286.65**
3"	5.406	***B2F-G300***	**344.55**

- hex nut is CF8 (304 stainless steel)

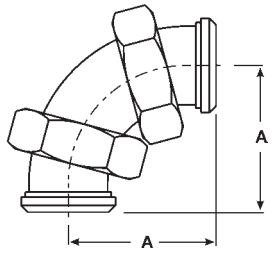

Plain Bevel Seat x Plain Bevel Seat with Hex Nut 90° Elbows - *B2E* A3

Tube OD	Dimension A	*304 Stainless Steel* Part #	Price/E
1½"	2.968	***B2E-G150***	**$243.60**
2"	3.750	***B2E-G200***	**305.20**
2½"	4.625	***B2E-G250***	**321.05**
3"	5.406	***B2E-G300***	**449.15**

- hex nut is CF8 (304 stainless steel)

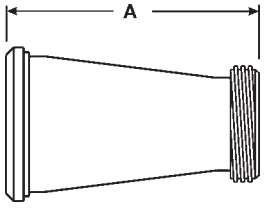

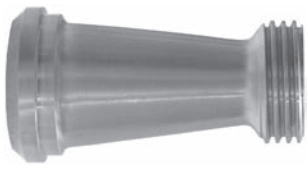

Bevel Seat Reducers

Plain Bevel Seat x Threaded Bevel Seat Concentric Reducers - *B3115F* A3

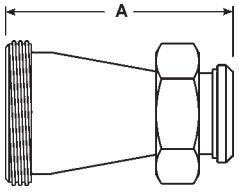

Tube OD	Dimension A	*304 Stainless Steel* Part #	Price/E
2" x 1½"	3.468	***B3115F-G200150***	**$163.80**
2½" x 2"	3.625	***B3115F-G250200***	**183.80**
3" x 2"	5.656	***B3115F-G300200***	**227.70**
3" x 2½"	3.781	***B3115F-G300250***	**283.40**
4" x 3"	5.937	***B3115F-G400300***	**331.45**

Threaded Bevel Seat x Plain Bevel Seat with Hex Nut Concentric Reducers - *B31TP* A3

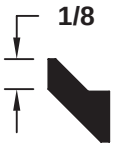

Tube OD	Dimension A	*304 Stainless Steel* Part #	Price/E
2" x 1½"	3.468	***B31TP-G200150***	**$193.05**
2½" x 2"	3.625	***B31TP-G250200***	**219.10**
3" x 2"	5.656	***B31TP-G300200***	**288.35**
3" x 2½"	3.781	***B31TP-G300250***	**325.95**
4" x 3"	5.937	***B31TP-G400300***	**395.35**

Bevel Seat Gaskets

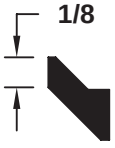

Buna-N Bevel Seat Gaskets - *Black*

- color code: red dot
- meets 21CFR 177.2600

Size	Part #	Price/E
1"	***40BS-O100***	**$1.65**
1½"	***40BS-O150***	**1.40**

SAFETY ALERT

Use of PVC tubing requires special techniques to prevent leakage. All assembly work must be done with heated tube. Cold durometer is 90 as opposed to rubber hose at 65 to 70 durometer. Banding buckles must be at 180° from one another.

Spray Balls

Rotating Spray Balls

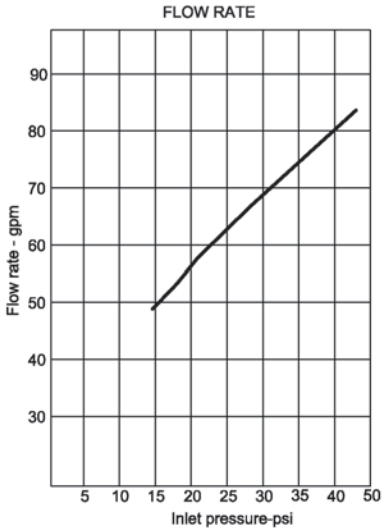

- 304 / 316L stainless steel
- stainless steel ball bearings eliminate rust
- ideal for cleaning all types of tanks and vessels
- cleaning solution lubricates unit
- mirror-like finish (ID/OD)
- spray pattern: 360°
- connections available: clamp and NPT

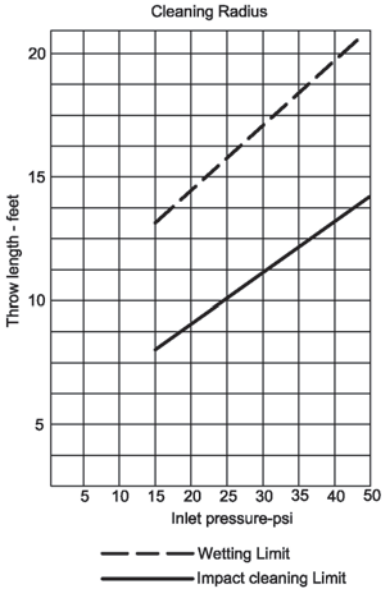

Size	Type	A	B	*304 Stainless Steel*		*316L Stainless Steel*

Technical Data

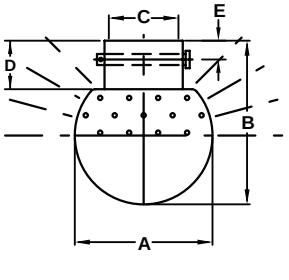

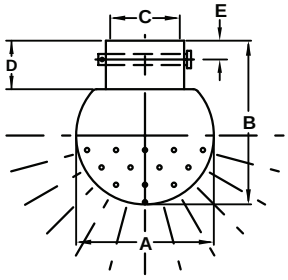

Spray Balls

Fixed Spray Balls

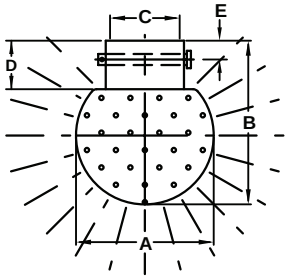

180° Top Pattern

180° Bottom Pattern

360° Pattern

- 316L stainless steel
- heavy stainless steel construction provides longer life
- various spray patterns available (blanks available as special order)
- stationary - designed to be mounted to a tube or pipe
- typical use is in food and beverage industries for cleaning storage tanks
- 2 mm spray holes

Technical Data

Bradford™ Filters / Strainers

3-A 10-4 1446

Product Specifications

Size range:
- 1" - 3" clamp

Type:
- Inline
  - > short
  - > long
- Side Entry
  - > long

Material:
- 316L stainless steel

Finish:
- 3A sanitary, ID and OD

What Are Filter / Strainers Used For?

Filter Definition
A filter uses a disposable media to remove finer particulate from the stream. Dixon Sanitary holds Authorization Number 1446 for the 3-A Sanitary Standard for Filters using Single Service Filter Media, Number: 10-4.

Strainer Definition
A strainer is a device used to separate solids from fluids. Here it is used for larger particulate matter from liquid or gas. It uses cleanable media.

Full Flow Filters -
Can be equipped with a variety of filtering media, down to 40 microns, media includes polyester, cotton cheesecloth and nylon mesh.

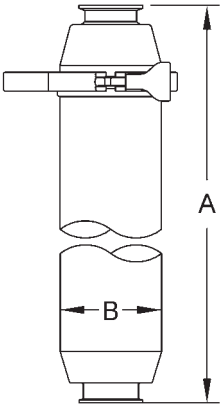

Full Flow Coarse Strainers -
1/4" or 1/8" perforations.

Full Flow Fine/Medium Strainers -
Can be equipped with a variety of mesh screens for removing finer particles (20 to 1130 mesh).

Bradford™ Filters / Strainers

In-line Filter / Strainer - *BSCCQ*

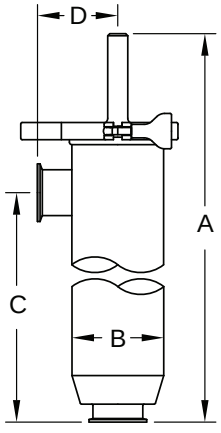

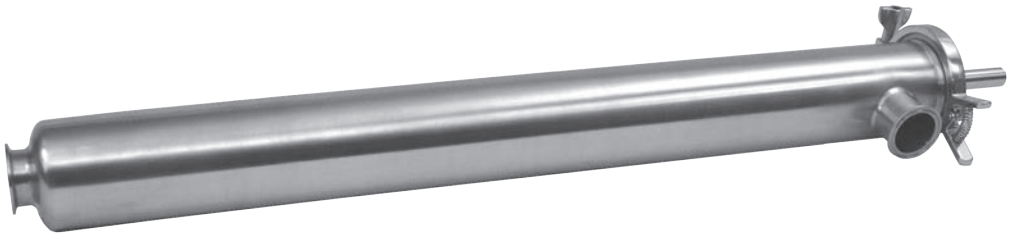

- In-line units ship standard with the following: spring, distributor cap, clamp gasket, 1/4" perforated back-up tube, inlet and outlet bodies and squeeze clamp
- 1/8" perforated back-up tube available, must specify when ordering
- Bevel seat, I-line and weld ends available, call Dixon Sanitary at 800.789.1718 for information

2-Way 3 Piece Encapsulated Ball Valves

- ½" - 2" rated at **1,000 PSI** WOG; 2½" - 4" rated at 800 PSI WOG
- balanced encapsulated construction minimizes cold flow
- live loaded stem packing
- precision stainless steel balls reduce torque and friction losses while extending seat life
- operating parts are stainless steel type CF8M (316) conforming to ASTM A351, (MTRs available upon request)
- integral ISO 5211 mounting pad
- ID polish is Ra 32 minimum
- lockable handle can prevent accidental actuation
- standard internal entry blow out proof stem design
- full port design matches ball and seat ports to tube ID for lower pressure drop and less turbulent flow
- compact design for areas with tight space restrictions
- fully encapsulated construction produces bubble tight seal
- identification tagging available
- virgin PTFE seats

Non-Encapsulated 2-way 3 Piece Stainless Steel Ball Valves

New for 2012

- blow-out proof stem
- live-loaded stem packing
- 15% glass reinforced PTFE seats
- CF8M stainless body, ends and ball
- ID polish is R_a 32
- lock-out, tag out
- rated to ½" - 2" **1,000 PSI** WOG
  2½" - 4" **800 PSI** WOG

Butterfly Valves

In addition to a variety of end and seat configurations this butterfly valve also has four handle options.

A. The *pull style handle* allows you to set the valve in four different positions simply by pulling and turning.
B. The *infinite handle* has incremental marks on the top which can be used when needing a throttling valve.
C. The stainless steel *trigger handle* offers twelve positions which make it easy to understand how to actuate the valve.
D. The push style handle allows you to set the valve in four different positions simply by pushing down and turning.

- 100% tested / 100% inspected
- 100% pressure hydraulic tested for reliability
- wetted surfaces polished to 3-A standards
- various end configurations available: weld, I-line, Q-line, bevel seat and John Perry
- actuation available: double-acting, air-to-spring, electric
- vacuum rating: 14.2 PSI at 68°F
- temperature range: **15°F** to **200°F**
- clamp style is standard

Clamp Butterfly Valves

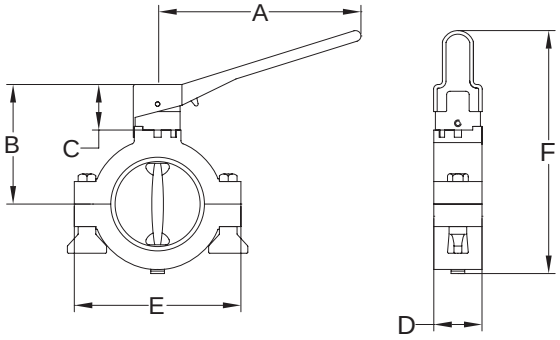

- valve is only 1-3/8" wide on all sizes
- valve uses only 3/4" of line space
- the grooved clamp housing connects directly to any sanitary clamp style fitting
- Easy assembly requires a hex key for the handle and wing nuts to secure and seal the housing onto lines.
- actuation available: double acting, spring return and electric

Spring Check Valves

3A 1447

This spring check valve is machined and polished to 3A standards. The clamp assembly design allows quick and easy maintenance and has a special angled plunger design to prevent even low pressure leak-through.

- maximum operating pressure: **145 PSI**
- operating temperature range of **15°F** to **200°F**
- full size flow plate with a long bushing helps minimize stem wear

Ball Check Valves

When liquid flows through the valve, the ball is forced into the branch of the valve allowing full fluid flow. When the liquid stops, equalizing the pressure, the ball drops back into the seat, preventing backflow. Should reverse flow occur, the differential pressure will cause the ball to seal firmly against the seat preventing leakage.

- maximum operating pressure: **250 PSI**
- maximum operating temperature: **250°F**
- two piece construction for easier alignment during installation
- various end configurations available: clamp,weld, I-line, Q-line, bevel seat and John Perry
- polished ID and OD to 3A standards
- all metal contact surfaces of 316L stainless steel construction
- air blow check valve can be added (see air blow for sizing)
- PTFE ball

Air Blow Check Valves

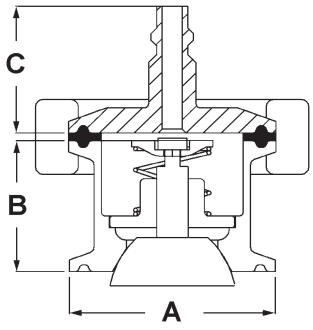

The air blow check valve is designed to pressurize lines with air to clean out product or cleaning solutions. It is fail-safe because the simple air-to-open, spring-to-close mechanism prevents backflow. Can be used with a ball check valve. The valves are available with three different end configurations to allow quick assembly and disassembly when replacing filter media, cleaning or inspecting. Conforms to 3A accepted practice 604-05 for supplying air under pressure in contact with milk products and product contact surfaces with optional filter disc.

- EPDM seat and gasket
- conforms to 3A practice 604-05
- filter discs sold separately in packs of 50

Dixon Sanitary's commitment to excellence and continuous research and development for improving product quality may warrant periodic changes in design and specification. We reserve the right to modify product design without prior notification and without incurring any liability to provide these modifications to products previously purchased.

Bradford™ High Purity BioPharm Fittings

A 63-03 3 621

Specifications

All fittings are manufactured to meet the latest edition of the ASME BPE International Standard, bioprocessing equipment.

316L stainless steel material and dimensions meet all orbital welding specifications with controlled sulphur.

Markets

- pharmaceutical
- bioprocessing
- semiconductor
- cosmetics
- food processing
- beverage

Packaging

Product markings per ASME BPE 2009 DT-14.1

- Job number
- 316L
- Bradford™ part number
- Heat number(s)
- Surface finish code
- ASME BPE

Per the specification, the size of the fitting may limit the space available for markings. When this occurs, the markings starting at the bottom of the list are not applied. The Bradford™ part number will describe the part configuration and size.

MTR (material test report) certifications are included inside the resealable bag with each fitting. The MTRs are traceable through the Job Number found on each fitting. All fittings are capped to prevent damage and contamination.

For easy identification each finish will have a different color cap.
PL finish - SF1...blue caps
PM finish - SF4...white caps

Material test reports are also available from the Dixon Sanitary website (bradfordfittings.com); just enter the job number located on each fitting.

Style Brute X-Pander

Compact Hand Pump

- designed for forestry service, fire departments, small distributors and ski areas
- All-in-one design means fewer parts and no hydraulic connections making the X-Pander reliable and service free.
- may be used to attach 1" through 3" couplings
- ideal for in-house use or mounted in a service van for field repairs
- size: 13" wide x 17" deep x 10" high
- weight: 45 lbs.

Part #	Price/E
BruteXpand	**$8420.60**

Note: Brute expanders *do not* include any expansion unit assemblies. They must be ordered separately.

Expansion Unit Assemblies

Description	Part #	Price/E
1½"	***16154***	**$1132.20**
2½" (Storz also)	***16171***	**1098.75**

For a complete list of all available expansion units and sizes contact the factory for assistance.

Synthetic Mill Hose

Ideal for open end discharge applications. ***Not intended for fire fighting service.***

Outer construction:
single jacket, all polyester

Tube construction:
black, natural rubber liner

Consult the factory for pricing and availability for any of the following features:

- 75' lengths
- other threads and configurations

rated pressure: **250 PSI** *
working pressure: **112 PSI** *
* at ambient temperature (70°F)

New for 2012

FM Steel Hydrant House

The hydrant house is constructed of heavy 16-gauge steel throughout, including the shelves. The roof is one-piece construction, sloped to the rear for adequate drainage. It is hinged at the rear with arms at both sides and has a hasp centered in the front. Doors are fitted with a full-length latch and cross brace to insure firm and neat closing. Sufficient space is provided to store all equipment specified by both FM and NFPA standards, plus room for additional equipment.

- red polyester coated finish
- FM approved
- 'FIRE HOSE' decal is provided for the cabinet front
- does not come with hose or accessories
- accessory hardware is required but is not included
- concrete base is to be supplied by a contractor
- shipped unassembled with instructions

Part #	Powhatan Part #	Price/E
HH30145	*30-145-00002*	**$2155.00**

New for 2012

FM Steel Hose Cabinet

The wall type hose cabinet is constructed of heavy 18-gauge steel throughout. It is used for storage for industrial fire protection equipment. The cabinet is designed for use on walls with or without legs, or free standing. Each cabinet is supplied with holes in the back for wall mounting and 1" pipe couplings on the bottom for adding legs.

- red polyester coated finish
- FM approved
- does not come with hose or accessories
- accessory hardware is required but is not included
- furnished without legs - if legs required - POR
- concrete base is to be supplied by a contractor

Style V Swing Wall Reels

hose and valve not included

- Pivot mounting allows the reel to swing to the proper angle, preventing twists and kinks.
- red enameled all-steel construction for long, dependable service life
- Double row design of V5 holds two rows of hose for maximum capacity in minimum space.
- open sides allow hose to dry faster, preventing mold and mildew

Continuous Flow Reels

Used to allow immediate and continuous flow of water at all times during deployment of hose. Can be easily operated by one person. Use with non-collapsible hose (hose not included) shown on page 489.

Standard Features:
- powder coated with an electrostatically-applied, thermally-fused, red polyester finish steel drum
- rims and universal mounting stand
- female NPT inlet with male NST outlet

Adjustable Pressure Restricting Device

- intended for installation on Class I or Class III standpipe system hose outlets
- Use of this device restricts pressure in the piping system to such a degree that hose lines can be handled by persons untrained in the handling of heavy fire streams.
- listed by the New York City Board of Standards and Appeals
- 2½" is Underwriters Listed
- Note: *restricts under flow conditions only*

Thermoplastic Breakable Cap

Prevents entry of foreign material and protects female threads on pin lug fire department inlet connections.

- molded red thermoplastic
- used on pin lug females

Size	Part #	Price/E	Opt Qty
2½"	***PBC250***	**$8.00**	25

Thermoplastic Adjust-A-Plug

- molded red thermoplastic protective plug for swivel connections up to 2½"
- Two adjustable metal plates installed in back of the plug can be mated with your local thread.
- The plug can be easily removed with a fire department spanner wrench.

Part #	Price/E
PAP250	**$8.00**

Universal Hose Cap

Universal push on - pull off cap protects threads by gripping the valve or outlet on the inside of the waterway.

- ***NOT** intended to be pressurized* SAFETY ALERT

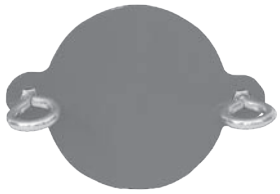

Size	Part #	Price/E
2½"	***PFC250U***	**$19.00**

Aluminum Breakable Cap

- for use on fire department inlet connections
- prevents entry of foreign matter and protects female threads
- breakable ears feature permits fast hose connection
- two eyebolts with nuts for attachment to female pin lug swivel
- painted red finish

Size	Part #	Price/E
2½"	***ABC250***	**$10.35**

Spanner and Hydrant Wrenches

Aluminum Universal Spanner Wrench

Part #	Price/E	Pkg Qty	Wt. (lbs)
USW	**$24.20**	25	.62

- for 3/4" to 3" pin lug and rocker lug couplings
- includes gas cock shutoff, pry bar and belt hook eye
- overall length 11-7/8"

Universal Wrench

Part #	Price/E	Wt. (lbs)
233	**$43.20**	1.16

- for pin lug or sensible (rocker) lug couplings 1" - 4½"
- a gas cock shutoff is provided in the handle
- iron, red epoxy painted
- overall length 11¾"

Aluminum Forestry Pocket Spanner Wrenches

FSW1

FSW2

Part #	Price/E	Wt. (lbs)
FSW1	**$38.40**	.6
FSW2	**38.40**	.12

- ***FSW1***: for use on 1" hoses only
  FSW2: for 1 and 1½" hose couplings
- meets USFDA specification 5100-101C
- overall length 5"

Hole Type Spanner Wrench

Part #	Price/E	Wt. (lbs)
HTSW	**$31.65**	.20

- Rugged and dependable compact hole spanner designed for use on ¾" and 1" booster hose couplings.
- constructed of AL-MAG 35
- overall length is 7½"

Storz Adjustable Hydrant Wrench

Part #	Price/E	Wt. (lbs)
SAHW	**$185.35**	6

- ductile iron head
- knurled chrome plated handle
- manganese bronze adjustable jaw

Storz Spanner Wrench

Part #	Price/E	Wt. (lbs)
SZW2	**$52.90**	1

- for use on 4", 5" and 6" Storz couplings
- one-piece design
- constructed of AL-MAG 35

Folding Pocket Spanner Wrenches

Material	Part #	Price/E	Wt. (lbs)
aluminum	***PSW***	**$40.90**	.30
brass	***PSW-B***	**149.35**	.72
die cast zinc	***PSW-Z***	**41.35**	.56
yellow plastic	***PSW-Y***	**62.40**	.27

- a compact wrench easily carried in your jacket pocket
- designed to fit ¾" to 3" sensible (rocker) lug and pin lug couplings

Spanner and Hydrant Wrenches

Adjustable Hydrant Wrench

- plated iron head and ½" plated steel handle
- for pentagon nuts up to 1¾"
- built-in spanner for pin or rocker lug couplings
- overall length 16¼"

Part #	Price/E	Pkg Qty	Wt. (lbs)
AHW	**$28.25**	20	2.7

Pigtail Adjustable Hydrant Wrench

- double spanner head fits pin lug or rocker (sensible) lug couplings, pentagon nuts up to 1½" from point to flat, 1½" - 6" rocker lug caps, 2" - 4½" pin lug caps, and square nuts up to 1-1/8"

Part #	Price/E	Wt. (lbs)
AHWPT	**$69.25**	4.5

Heavy Duty Adjustable Hydrant Wrench

- plated iron head, 7/8" plated steel handle
- for pentagon hydrant nuts up to 1¾" from point to flat
- notched to fit 1¼" square hydrant nut
- spanner for pin lug and sensible (rocker) lug couplings, 1½" thru 6"
- overall length 18"

Part #	Price/E	Pkg Qty	Wt. (lbs)
189	**$38.70**	15	4.7

Double Head Adjustable Hydrant Wrench

- for pentagon hydrant nuts up to 1-7/8" and square heads up to 1½"
- designed to fit ¾" - 6" rocker lug or pin lug couplings, can also be used for long handle couplings
- ductile iron head with a deeply knurled chrome plated steel handle
- replaceable adjustable jaw is made of manganese bronze
- overall length 19½"

Part #	Price/E	Wt. (lbs)
189DH	**$86.25**	5

5 Hole Hydrant Wrench

- 5 pentagon holes designed to fit common hydrant nut sizes
- built-in spanner for pin or rocker lug couplings
- plated iron
- overall length: 14¼"

Part #	Price/E	Pkg Qty	Wt. (lbs)
PHW	**$23.30**	25	1.94

Grip-All Spanner Wrench

- lightweight aluminum, fits ¾" - 6" split lug, rocker lug and pin lug couplings
- can be operated in tight quarters
- A gas cock shutoff is provided in the handle. The handle is shaped to fit your hand allowing a positive grip on the coupling.

Part #	Price/E	Wt. (lbs)
GAW	**$66.30**	.52

Long Handle Suction Spanner Wrench

- plated iron spanner for use on long handle, rocker lug, or pin lug couplings from 2½" - 6"
- open end slips over long handles for additional leverage while the claw fits rocker lugs or pin lugs, the other end can be used as a pry or crowbar
- inverted "T" body construction for lighter weight and improved strength
- can be used on Dixon's cam and groove pin lug or trapezoidal lug tank car adapters or 8" pin lug couplings
- overall length 18¾"

Part #	Price/E	Wt. (lbs)
LHW	**$360.85**	3.25

Additional spanner wrenches on page 275

Brass Single Hydrant Gate Valves

- pin lug swivel, non-rising stem
- aluminum speed handle, ***rubber seal***
- The hydrant gate valve is used to throttle the flow from a fire hydrant without damaging the hydrant itself.
- for use up to **175 PSI** (*water only*) at ambient temperature (70°F)

Backflow Preventer

Designed to give maximum protection against backflow caused by back-pressure or back-siphonage from a cross-connection wherein a contaminant hazard exists.

- consists of two spring-loaded poppet type check valves and a mechanically independent, hydraulically dependent pressure differential relief valve
- three top mounted test cocks ensure easy access during repair and maintenance
- supply pressures up to **175 PSIG** and water temperatures from **33°F** to **180°F**
- meets USC's FCCC and HR Manual, Sec. 10, ASSE 1015, AWWA C-510 and CSA B64.4 specifications
- Underwriters Listed and Factory Mutual approved

NPT	Working Pressure	Part #	Wt. (lbs)	Price/E
2"	**175 PSI**	***BFP200***	41	**$1501.80**

Create a Fire Hydrant Backflow Preventer by using the ***RSMSA25F20T*** (page 510) and the ***DMH2025F*** (page 517).

Brass Straight Globe Valves

male outlet

Leader Line Wye ¼ Turn Ball Type Hose Valve

- body painted red with chrome trim
- rocker lug swivel
- for use up to **400 PSI** (*water only*) at ambient temperature (70°F)

Female x Male	Part #	Price/E
2½" NST (NH) x 1½" NST (NH)	***LLBV2515F***	**$742.45**

Straight Ball Drip Valves

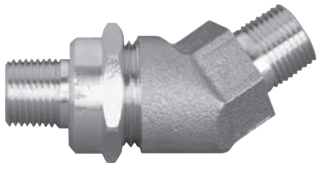

This valve is designed to drain the low point of a system. It should be placed between the fire department connection and the swing check valve.

- will seal automatically under pressure
- install in the vertical position only
- working pressure: **175 PSI** at ambient temperature (70°F)

Male NPT	Male NPT	Part #	Wt. Lbs.	Price/E
½"	½"	***SBDV50***	.41	**$21.35**

U.S. Coast Guard Approved AFFF/Water Fog Nozzles

Nozzles designed for maximum efficiency with AFFF (Aqueous Film Forming Foams) or water on shipboard, offshore rigs and industrial applications.

- corrosion resistant brass construction
- rubber-like bumper and handle for added protection
- Zytel® (nylon) horseshoe handle
- flush without shutting down
- combination fog and straight stream
- constant gallonage in all fog and straight stream pattern
- double row of molded teeth for excellent fog pattern
- operating pressure up to **100 PSI** *(water* and *AFFF only)* at ambient temperature (70°F)

Forestry Non Weeping Fire Hose

Outer construction:
single jacket, all polyester

Tube construction:
thermoplastic

Impregnation: yellow

Consult the factory for pricing and availability for any of the following features:
- 25' lengths
- other threads and configurations

Proof pressure: **600 PSI** *
Service test pressure: **300 PSI** *
Working pressure: **270 PSI** *
* at ambient temperature (70°F)

***Coupled* with female and male expansion ring couplings**

Size	Length	Part #	Rocker Lug Aluminum *NST (NH)* **RAF**	Rocker Lug Aluminum *NPSH* **RAS**

Forestry Mop Up Hose

Forest fire applications include mop-up, low volume hand lines, filling pump cans, supplying sprinklers and remote fire line protection. 50' coil diameter is 9".

Outer construction:
single jacket, synthetic

Tube construction:
thermoplastic

Impregnation: yellow

Consult the factory for pricing and availability for any of the following features:
- other threads and configurations

Proof pressure: **300 PSI** *
Service test pressure: **150 PSI** *
Working pressure: **135 PSI** *
* at ambient temperature (70°F)

***Coupled* with female and male brass ferrule type garden hose couplings**

Size	Length	Part #	Price/E

Thermoplastic Penetrator Nozzle

The black and yellow penetrator nozzle is designed with standard 1½" NPSH male hose threads that are converted to female thread for connection to the hose using a double female rigid connector. It is specifically designed with a ¼" discharge orifice, which generates a high velocity water jet that is effective against deep seated wildland fires.

- for use up to **200 PSI** *(water only)* at ambient temperature (70°F)

Domestic Brass Ball Valves

- for control of air, water, oil and gas in hose or pipe lines for other services, please contact the factory
- rated to **600 PSI** WOG; **150 PSI** saturated steam
- brass valve bodies, balls and stems
- blow-out proof stems
- glass-filled reinforced PTFE seats and stuffing box ring; stem seals and washers
- plated steel handles and nuts with vinyl sleeves, full port and standard port valves are both repairable
- ¼" - ½" full port; ¾" - 3" standard port
- meets WW-V 35C, Type II Composition
- ball valve handle replacements available, consult Dixon for pricing.

Locking Handle Brass Ball Valves

- for control of air, water, oil and gas in hose or pipe lines for other services, please contact the factory
- rated to **600 PSI** WOG; **150 PSI** saturated steam
- blow-out proof RPTFE stem
- chrome-plated brass ball
- Stainless steel sliding lock mechanism secures handle in open or closed position; can be padlocked opened or closed.
- plated steel handles and nuts with vinyl sleeves, full port and standard port valves are both repairable
- ¼" - ½" full port; ¾" - 2" standard port

New

250 Lb. Steam Ball Valves

- recommended for use with fluids with widely varying temperatures and/or thermal expansion rates
- rated to **600 PSI**; **250 PSI** saturated steam
- vacuum service to 29 inches Hg
- threaded bronze valve
- 316 stainless steel ball and stem
- blow-out proof stem design
- multi-fill RPTFE seats
- multi-fill stuffing box ring
- high temperature MTFE stem packing
- adjustable packing gland
- ½" full port; ¾" - 2" standard port
- maximum temperature rating **406°F**

A wide variety of options are available: modulating, extra switches, transmitters, potentiometer, etc.
Contact Dixon Sanitary at 800.789.1718 or visit bradfordfittings.com for details.

SAFETY ALERT

Caution !

Even though there are torque safety factors built into our automated ball valve packages, actual service conditions must also be considered when selecting the proper product for the appropriate application.

For example: Severe service conditions such as dirty water, dirty air, all slurries, raw sewage water, oils, and other viscous fluids can have a dramatic affect in raising the torque requirements of ball valves as much as 75% and therefore larger actuators may be required. Please consult the factory when dealing with these types of applications.

SAFETY ALERT

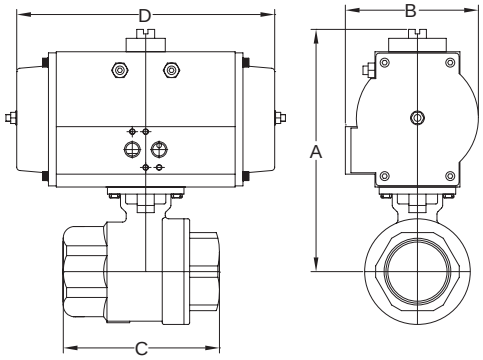

Pneumatically Actuated 2-Piece Stainless Ball Valves

2-Piece Stainless Ball Valve
- CF8M stem and ball
- RTFE seats and seals
- blow-out proof stem
- live-loaded stem packing
- ISO 5211 mounting pad
- pressure rating: ¼" - 2" **1000 PSI** WOG, 2½" - 3" **800 PSI** WOG
- temperature range: **-40°F** to **450°F**

Rack and Pinion Actuator
- hard anodized aluminum body
- nickel plated anti-blowout pinion
- Buna-N O-rings
- NAMUR mounting
- bi-directional stops for ±5º travel adjustment
- 80 PSI plant air required
- visual position indication
- maximum operating pressure: **120 PSI**
- operating temperature range: **-40ºF** to **200ºF**
- tested to one million cycles

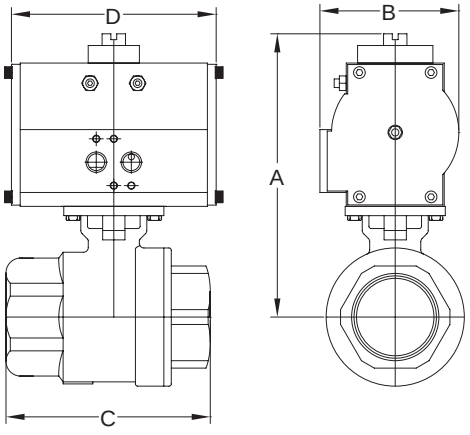

Spring Return (normally closed)

A wide variety of options are available: modulating, extra switches, transmitters, potentiometer, etc.
Contact Dixon Sanitary at 800.789.1718 or visit bradfordfittings.com for details.

SAFETY ALERT

Caution !

Even though there are torque safety factors built into our automated ball valve packages, actual service conditions must also be considered when selecting the proper product for the appropriate application.

For example: Severe service conditions such as dirty water, dirty air, all slurries, raw sewage water, oils, and other viscous fluids can have a dramatic affect in raising the torque requirements of ball valves as much as 75% and therefore larger actuators may be required. Please consult the factory when dealing with these types of applications.

SAFETY ALERT

Pneumatically Actuated 3-Way Stainless Ball Valves - 'T / L' Port

3-Way Stainless Ball Valve
- full port
- female NPT ends
- blow-out proof stem
- live-loaded stem packing
- ISO 5211 mounting pad
- 100% air tested under water at **80 PSI**
- working pressure: ¼" to 1": **1000 PSI**; 1¼" to 2": **800 PSI**
- temperature range: **-20°F** to **450°F**

Rack and Pinion Actuator
- hard anodized aluminum body
- nickel plated anti-blowout pinion
- Buna-N O-rings
- NAMUR mounting
- bi-directional stops for ±5º travel adjustment
- 80 PSI plant air required
- visual position indication
- maximum operating pressure: **120 PSI**
- operating temperature range: **-40ºF** to **200ºF**
- tested to one million cycles

Default Flow Paths

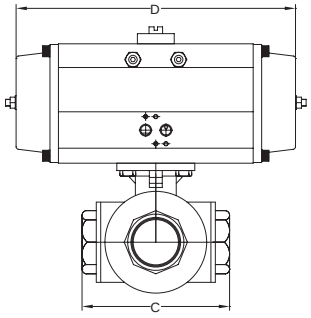

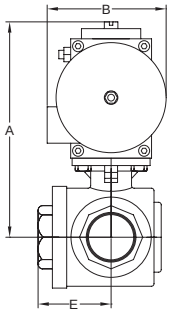

Refer to page 668 for alternate flow paths.

Electrically Actuated 3-Way Brass Ball Valves - 'T / L' Port

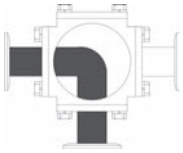

Default Flow Paths

T port

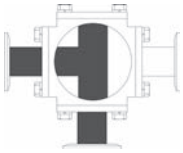

position A

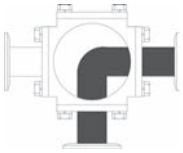

L port

position A

position D

position B

Refer to page 668 for alternate flow paths.

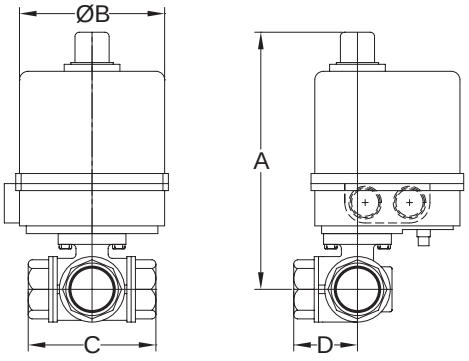

3-Way Brass Ball Valve

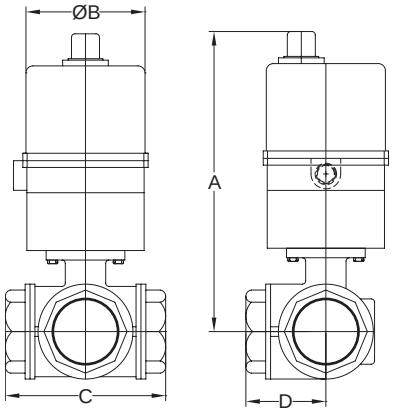

- reduced port
- blow-out proof stem
- chrome-plated brass ball
- PTFE seats with O-ring backing for low operating torque
- PTFE seats and double O-ring stem packing
- ISO 5211 mounting pad
- 100% tested
- pressure rating: **400 PSI** WOG **100 PSI** WSP
- maximum temperature: **344°F**

Electric Actuator

- lightweight powder coated aluminum alloy housing
- NEMA 4/4X waterproof and dustproof
- extended duty cycle induction motor
- high alloy steel gear train
- H-insulation class
- visual position indication
- space heater is standard
- manual override standard: ½" - 1½"
- working temperature: **-41°F** to **140°F**
- ISO 9001, CS, CE and CSA-C US Certified
- RoHS compliant

¼" - 1¼"

SAFETY ALERT

Caution !

Even though there are torque safety factors built into our automated ball valve packages, actual service conditions must also be considered when selecting the proper product for the appropriate application.

For example: Severe service conditions such as dirty water, dirty air, all slurries, raw sewage water, oils, and other viscous fluids can have a dramatic affect in raising the torque requirements of ball valves as much as 75% and therefore larger actuators may be required. Please consult the factory when dealing with these types of applications.

SAFETY ALERT

Actuation

All Bradford™ actuators, accessories and mounting hardware can be sold separately, call Dixon Sanitary at 800.789.1718 for details.

- Dixon Sanitary can actuate all of our butterfly and ball valves with Bradford™ actuators.
- Dixon Sanitary ships all actuated valves from the Valve Automation Department in Wisconsin.
- Bradford™ actuators are tested to one million cycles and are backed with a one year manufacturer's warranty.
- Our professionally trained specialists assemble and test each automation package to guarantee performance in the field.
- Documentation is filed on each automated valve package in case it is needed at any point in the future.
- Each unit is individually foam packed to ensure they arrive in top condition.
- Most standard orders can be shipped within 24 hours.

stainless steel actuators

- vertical canister
- rack and pinion
- control top

aluminum actuators

- 90° and 180° rotation
- spring return and double acting
- bi-directional travel stops

electric actuators

- variety of voltages
- manual overrides
- feedback and modulation available

Actuated Valve Accessories

Limit Switches

- visual position indicator
- 3D open/close indication
- quick-set cam
- mechanical SPDT switches (standard)
- multipoint terminal strip
- various switch options available
- cable entry: (2) ½" NPT

Enclosures available:

NEMA 4 4/X
- water and dust tight for indoor or outdoor use
- corrosion resistant

NEMA 7
- water and dust tight for indoor or outdoor use
- corrosion resistant
- for use in indoor hazardous locations
- explosion proof

Enclosure	Part #	Price/E
NEMA 4/4X	***XLS-B4A0120P***	**$311.30**
NEMA 7	***XLS-B7A0120P***	**648.80**

Solenoids

- pressure range: 30 PSI to 150 PSI
- duty cycle: 100% extended duty
- voltages available:
  12VDC, 24VDC, 24VAC, 48VAC, 110VAC, 220VAC
- electroless nickel plated spool
- easy-to-use manual override
- port sizes: inlet and exhaust ¼" NPT

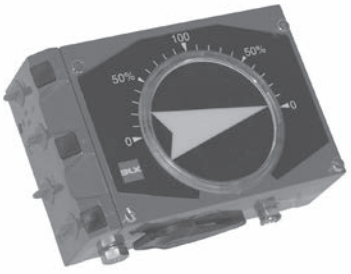

Enclosures available:

NEMA 4 4/X
- water and dust tight for indoor or outdoor use
- corrosion resistant

Description	Part #	Price/E

Pneumatically Actuated Wafer Butterfly Valves

Valves

- cast iron body with extended neck
- nickel plated ductile iron disc
- seat backing ring ensures blowout proof service
- installs between standard ANSI Class 150# flanges
- conforms to MSS-SP-67, MSS-SP-25,API-609
- no taper pins
- field repairable (seat kits available)
- undercut available
- replaceable EPDM seat
- maximum pressure **200 PSI** (bi-directional)
- temperature range **-20°F** to **250°F**
- A wide variety of seat, disc and body materials are available

Rack and Pinion Actuator

- bi-directional stops for ± 5° travel adjustment
- 80 PSI plant air required
- maximum operating pressure: 120 PSI
- operating temperature range: **-40°F** to **+200°F**
- hard anodized aluminum body
- Namur mounting
- nickel plated anti-blowout pinion
- Buna-N O-rings
- visual position indication
- tested to 1 million cycles

All dimensions are given in inches, unless noted. Dimensions are approximate. Engineering dimensions are available upon request. Specifications are subject to change without notice.

Pneumatically Actuated Lug Butterfly Valves

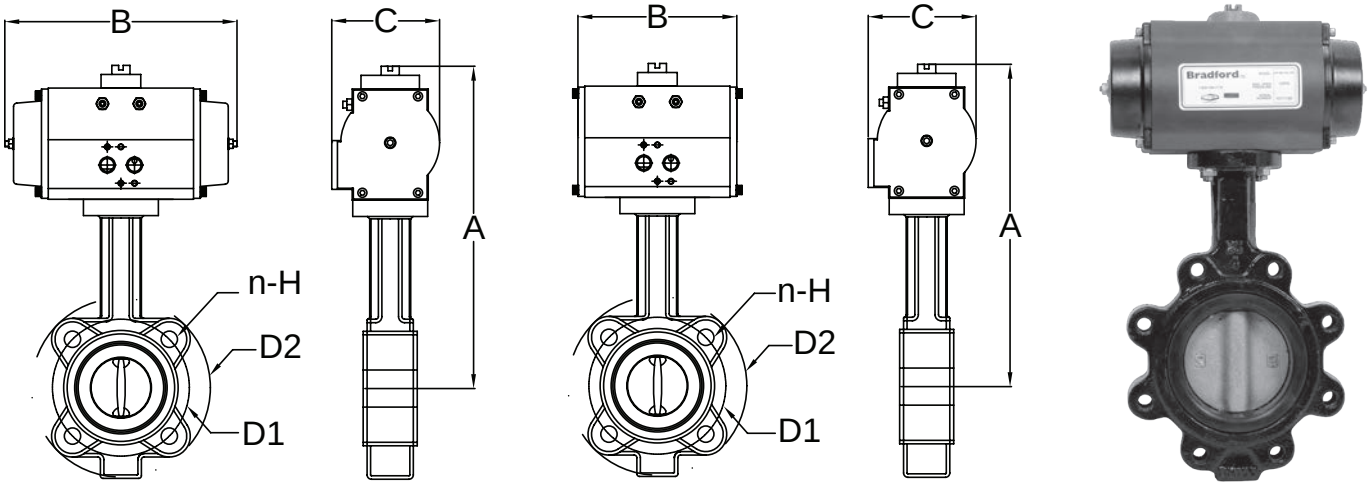

Valves

- cast iron body with extended neck
- nickel plated ductile iron disc
- seat backing ring ensures blowout proof service
- installs between standard ANSI Class 150# flanges
- conforms to MSS-SP-67,MSS-SP-25, API-609
- no taper pins
- field repairable (seat kits available)
- undercut available
- replaceable EPDM seat
- maximum pressure **200 PSI** (bi-directional)
- temperature range **-20°F** to **250°F**
- a wide variety of seat, disc and body materials are available

Rack and Pinion Actuator

- bi-directional stops for ± 5° travel adjustment
- 80 PSI plant air required
- maximum operating pressure: **120 PSI**
- operating temperature range: **-40°F** to **+200°F**
- hard anodized aluminum body
- Namur mounting
- nickel plated anti-blowout pinion
- Buna-N O-rings
- visual position indication
- tested to 1 million cycles

Note: A wide variety of switches, solenoids, positioners, etc., are available. Contact the factory for details.

All dimensions are given in inches, unless noted. Dimensions are approximate. Engineering dimensions are available upon request. Specifications are subject to change without notice.

Ductile Iron Butterfly Valves

NOT RECOMMENDED FOR STEAM SERVICE SAFETY ALERT

- for use between two 150 lb. flanges
- will lock "open" or "closed"
- rated to **200 PSI** at ambient temperature (70°F)

- ductile iron body, ASTM A536
- aluminum bronze disc, ASTM B148, ALY.954
- Buna-N seal and stem seals
- PTFE bushing
- stainless steel top and bottom stems
- The number of holes on the valve should match the number of holes for the specific flange size. See the Pipe and Flange dimensions chart on page 661.

Horizontal Swing Check Valves

- brass body
- brass disc
- for horizontal or vertical use
- Swing check valves are designed to prevent back flow in plumbing and liquid piping systems, while offering full flow performance with a minimum of turbulence or pressure loss.
- A positive seating disc allows flow only in one direction and a screw-in cap provides easy access for periodic cleaning.
- rated to **200 PSI** WOG
- temperature range **-20°** to **150°F**

female NPT x female NPT

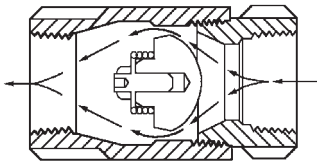

Size	*Brass* Part #	Price/E

Ball Cone Check Valves

- For use with water, oil, air lines or inert gases. Not recommended for use on or near reciprocating pumps or other similar vibration causing machinery.
- tight shut-off with liquid media
- no radial alignment necessary
- straight through and streamlined for minimum change in velocity
- Reinforced TFE check is spring loaded for fast seating action.
- rated to **400 PSI** WOG, cold non-shock; **125 PSI** saturated steam
- cracking pressure is .5 PSI
- temperature range **-20°F** to **353°F**

Straub Grip-L Axial Restraint Pipe Couplings

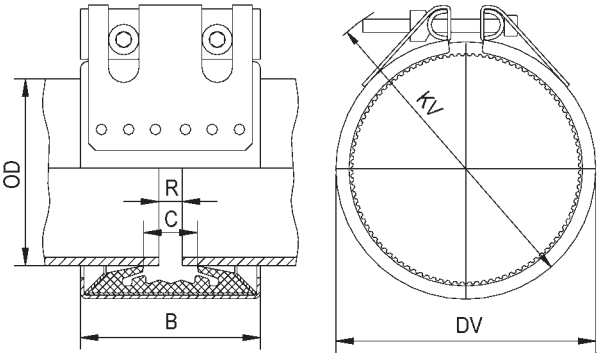

Straub Grip-L couplings are suitable particularly for pipes within the lower pressure range. Applications include, but are not limited to: ship building, water and waste water treatment plants and industrial process pipework.

- Joins like or dissimilar pipe materials: steel, galvanized, painted, stainless steel, thin-wall stainless steel, PVC, copper
- Requires no special tools or pipe-end preparation; only a torque wrench is required for a secure and safe pipe connection that seldom needs retightening.
- highest quality 316 Ti stainless steel construction
- accommodates up to 5° of pipe misalignment
- vary gap between pipe ends
- absorbs vibration, water hammer, and sound
- special patented grip ring for superior holding power on hard-surfaced pipes
- 5 year limited warranty
- reusable
- built to ASTM 1476, Type 2, Class 2 specifications

Specifications:
- casing: AISI 316Ti
- screws: AISI 316 L
- bolts: AISI 316 Ti
- anchoring ring: AISI 301
- sealing sleeve: EPDM standard (NBR and Viton® A are also available, contact Dixon for additional information)
- EPDM sealing sleeve: temperature range **- 4°F** to **176°F** (-20°C to 80°C)

Approvals:
- American Bureau of Shipping (ABS) up to 232 PSI on ¾" - 5"; 188 PSI on 6"; 145 PSI on 8"
- Underwriter's Laboratories (UL)
- National Sanitation Foundation (NSF)

SAFETY ALERT

All Straub couplings require the correct use of a torque wrench for a safe and proper installation. Straub couplings must be torqued to the specified value as printed on each individual coupling. Failure to do so can result in serious injury or death.

SAFETY ALERT

Not for steam or refrigerant service.

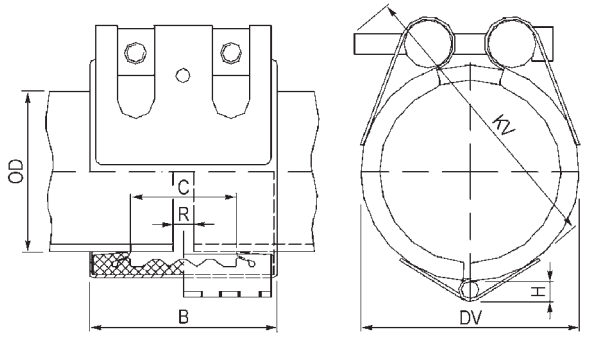

Straub Open-Flex 1L Couplings

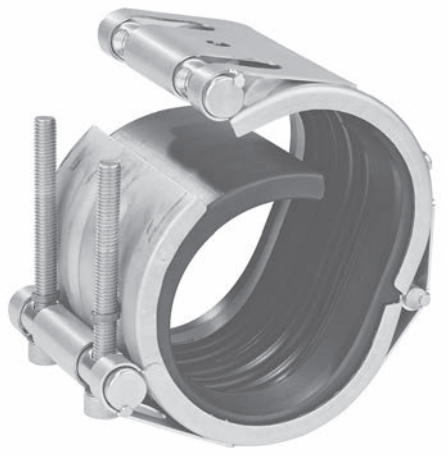

Straub Open-Flex 1L couplings are suitable for repairing or joining pipes where access to the pipe end is difficult or not possible. This unique wrap-around design differs from similar type repair products because the installation or repair is permanent due to the unique flexible lipseal gasket design. Open-Flex couplings will also act as an expansion joint. *Straub Open-Flex couplings do require the pipes to be properly anchored and restrained as they are not pull-out resistant like the Straub Grip-L couplings.* Use Straub Open-Flex couplings to replace bolted sleeve type couplings (AWWA Std. C-219) or for permanent repairs or installation.

- Joins like or dissimilar pipe materials: steel, galvanized, painted, stainless steel, thin-wall stainless steel, PVC, copper
- Requires no special tools or pipe-end preparation; only a torque wrench is required for a secure and safe pipe connection that seldom needs retightening.
- highest quality 316 Ti stainless steel construction
- accommodates up to 5° of pipe misalignment
- vary gap between pipe ends
- absorbs vibration, water hammer, and sound
- acts an an expansion joint; will accept up to .25" of axial movement
- 5 year limited warranty
- reusable
- conforms to ASTM 1476, Type 2, Class 3 specifications

Specifications:
- casing: AISI 316Ti
- screws: AISI 4135 steel
- bolts: AISI 12L 14 Galvanized
- EPDM sealing sleeve: temperature range **- 4°F** to **176°F** (-20°C to 80°C)

Approvals:
- American Bureau of Shipping (ABS) up to 232 PSI
- Underwriter's Laboratories (UL)
- National Sanitation Foundation (NSF)

Notched Turned Back Nipples

- When used with an appropriate notched ferrule, these fittings can be swaged or crimped onto hose, thereby providing improved shank retention.
- The stem can be removed from a damaged hose by cutting away the ferrule, without necessarily damaging the fitting. *After inspection to determine its suitability for reuse,* it can be reinstalled into another hose by *using a new ferrule*.
- When used with double bolt or band clamps, notched turned back nipples will provide shank retention similar to that of the King turned back nipples.
- Notched turned back nipples let you use the same ferrules used with the notched (NO) cam and groove on page 37. This lets you *maximize your inventory usage and reduce costs*. *You must purchase a fitting and the matching ferrule to create an assembly*.
- Stems are for use with lap joint flanges on page 573.

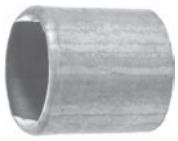

SAFETY ALERT

Dixon stems and ferrules are specifically designed to be used together as a coupling system.
Due to differences in dimensions and tolerances for safety reasons,
do not use other manufacturer's stems or ferrules with Dixon Holedall products.

King Turned Back Hose Nipples for Floating Flanges

- A turned back nipple, when used in a floating flange assembly, allows the flange to be aligned without stressing (twisting) the hose. This generally increases the hose's service life by eliminating a common cause of premature hose failure.
- for use with Lap Joint flanges shown on page 573

New for 2012

Brass International Shore Connections

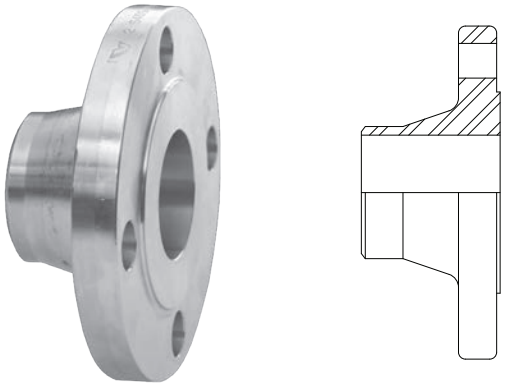

- meets U.S. Coast Guard specifications for vessels 1000 gross tons or more
- makes possible the connection of two different threads between ship and shore or between ships
- 7" OD brass flange with 4¾" holes
- solid wedge disc with tapered seats
- includes 8 washers, 4 hexagon brass nuts, 4 hex head bolts, 1 washer, 1 fiber gasket
- working pressure: **300 PSI**

Description	Part #	Wt. Lbs.	Price
shore side	***09-318-00001***	7.38	**$308.40**
ship side	***09-319-00001***	7.14	**308.40**

TTMA Series Flange Adapters

- provides a simple and easy way to quickly convert threaded components to a standard TTMA flange configuration
- more durable than welded fabrications due to the solid cast lightweight aluminum design
- design improves flow through adapter even on the 3" reducer
- compact size reduces the overall space needed to install
- for flange drilling standards, see page 661

Sight Flow Indicators

Bronze

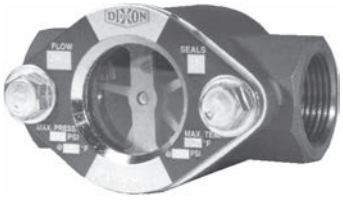

- verifies flow and monitors color and clarity in fluid lines
- double window snap ring design
- bronze body
- ABS indicator
- tempered soda lime sight glass
- Buna-N seals
- maximum pressure **125 PSI**
- maximum temperature **200°F**
- made in the USA

Stainless Steel

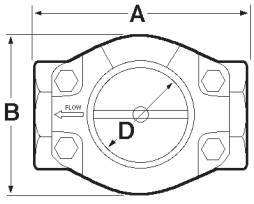

- Features a radial sealing method and bolt-on body design that provides years of reliable service with no torquing maintenance required.
- verifies flow and monitor color and clarity in fluid lines
- A white Delrin® propeller style indicator is standard. Best for observations at a distance or with opaque liquids [1].
- tempered soda lime sight glass [2]
- Viton® seals are standard [3]
- maximum pressure **200 PSI** at **150°F**
- maximum temperature **225°F** at **150 PSI**
- made in the USA

Bulkhead Fittings

- constructed of glass reinforced polypropylene for strength and chemical resistance
- for use on most poly storage tanks and many steel and fiberglass tanks
- EPDM gaskets are standard
- Viton® gaskets are available

female NPT fittings

Female NPT	Hole Size	*Polypropylene* Part #	Price/E
½"	1-3/8"	***62834***	**$12.05**

1½" - 2"	***60406***	**4.15**
3"	***60331***	**15.05**

Bolted Fittings

Bolts are threaded into the back plate of the fitting so there are no welds or bolt holes as potential points of leakage. The fittings come standard without a gasket. However, a gasket (sold separately) is required to be installed on the inside of the tank.

Stainless Steel

- stainless steel body
- 316 stainless steel bolts
- cross-linked polyethylene gaskets are standard (sold separately)
- Viton® and EPDM gaskets are available

Standard Couplings - Series S, Style 11

Standard couplings are designed for a wide range of applications: commercial/industrial construction, mining, process piping, and many others. The housing design allows for optimum strength without excessive casting weight.

- ductile iron body with rust inhibiting paint.
- Underwriters Listed and Factory Mutual approved
- see page 597 for replacement gaskets
- Interchangeable with:
  Victaulic's #77
  Grinnell's #7001

Lightweight Flexible Couplings - Series L, Style 10

Lightweight flexible couplings are designed for applications requiring moderate internal pressure or where weight is a factor. Applications include: general purpose, mining, irrigation, and compressed air where a deflection of 5% or less is required.

- ductile iron body with rust inhibiting paint
- Underwriters Listed and Factory Mutual approved
- see page 597 for replacement gaskets
- Interchangeable with:
  Victaulic's #75
  Grinnell's #7000

Quick Release Couplings - Series Q

Quick release couplings are specially designed for applications requiring a quick connection and/or disconnection of a pipe joint. A locking pin through the handle prevents accidental opening of the coupling.

- ductile iron body with zinc plating and steel safety clip
- see page 597 for replacement gaskets
- Interchangeable with:
  Victaulic's #78
  Grinnell's #7003

Rigid Couplings - Series R, Style 5

This lightweight, low pressure, rigid style coupling is ideal for fire protection, plumbing, low pressure air and drainage. Small gripping teeth hold the housing into the groove allowing a straight run of pipe and preventing any flex at the joint.

- ductile iron body with rust inhibiting paint
- Underwriters Listed and Factory Mutual approved
- see page 597 for replacement gaskets

Aluminum Victaulic Clamps

Lightweight, quality aluminum clamps ensure a leak-tight connection. Unlike steel groove clamps that secure pipe ends with high clamp force against the tubing walls, the Dixon bolted clamp takes the full bolt force and locks in the groove of the tube preventing distortion of the tube diameter.

- 3" pressure rating: **170 PSI**
  4" pressure rating: **120 PSI**
- bolt torque: 50 ft. lbs.
- precision casting and machined dimensions provide an exact fit and great appearance
- use of lock nuts prevents clamps from loosening in high vibration applications
- Viton® B rated for 100% biodiesel and Ethanol
- Buna-N rated for petroleum service, Ethanol to E100, and biodiesel to B20
- white buna-N for use in dry bulk food applications

Description	Part #	Price/E

clamp with black buna gasket

Mechanical Tees - Series T

Mechanical tees provide a fast easy way to install a threaded connection along a length of pipe. After drilling or cutting a hole in the pipe at the location of the branch connection, simply attach the clamps around the pipe for a leak-free threaded outlet connection. See chart below for drilling hole specifications

- ductile iron body with rust inhibiting paint
- Underwriters Listed and Factory Mutual approved
- maximum working pressure: **300 PSI** at ambient temperature (70°F)
- Interchangeable with:
  Victaulic's #920
  Grinnell's #7045

Flange Adapters - Series FA

Flange adapters are used to connect an ANSI Class 125 and 150 flange to a grooved pipe using a grooved clamp. These adapters provide a rigid one piece connection that can be disconnected by removing the clamp assembly. To assemble to another flange, position bolt heads on the adapter (grooved) side. Painted ductile iron.

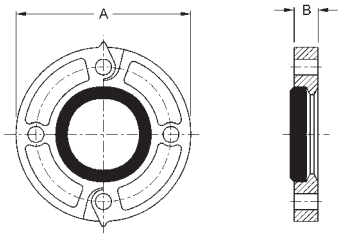

Nominal Size	Pipe OD	Max **PSI** at 70°F	Flange Dimensions A	Flange Dimensions B	Approx. Weight (lbs.)	Bolts qty	Bolts size	*Ductile Iron* Part #	*Ductile Iron* Price/E

ANSI Split Flanges - Series SF

The split flange coupling is designed to provide a direct connection between a grooved adapter and an ANSI Class 125 and 150 raised face flanged component. It can be used with flat face flanges by removing the raised projections on the outside face of the flange.

- ductile iron body with rust inhibiting paint
- Underwriters Listed and Factory Mutual approved
- Buna gaskets are available upon request
- Interchangeable with:
  Victaulic's #741
  Grinnell's #7012

Older version with stud and nut pivot

Newer version with shoulder bolt pivot

Repair Kits

Part #	Description	Includes	Price/E
VR6230	complete replacement bottom body	1, 2, 3, 22, 23, 24, 25, 26, 27, 28, 29, 30	**$434.50**
6200SBK [1]	replacement shoulder bolt pivot, wave washer and flat washer	5, 6, 7	**2.15**
6200-15ASSM	replacement handle, linkage and linkage pin	8, 9	**54.65**
6000NPHK	replacement adapter (4) bolts and lock washers	16, 19	**5.80**
6000EHK	replacement body bolts and lock washers	20, 21	**8.55**
6200BK	replacement (2) large and small arm bushing	29, 30	**41.55**
6200SHK [2]	replacement stud pivot, nylon washer, bushing and nut	31, 32, 33, 34	**15.95**

Co-axial Drop Elbow

- for single point vapor recovery only
- 3" male vapor outlet (top)
- comes assembled with 4" male inlet
  Note: 6400 co-axial inlets do not fit our other elbow series
- quality cast aluminum construction with solid bronze arms
- bolt-on inlets/outlets for easy, fast replacement
- acrylic sight glass with buna seals

Description	*Aluminum* Part #	Price/E
4" male inlet	***6400***	**$1285.60**

Replacement parts are available, please contact Dixon.

Side Seal Drop Elbow

- for use with special 4" side seal style fill collars only
- modular, easy to repair, bolt together aluminum construction
- comes with acrylic sight glass with buna seals (2), bronze locking levers and buna main seal
- 4" male adapter inlet and lock ring installed

Description	*Aluminum* Part #	Price/E
side seal elbow with lock ring and 4" male adapter inlet	***6000ASAL***	**$782.05**

Replacement parts are available, please contact Dixon.

Side Seal Adapter

- allows conventional elbows to be used with special side seal style fill collars
- bottom connects to side seal fill collar
- top section with standard 4" top seal collar profile to accept clamping of standard 4" drop elbows

Description	*Aluminum* Part #	Price/E
side seal connection x 4" top seal drop elbow adapter	***6000-SSA***	**$355.45**

Replacement parts are available, please contact Dixon.

Tank Truck Flanged Sight Flow Indicators

Note: Due to the proprietary blending of petroleum products, Dixon recommends that the thermoplastic tubing and the gaskets be immersion tested in the product to be handled to ensure compatibility (not compatible with crude oil).

SAFETY ALERT

- For tank truck flange gaskets, see page 56.
- For dimensional information on tank truck flange drilling, see page 661.

- replaces the acrylic sight glass commonly found on tank trucks
- allows for visual identification of the fuel grade prior to opening the valve
- works with tank truck flanged butterfly valves found on gasoline trucks
- low cost sight glass tube can be replaced easily
- rugged cast aluminum housing is more durable than acrylic sight glass

TTMA pattern flanged short sight flow indicators

Size	*Aluminum* Part #	Price/E
4"	***5200-SFI***	**$170.50**
3"	***5200-SFI-3***	**156.00**

repair kits

Description	Part #	Price/E
3" replacement sight glass, Baylast™ O-ring and retainer ring kit	***5200-SFI-3-RK1***	**$76.10**

Bayonet Style Dry Disconnect Couplings

Bayco brand BA and BS series bayonet dry disconnect fittings are designed for use in the fuel and lube oil service industry. These fittings are not designed to be interchangeable with other types of Dry Disconnects, however they are used with the Emco Wheaton™ Dry Break™ commonly found in these services. The maximum pressure rating for fittings is **85 PSI** @ 70° F, for pressure ratings at other temperatures contact Dixon.

Replacement parts are available, contact Dixon for more information.

Hose Swivels

Tank Truck

Swivel function - allows the hose to relax to it's natural rest position while allowing freedom of movement without adding torque stress at the point of connection (torque stress is the largest single cause of composite, PTFE and stainless steel hose failure).

- simple design, low maintenance - consists of 2 body halves, ball bearings and a washer
- Viton® seals standard, Chemraz® and Kalrez® optional
- working pressure: **150 PSI**
- maximum temperature: **300°F** (149°C)

Dixon Diesel and Gasoline Nozzles

FuelMaster™ Diesel Nozzle

- Provides the high flow capacity required by many truck stops and terminal operations.
- features lightweight Tenzalloy aluminum casting
- Micro-touch valve provides smooth operation and exceptional flow control.
- super tough nylon hose guard and hold-open clip
- easy to change 'lockout style' spout assembly
- green scuff guard
- automatic shutoff
- Underwriter's Listed
- not designed for use with small 12 volt pumps, AC utility pumps, farm pumps or consumer pumps

NPT Inlet	Spout Size	Wt (lbs)	Approx. Flow Rate at 20 PSI (GPM)	Part #	Price/E
1"	1-3/16"	3.5	30	***DFN100HF***	**$212.50**
1"	1-3/16"	3.6	45	***DFN100SF***	**295.50**

Big Mouth™ Diesel Nozzle

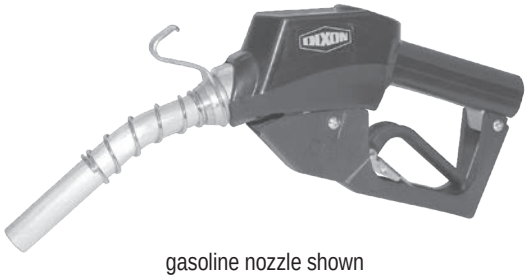

- Micro-touch valve allows precise flow control
- Roto-matic latch pin provides positive auto shut-off
- pure PTFE packing eliminates stem leaks
- Super tough nylon hold-open clip and hand guard bend, but won't break.
- Snap-on handle cover makes changing scuff guards easy.
- yellow scuff guard
- automatic shutoff
- Underwriter's Listed
- not designed for use with small 12 volt pumps, AC utility pumps, farm pumps or consumer pumps

NPT Inlet	Spout Size	Wt (lbs)	Approx. Flow Rate at 20 PSI (GPM)	Part #	Price/E

Farm and Consumer Nozzles

- Automatic fuel nozzle designed for use with small 12 volt and AC utility pumps as well as large farm and consumer pumps.
- Heavy duty, stronger and more secure hook makes it easy to hang the nozzle on the pump.
- *These nozzles are not to be used with gravity flow tanks*.
- black scuff guard on gasoline nozzle, green scuff guard on diesel nozzle
- Underwriter's Listed

Full Flow Ball Valves

- high flow rate; low pressure drop
- wetted parts are aluminum and stainless steel
- seals are FPM (Viton® and PTFE)
- spindle can be disassembled even when ball valve is installed
- working pressure: **150 PSI** at 70°F
- available in 2", 3" and 4" in standard flow and two-way flow
- standard valve ports - female NPT, socket weld for Schedule 40 pipe and grooved
- optional ports include DN flange, butt weld and 150# flange
- two ports - one inlet and one outlet

Automatic Pressure / Vacuum Relief Caps

- normally closed, stops fuel evaporation and airborne contaminants
- lockable
- relieves both pressure and vacuum buildup in fuel tanks
- two styles available, choose for stationary or mobile fuel storage tanks as listed below

Note: Pressure/vacuum relief caps should be routinely inspected to ensure correct operation and particularly to ensure that the relieving components are free to move and that the air flow path is unblocked.

SAFETY ALERT

For stationary fuel tanks

- relieves vacuum at .7 Hg (.33 PSI) and pressure at 2 PSI, 20 SCFM flow

Male NPT	*Zinc* Part #	Price/E
2"	***2000L***	**$43.20**
2½"	***2500L***	**45.45**

For mobile fuel tanks

- relieves vacuum relief at 1" Hg (.5 psig), and pressure at between 7.5 and 9 psig

Male NPT	*Zinc* Part #	Price/E
2"	***200-PV-9***	**$94.10**

Standard Vent Cap

- aluminum body
- allows venting of tank to atmosphere at all times
- does not have pressure or vacuum valves

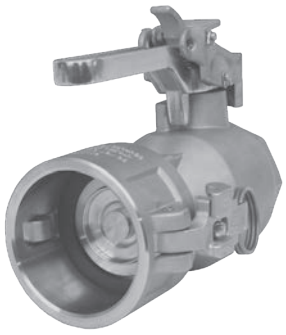

Male NPT	*Aluminum* Part #	Price/E
2½"	***2500SFV***	**$40.65**

Cam and Groove Actuator Style Fittings

The D2C style couplers work with the DBA adapters for applications where automatic closure for the coupler is not desired. This coupler is suited to vapor recovery, suction pump line and applications where it is necessary to easily drain the hose or piping for clean out. It can also be used when product retention in hose or pipe is desired and damage from accidental spill from open coupler is not a concern.

- 316 stainless steel body
- 304 stainless steel internal components
- EZ Boss-Lock cam arms
- stainless steel locking lever included
- available with Buna, Viton®, Viton-B®, EPDM, Kalrez®, PTFE Encapsulated Silicone and PTFE Encapsulated Viton® seals
- used with poppeted adapter DBA series on page 75

V-Ring Swivel Joints

V-Ring Parts Identification List

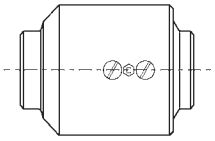

1. body
2. sleeve
3. ball bearings
4. seal retainer
5. V-ring (pressure) seal
6. spring retainer
7. spring
8. ball retainer screw
9. grease fitting
10. O-ring (dust) seal

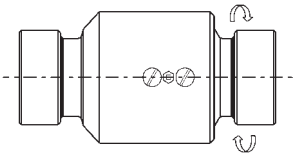

V-Ring Features:

- The spring-loaded triple V-ring sealing system ensures a leak proof seal at either high or low pressure and an extended seal life compared to the conventional single O-ring design.
- The 3" - 8" carbon steel swivels are manufactured from carbon steel with flame hardened dual raceways for greater load bearing capacity and longer life.
- The stainless steel swivels are manufactured in 316 grade stainless steel for superior corrosion resistance.
- available with pressure ratings to 1,000 PSI
- available in carbon steel, stainless steel and aluminum
- ***optional 100% full penetration welding available***

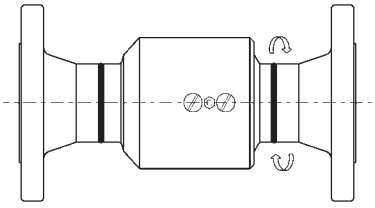

Single Plane V-Ring Style 20

weld end x weld end
sizes 2" - 8"

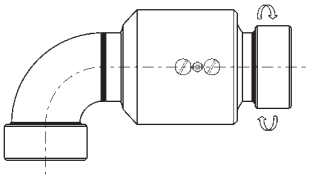

female NPT x female NPT

O-Ring Swivel Joints

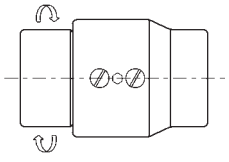

O-Ring Parts Identification List

1. O-ring (dust) seal
2. ball retainer screw
3. O-ring (pressure) seal
4. grease fitting
5. ball bearings

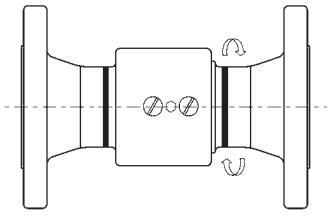

- The O-ring pressure seal ensures a leak-proof seal at either high or low pressure and smoother rotation at lower torques than multiple seal designs.
- Spring-loaded PTFE pressure seals are available up through 3".
- Carbon steel and stainless steel O-ring type swivels provide greater strength and corrosion resistance needed for lower torque applications.
- available in carbon steel, stainless steel, aluminum, brass and iron
- ***optional 100% full penetration welding available***

Single Plane O-Ring Style 20

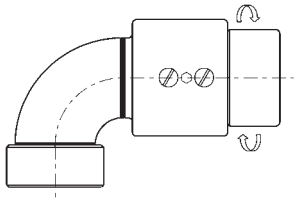

female NPT x female NPT
sizes 1" - 4"

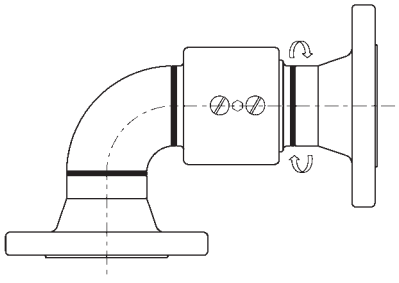

150# ASA flange x 150# ASA flange
sizes 1" - 4"

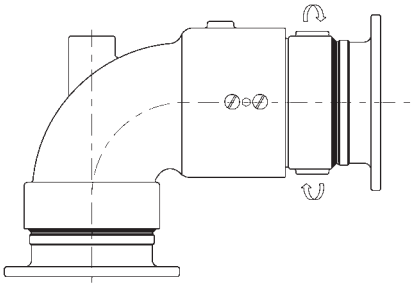

Single Plane O-Ring Style 30

Ordering Information - Swivels

To select the proper swivel joint you need the following information:

Size: _____ Style (shape): _____

End Configuration: _____ Material: _____

Maximum Working Pressure: _____ Temperature Range: _____

Product being handled: (if a chemical, please advise concentration) _____

If for constant rotation, advise RPM: _____

If for suction service, advise maximum vacuum in inches of Mercury (Hg): _____

Our factory sales and engineering staff will be happy to help you evaluate your swivel application. Please call 800.355.1991.

	swivel size	*swivel style*	*end configuration*		*end configuration*	*swivel material*	*pressure seal (Buna-N standard)*	*dust seal (Buna-N standard)*	*retainers (V-Ring ONLY)*	*ball bearings (carbon steel standard)*	*grease*
Example	**2**	**20**	**F**	**X**	**F**	**CS**	**0**	**0**	**1**	**0**	**0**
	[A]	**[B]**	**[C]**		**[C]**	**[D]**	**[E]**	**[F]**	**[G]**	**[H]**	**[I]**

[A] Size
[B] Style (see diagrams)

[C] End Connections	**W** Weld End	**F** Female End	**FG** 150# ASA Flange	**TF** Tank Truck Flange	**PF** 300# ASA flange (not available on aluminum)
[D] Material	**CS (V-Ring)** carbon steel	**SS (V-Ring)** stainless steel	**AL** aluminum	**BR** brass	**MI** malleable iron
	OC (O-Ring) carbon steel	**OS (O-Ring)** stainless steel			

Code #	[E] Pressure Seal	[F] Dust Seal	[G] Retainers	[H] Ball Bearings	[I] Grease
0	Buna-N (standard)	Buna-N (standard)	No retainers (O-ring swivels)	Carbon steel (standard)	Standard
1	Viton®	Viton®	Aluminum (standard in CS V-ring)	440 grade stainless	FDA approved/ Food grade
2	PTFE	---	PTFE (standard in SS V-ring)	316 grade stainless	Silicone (required with EPR seals)
3	Ethylene Propylene (requires silicone grease)	Ethylene Propylene (requires silicone grease)	---	---	---
4	FDA Buna (O-ring only)	FDA Buna	---	---	---

The swivel should be packed so that the surfaces coming in contact with the fluid being handled are compatible with that fluid. In the case of the use of the swivel in submerged service this would include the dust seals and ball bearings.

Dixon always recommends the use of stainless steel ball bearings when building a swivel for submerged service since the standard carbon steel bearings could rust together making it impossible to disassemble the swivel and possibly affecting its operation.

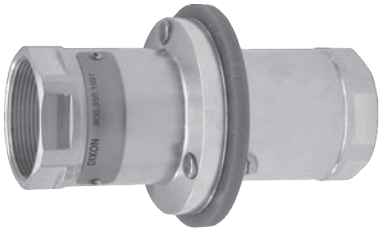

Safety Break-away Couplings - Breaking Bolt Series

Industrial Version

The breaking bolt industrial breakaway coupling is designed to minimize spillage and damage associated with drive away and pull away incidents

- **designed to be installed between a fixed point (pipe, pump, manifold) and a hose**
- coupling automatically senses an excessive load, closes the valves and disconnects
- high flow rate / low pressure drop
- female NPT is standard, optional ANSI / DIN flanges or male NPT are available
- stainless steel or aluminum
- working pressure: stainless steel 360 PSI and aluminum 230 PSI at ambient temperature (70°F)
- Viton® is standard seal

[1] 150# flange

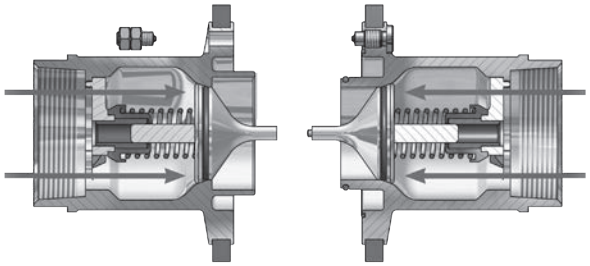

How it Works

Safety break-away couplings have three external break bolts. In the case of axial tension all of the bolts take up the force corresponding to the break force on the hose with a safety margin.
Non-axial forces concentrate the tension forces more strongly on one bolt, so that the safety break-away coupling reacts in a natural way to the reduction of the hose break forces.

BEFORE emergency disconnect

The safety break-away valve consists of two halves, each with a valve that has a o-ring seal.

AFTER emergency disconnect

When the safety break-away couplings separate, it allows the valves to close. The two valves close rapidly, minimizing exposure to personnel and the environment.

Optional Non-Closure Design

The non-closure design is an economical alternative which allows the coupling to break away due to pull-away/drive-away incidents thus protecting piping systems and equipment. This design allows spillage of product in these instances due to the lack of valving in the coupling.

Useful in applications where non-hazardous product is being conveyed and where there are no environmental concerns. Available in both Industrial and Marine versions. Consult the factory for more information.

TTMA Series Flange Adapters

- provides a simple and easy way to quickly convert threaded components to a standard TTMA flange configuration
- more durable than welded fabrications due to the solid cast lightweight aluminum design
- design improves flow through adapter even on the 3" reducer
- compact size reduces the overall space needed to install
- for flange drilling standards, see page 669

API Couplers

Dixon Bayco's API coupler is completely modular so the coupler can be built with various face seal combinations to be compatible with different alternative fuel / performance levels and applications. Two models are available: bonded nose seal and replaceable nose seal.

- 4" TTMA inlet mounting flange
- 5 cam design for easy alignment and tight connection
- ball-end handle for easy, comfortable operation
- no special tools needed for maintenance
- shaft seals can be changed without removing coupler from loading arm
- link, shaft, pin and crank: hardened 17-4PH stainless steel
- cam: stainless steel

Technical Specifications:

- weight: 20 lbs.
- maximum working pressure: **150 PSI**
- peak surge pressure: 350 PSI
- operating temperature: **-20°F** to **400°F** (Viton-B® seals)
- maximum flow rate: 600 GPM
- pressure drop: 3 to 4 PSI

Replacement parts are available, contact Dixon for more information.

API coupler with bonded nose seal

Seal Material	Part #	Price/E
Buna	***5300***	**$2275.00**

API Load Only Valve

When used with an API coupler (shown above), the API Load only Valve can be used as a high volume Dry-Disconnect connection, suitable for applications such as rail car loading or unloading.

Description	Part #	Price/E
load only API valve without sight glass, ALH nose ring	***5204LNG***	**$516.05**

API Compatible Rack Cords

- cord is available in coiled or straight lengths
- highly visible safety orange jacket to meet trip hazard requirements
- cord is bonded mechanically and has superior abrasion and oil resistance
- cord sets are interchangeable with Scully and Civacon
- plug body is machined from 6061 aluminum and is color coded Optic Blue or Thermistor Green
- button contacts are made from 316 stainless steel to prevent corrosion
- all other hardware is stainless steel
- all wiring is compatible with standard Scully color codes and wiring number configurations
- the 9 pin conductor is shielded to be compatible with Scully VIP system

coupler with poppet and probe x hose shank

Coupler Size	Hose Shank Size	*Aluminum* Part #	Price/E
4"	3"	***VR4030CS-AL***[1]	**$200.95**

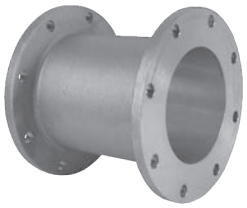

SAFETY ALERT

- The VR4030CS-AL has a Viton® O-ring poppet seal.

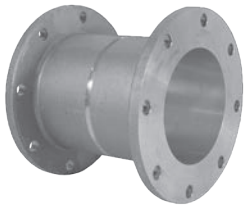

[1] The VR4030CS-AL will interchange with all competitor vapor valves *except* Civacon #633LVH (special bulb design).

TTMA Flange Extensions

Flange extensions are used on load arms to connect the API load coupler to the load arm.
- adds a 6" space between the load arm and the tank truck
- Flange extension with groove provides a specified parting point to prevent excessive damage to the loading arm.

TETF4AL

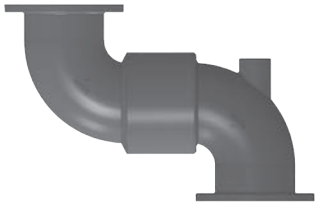

TETFG4AL

Size	Description	*Aluminum* Part #	Price/E
4"	TTMA flange extension	***TETF4AL***	**$127.00**
4"	TTMA flange extension with groove	***TETFG4AL***	**132.00**

Type 35 Loading Arm Swivel

- TTMA loading arm swivel with D style shovel handle
- TTMA flanges on both ends
- shovel handle is used to guide the API load coupler onto the adapter on the tank truck
- long radius elbow improves the flow into the API load coupler and provides spacing between the load arm and the tank truck
- can be used with flange extensions above

style 40

Size	Description	*Aluminum* Part #	Price/E
4"	style 44H tank truck x Buna tank truck flange	***44HTFXTFAL00000***	**$1400.00**

style 30

Type 35 Loading Arm Swivel Replacement Parts

- two repair kits are required for style 50

Size	Description	Part #	Price/E
4"	aluminum nipple	***ATN100x7***	**$20.00**
	D style shovel handle	***100DHAN-AL***	**30.80**
	Buna repair kit	***4RKOBU***	**35.00**
	Viton® repair kit	***4RKOVIVI***	**53.00**

Sealants

Megaboost Grease Gun

- Quick connect threadless barrel reduces downtime when reloading grease. Never worry about crossing threads on the barrel.
- takes half the time to reload grease
- automatically bleeds air when reconnecting the barrel and head, reducing air locks and priming problems
- boost mode - 10,000 PSI clears clogged fittings
- volume mode - 20% more grease per stroke

Part #	Price/E
L1185L	**$334.80**

Thread Sealant Paste

- temperature range: **-300°F** to **500°F**

Can Size	Part #	Price/E	Opt Qty
¼ pint	***LCTS14***	**$14.75**	12
½ pint	***LCTS1***	**21.55**	24
1 pint	***LCTS2***	**33.75**	12

Stainless Steel PTFE Tape ***(Gray)***

- thickness: 4 mil
- temperature range: **-58°F** to **600°F**
- meets Military Specification MIL-T-27730A
- TFE acts as a chemical protection and lubricant
- especially useful on stainless steel threaded joints or connections
- 100% PTFE with nickel added
- nickel acts like a ball bearing

Size	Length	Part #	Price/E	Opt Qty
½"	260"	***TTA50SS***	**$15.70**	10

Industrial Heavy Duty PTFE Tape ***(Pink)***

- thickness: 4 mil
- temperature range: **-400°F** to **500°F**

Size	Length	Part #	Price/E	Opt Qty
½"	540"	***TTBP50***	**$7.50**	330

PTFE Tape for LP Gas ***(Yellow)***

- thickness: 4 mil
- service temperature: **500°F** (260°C)
- Underwriters Listed

Size	Length	Part #	Price/E	Opt Qty
½"	260"	***TTA50LP***	**$3.80**	500

Joint Sealant Gasket Material

- GORE-TEX® Interchangeable
- Form-In-Place expanded PTFE gasket material with adhesive backing
- manufactured from 100% virgin PTFE
- unaffected by all common chemicals (pH from 0-14)
- unlimited shelf life
- resilient with low cold flow
- requires less force than standard gasket materials
- pressure range from vacuum to 3000 PSI
- temperature range: **-450°F** to **600°F**
- made in the USA
- larger spools are available, consult factory for price and availability
- FDA compliant #21CFR177.1550

Size	Length	Part #	Price/E
1/4"	20'	***LCJS4-20***	**$69.45**

Leak Detector

- detects leaks by forming bubbles which remain for up to ten minutes
- will not cause corrosion or deterioration
- color: fluorescent yellow
- non-toxic, non-freezing
- temperature range: **-7°F** (-20°C) to **180°F** (82°C)
- meets Federal specification MIL-L-25567-C

Size	Part #	Price/E	Case Qty
8 oz.	***LCLD***	**$11.90**	24

Dixon Coupling Lubricant

For use in assembly operations involving natural or synthetic rubber or plastic. Also an excellent lubricant when rubber or plastic needs to be cut, machined, pressed, turned, trimmed or ground.

- biodegradable lubricant for coupling shanks

DCL20 DCL80

Size	Part #	Price/E
1 liter	***DCL20***	**$35.70**
4 liters	***DCL80***	**91.25**

WD-40 Smart Straw

- permanently attached straw
- flip up for a precision spray; flip down for regular spray action
- should not be used as a lubricant for coupling shanks SAFETY ALERT
- sold in case quantities only

Size	Part #	Price/E	Case Qty
11 oz.	***WD40***	**$18.80**	12

Coupling Inserter for Large Hose

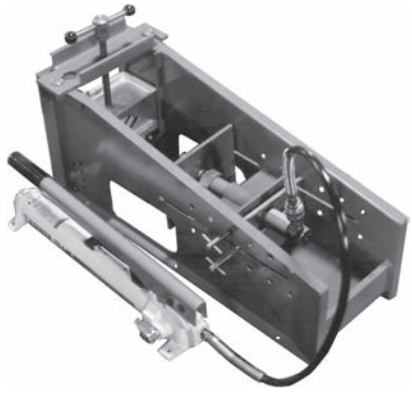

- highly portable
- inserts 4", 5", 6", 8", 10" and 12" couplings
- includes CI96AH pump (shown below)

Part #	Price/E
CI9	**$5180.00**

- *coupling inserter pusher plates (not shown) must be purchased separately*

Hose ID	Part #	Price/E
4" - 5"	***45CIPUSH***	**$300.00**

Coupling Inserters

coupling inserter with hand pump

air/hydraulic foot pump

- for insertion of hose shanks into hose with a 2¾" to 7¼" OD

Description	Part #	Price/E
Supplied with a **10,000 PSI** hand pump and 5 ton ram	***CI96***	**$6015.00**
Supplied with a **10,000 PSI** air/ hydraulic pump and 5 ton ram	***CI96AH***	**7095.00**
Small jaws for 1" to 3" OD hose	***CI9311SML***	**180.00**

Hand Hydrotest Pump

- stainless steel piston, aluminum body
- designed for use in testing pipe lines, pressure tanks and pressure vessels
- uses efficient and long lasting check valves
- cylinder displacement: 1.37 cubic inches
- 0-1000 PSI pressure gauge, 10' pressure hose and quick disconnect coupler included
- piston: 7/8" with 2" stroke

Inlet NPT	Outlet NPT	Working Pressure PSI	Part #	Price/E
½"	½"	**1000**	***HHTP***	**$1827.90**

Hydrostatic Test Pumps

A safe, cost effective pump to test hose before putting it into service.

Electric

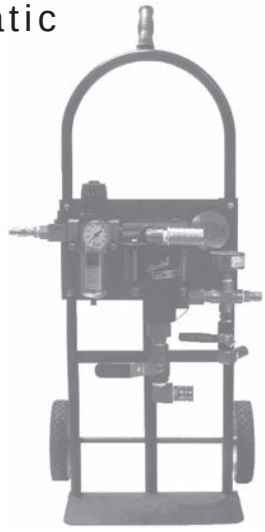

- **1.3 GPM** fill rate
- test pressure: **200** to **2000 PSI**
- suction strainer keeps dirt out of pump
- high pressure test gauge
- 115v motor
- 2 ft. power cord
- easy to use, portable

Description	Part #	Price/E
electric test pump	***ETP***	**$4600.00**

Pneumatic

- **5.5 GPM** fill rate
- test pressure: **0** to **1500 PSI**
- stainless interior
- air gauge for quick, easy adjustment of maximum test pressure
- high pressure test gauge
- filter/regulator for clean, dry air to ensure long life of unit
- on - off valve for air input
- 15 ft. of hose included
- easy to use, portable
- Use of coalescing filter and water filter recommended for prolonged life.

Description	Part #	Price/E
pneumatic test pump	***PTP***	**$5980.00**

Hydrostatic Test Pump Accessories

- cost effective, pre-assembled caps or plugs to quickly set up and test hoses
- Caps and plugs come equipped with ½" brass straight-through plugs for quick attachment to the intermediate hose on the test pump (Pneumatic Test Pump) and bleed-off valve.

cam & groove test caps for male adapters

Spill Kits

oil spill kit

universal spill kit

Spill kits are easily stored behind a seat or in a storage compartment allowing drivers to act quickly when responding to a spill.

Poly-zip bag and bucket kits contain:

- 10 pads (15" x 19")
- 3 socks (3" x 4')
- 2 disposal bags with ties
- 1 pair Nitrile gloves

Part #	Description	Price/E
DSK5-O	oil only, in 6½ gallon pail	**$122.10**
DSK5-U	universal, in 6½ gallon pail	**118.40**
DSKB-O	oil only, in clear poly bag with zipper	**85.10**
DSKB-U	universal, in clear poly bag with zipper	**80.15**

Heavy-Duty Lava Hand Cleaner

- heavy duty hand cleaner with pumice
- 7.5 fl oz pump bottle
- sold in case quantity only

Part #	Case Qty	Price/E
LAVA221	12	**$11.50**

Marking Pens

- marks on wood, glass, paper, metal, and many other surfaces
- permanent mark, but can be removed with fluid remover
- unique valve action prevents tip drying

Color	Part #	Price/E
black	***BK91***	**$14.40**
white	***WT91***	**14.40**
yellow	***YW91***	**14.40**

Dixon Soft Hose Mallet

- soft mallet for pounding metal objects without damaging them
- The head material will not crack and is firmly attached to strong shaft-handle.
- length: 23"
- weight: 10 lbs.

Part #	Price/E
DCM1	**$350.00**

Dixon Hose Knife

- for fast cutting of rubber hose and belting
- guard protects hand while cutting

Part #	Price/E
DRK15	**$24.35**

Diameter Tape

- 6' tape for quickly finding the outside diameter of any cylindrical object
- converts circumference to OD at the measured point
- ABS case

Part #	Price/E
DDT1	**$17.50**

Spiral Guard™ Hose and Cable Protection

Provides heavy duty hose, cable or wire protection. Used in mining, quarrying, forestry, offshore industries and most hydraulic hose applications.

- crush and high abrasion resistance
- chemical and UV ray resistant
- self-lubricating to reduce hose wear
- easy to install on-site
- smooth radius on all edges
- can be used on single or multiple hose bundles
- spiral guard ID is equal to the guard at rest
- sold in coil lengths only

Flame Retardant Product

- approved by MSHA 1C-231/1
- flame retardant and self extinguishing
- temperature range: **-148°F** to **212°F**, (-100°C to 100°C)

Fire Jacket for Hose

Used to protect hose and hose assemblies, tubing, piping, wiring and cables from high temperatures or molten splash. Helps maintain line temperature and reduce environmental overheating and overcooling.

- Sleeving slides easily over hose and expands to go over fittings.
- resistant to hydraulic fluids and lubricating oil
- color is iron oxide red
- compounded silicone rubber coating over fiberglass
- completely non-asbestos
- supplied in 50' lengths
- temperature range: **-65°F** to **500°F** (-54°C to 260°C)

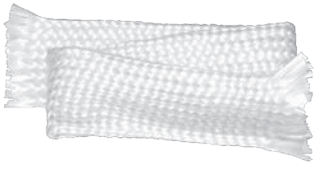

Nominal ID	Part #	Price/E	Nominal ID	Part #	Price/E

Fiberglass Sleeving

- Braided texturized fiberglass tubing provides thermal insulation protection in applications with service temperatures up to **1000°F**.
- supplied in a continuous length of 100'
- 1/16" wall thickness is braided from texturized E-glass filament yarns. The untreated tubing is flexible and expands to cover changing diameters.

Fire Tape for Hose

Silicone rubber tape used to seal the ends of fire sleeves to prevent fraying.

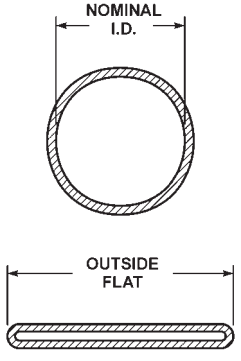

- completely non-asbestos
- color is iron oxide red
- temperature range: **-45°F** to **380°F** (-45°C to 200°C)

Size	Length	Part #	Price/E
1"	12 yards	***FTH100***	**$51.10**

Nylon Protective Sleeves - MSHA Accepted

- Woven nylon tubular sleeving, ideal for use as a protective covering on hydraulic and industrial hose.
- Tight weave of the seamless tubular sleeving helps dispense the flow of fluid in a ruptured hose.
- MSHA accepted, withstands temperatures up to **275°F** (135°C) and fully passes flammability tests.

41"	***SSE41***	**6.25**

WARNING!!
Failure to comply with this warning may result in serious damage and/or personal injury.
Maximum end to end safe stretch = 150% of length
- do not exceed maximum safe stretch
- inspect before each use, do not use if strap is cut, cracked or abraded
- inspect hooks for damage and/or wear. Replace if needed.
- protect strap from sharp edges or heat.
- wear eye protection during use
- do not use this product as the primary tie down
- refer to federal or state regulations for proper tie down methods

SAFETY ALERT

Safety Tag

Dixon strongly recommends the use of a safety tag or warning label on all hose assemblies.

- sold in quantities of 100 only

Size	Part #	Price/E
5" x 2-3/8"	***DWL100***	**$0.40**

WARNING!!
- worn-out hose fittings should be replaced
- loose clamps on hose can be dangerous
- bolt type clamps should be retensioned regularly
- for extra safety, retaining devices such as clips, chains or cables must be used

SAFETY ALERT

Safety Tape

Dixon strongly recommends the use of a safety tag or warning label on all hose assemblies.

- length of tape - 55 yards, approximately 255 warnings

Size	Part #	Price/E
1½"	***DSTW***	**$20.70**

WARNING!!
- worn-out hose fittings should be replaced
- loose clamps on hose can be dangerous
- bolt type clamps should be retensioned regularly
- for extra safety, retaining devices such as clips, chains or cables must be used

SAFETY ALERT

Weatherproof First Aid Kit

- polypropylene case
- kit supports 25 persons
- each kits includes:
  adhesive strips, large wound pads, eye pads, triangular bandage, first aid / burn cream, eye flush, elastic bandages, scissors, forceps, first aid instructions, gauze pads, adhesive tape, antiseptic towelettes, aspirin, cold pack, latex exam gloves
- 10 person and 50 person kits are also available, consult the factory for price and availability

Weight	Part #	Price/E
1.8 lbs.	***FAK25P***	**$72.75**

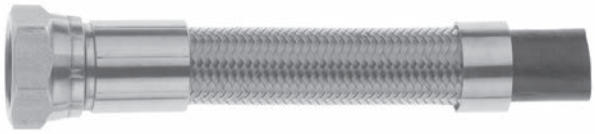

Nominal

Suitable for conveying chemicals, foods, pharmaceuticals, oils, gas, fuels and steam. Available in a variety of end connections in brass, carbon steel and stainless steel.

- nominal standard smooth bore PTFE hose meets SAE100R14
- size range: dash-3 to dash-20
- operating temperature: **-76°F** to **500°F** (-60°C to 260°C)
- 304 stainless braided
- Extruded or heat shrink coverings are available upon request.
- boxed coils (bulk, per ft. lengths and full reels available from the factory)

Nominal PTFE Hose Insertion Tool and Dies

New for 2012

Designed to take the hassle out of installing crimp collars onto braided PTFE Hose. With a few simple steps even the most challenging braid can be easily and safely inserted into the crimp collar.

True ID

Suitable for conveying acids, chemicals, foods and pharmaceuticals.

- range: ¼" to 2"
- operating temperature: **-76°F** to **500°F** (-60°C to 260°C)
- boxed coils (bulk, per ft. lengths and full reels available from the factory)
- stainless braided
- Other braids including synthetic, extruded and heat shrink coverings are available upon request.

Unique Solutions for Your Fastening Needs

Precision Engineered Threaded Inserts

- large inventory - over 24 million inserts in stock ready for immediate shipment
- fast delivery - same day shipment if order is received by 2 p.m. EST, Next Day delivery available
- patented designs - "time tested" designs proven on thousands of products and a wide variety of materials
- quality - patented designs manufactured to exact tolerances
- dependability - we listen to our customer's needs
- custom manufacturing - experience in manufacturing inserts to specific customer requested tolerances and designs
- flexibility - small quantities, large quantities or special runs plus free samples of stock items
- special runs - no minimum quantities on special order parts
- experience - established 1946
- Visa/Mastercard and American Express accepted

Product Selection Guide

type A closed end inserts, type B open end inserts and type C closed end with counter bore inserts

Install Methods	Base Materials	Description
molded-in epoxied-in	thermoset plastics thermoplastics rubber ceramics	A wide range of threaded inserts featuring patented designs for molded-in use. Close tolerance of minor thread diameter and careful burnishing of inner thread crests assure snug fit on pins. Extremely flat ends on inserts (with no burrs, ridges or other defects) mean no leakage of material on the face of the mold. *Available in brass, aluminum and stainless steel.*

type D studded end inserts

Install Methods	Base Materials	Description
molded-in epoxied-in	thermoset plastics thermoplastics rubber ceramics	Threaded stud inserts featuring patented designs for molded-in use. Proportioned for maximum holding strength. Can be screwed to butt flush with a Yardley Type C Insert. *Available in brass.*

bi-sert® inserts

Install Methods	Base Materials	Description
molded-in	thermoset plastics thermoplastics glass-filled plastics	Designed for rotational molding, this insert provides exceptional torque and pull-out resistance. Unique hex design allows it to be used with fibrous materials where the fibers would block the flow of the plastic material around ordinary inserts. Inside diameter held to strict tolerances for a smooth, tight fit on locating pins. *Available in brass and aluminum.*

zap-sert® inserts

Install Methods	Base Materials	Description
molded-in ultrasonic thermal pressed-in	thermoset plastics thermoplastics	Economical design features a lead on both ends making this insert ideal for high volume, automated production. Unique radial barbs provide strong resistance to pull-out and rotation in plastics and thermoplastics. Can be molded-in or installed with ultrasonic or thermal insertion tools. *Available in brass.*

type E closed end and type F open end pressed-in inserts

Install Methods	Base Materials	Description
pressed-in epoxied-in	thermoset plastics thermoplastics rubber ceramics	Spiral knurled, open or closed-ended inserts for pressing into soft materials such as plastics, foamed plastics and rubber. Ideal for use where minimal pull-out strength is needed, but some torque resistance is required. Can also be molded-in and feature patented I.D. design for use with locating pins. *Available in brass and aluminum.*

Product Selection Guide

quick-sert® inserts

Install Methods	Base Materials	Description
pressed-in	aluminum soft metals	Designed for fast easy press-in installation, providing permanent threads in aluminum and other soft metals. Its smooth tapered lead allows easy positioning for quick starts in a pre-drilled hole and the knurled body locks tightly in the host material. Its thick wall design prevents thread distortion. *Available in plated steel.*

sharp-sert® regular, short and flanged series inserts

Install Methods	Base Materials	Description
pressed-in ultrasonic thermal	thermoset plastics thermoplastics wood	Versatile, economical and trouble free, they offer easy, high-speed installation. Curved hooks and lateral flutes lock them into plastics, particle board and wood. Install with ultrasonic or thermal tools or just hammer or press them in. *Available in brass and stainless steel.*

fiber-sert® regular and diecast series inserts

Install Methods	Base Materials	Description
threaded-in	wood particle board ABS foamed plastics	Special design makes them ideal for wood, particle board, ABS and foamed plastics. Large coarse outer threads give great holding power in weaker materials while inside threads stay clean, free of chips. Install with Yardley pneumatic inserter or easy-to-use self-tapping driver. *Available in brass and diecast.*

tri-sert® regular, short, coarse threaded and slotted coarse threaded series inserts

Install Methods	Base Materials	Description
threaded-in	thermoset plastics thermoplastics wood soft metals	For strong threads in plastics, soft metals and wood. Self-tapping, they provide high torque and pull-out resistance. Install with Yardley pneumatic inserter, insert driver or screw driver. *Available in brass, plated steel and stainless steel.*

intro-sert® regular and short series inserts

Install Methods	Base Materials	Description
ultrasonic thermal	thermoplastics ABS polycarbonates	For use in thermoplastic materials such as ABS and polycarbonates. Intro-Serts have no sharp edges on their outer annular ribs to cause residual stress cracking. Install them fast and easily with ultrasonic or thermal insertion tools. *Available in brass, aluminum and stainless steel.*

tri-sert® slotted coarse threaded inserts

Install Methods	Base Materials	Description
screwdriver Yardley inserting tool	brittle or weak plastics	Inserts are internally and externally threaded metal inserts with a slot on one end. The inserts tap their own threads as they are (turned) into drilled or cored holes. The wider spaced external threads reduce installation torque and provide a stronger hold. *Available in brass and stainless steel. Custom sizes and materials are also available.*

Contact Yardley at 800.457.0154 for more information on all the threaded inserts on pages 645 and 646

Dixon's Mobile Connection Trailers

Dixon's mobile training trailers provide hands-on opportunities for distributors and end users to learn more about the selection, installation and maintenance of Dixon fittings and accessories. Call 800.355.1991 for additional information.

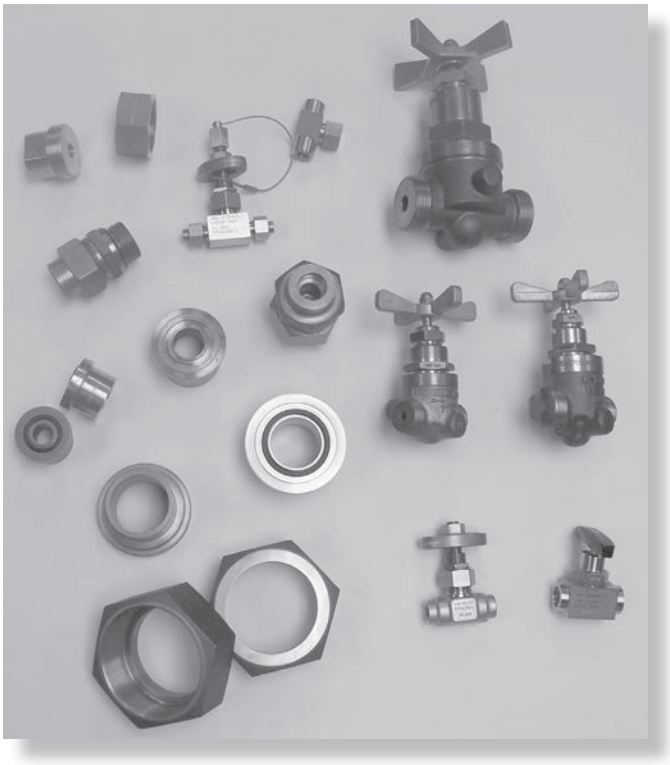

Hose Assembly Safety Survey Center for:
- program introduction
- classroom instruction with audio visual display
- presentation of survey results and follow-up

Training for Distributors and End-Users in:
- product selection
- product installation
- safe product usage

Product Displays featuring:
- Dixon Accessories
- Dixon Bayco
- Dixon Boss
- Dixon Brass
- Dixon Powhatan
- Dixon Quick Coupling
- Dixon Sanitary
- Dixon Specialty Hose

Hydrasearch Company, Inc.

100 Log Canoe Circle
Stevensville, MD 21666

Fax (410) 643-8954
sales@hydrasearch.com
www.hydrasearch.com

Hydrasearch, established in 1962, is a division of Dixon and a large multi-divisional manufacturer and global distributor of diverse commercial hose, technical products and fittings. In 1995 Hydrasearch purchased the Technical Products Company, allowing us to introduce a line of high pressure O-ring face seal valves and pipe and tube fittings.

Today, Hydrasearch products can be found on submarines, surface ships, helicopters, fixed-wing aircraft, tanks, and ground equipment throughout the world. With our experienced staff, expanding product line, and growing global distribution, Hydrasearch continues to improve and expand to meet your needs today and into the future.

Technical Products

- valves and accessories
- valves, instrumentation and adapters
- fittings, couplings and union assemblies
- O-rings and Sil-Braze rings
- hose end fittings and adapters
- cross reference to CPV-O-Seal available

Product Literature

- Marine Hose Fittings (Catalog 109)
- Underway Replenishment Products (Catalog 709)
- Aerospace Hose & Fittings (Catalog 209)
- Technical Products (Catalog 701)

Buck Company is a quality automated sand cast foundry designed to handle medium to high volume castings. These castings range from one half pound to one hundred pounds in malleable iron, ductile iron and gray iron. We can also handle jobs ranging from one half pound to seventy five pounds in brass, bronze, and aluminum sand casting. ISO2000 certified.

Selecting Materials

This information is intended to help make general comparisons between different available materials.

Material	Features and Benefits
Stainless Steel	A corrosion-resistant material that provides high strength at high temperatures, helps prevent contamination of product being transported, maintains cleanliness, and retains a lustrous appearance. Harder then brass. *Type 304* is a low-carbon chromium-nickel stainless steel. *Type 316* is similar to type 304, but has a high nickel content as well as a molybdenum for stronger resistance to heat and corrosion. Often used for water, oil, gas, and steam in low- to high-pressure applications.
Brass	Has good corrosion resistance and is less expensive than stainless steel. Is softer and easier to thread than stainless steel and forms tight seals. It can be used interchangeably with copper where heavier walls are required. Found in plumbing and heating application. Also good with oil, natural gas, and air. Resists corrosion from salt water as well as fresh water polluted with waste from mineral acids and peaty soils. Use in low- to high-pressures applications.
Steel	Used in noncorrosive environments. This carbon- and iron-based metal is hard and strong. It is an economical alternative to stainless steel and brass in high-pressure applications. For use with water, oil, gas, and steam in low- to high-pressure applications where corrosion is not a problem.

SAFETY ALERT

Product application is based not only on material selection but on design of product for intended use.
Please contact the factory for selection of the proper fitting for your application.

Trademarks

Delrin®, Kevlar® and Zytel® are registered trademarks of E.I. duPont Nemours and Company.

Kalrez® and Viton® are registered trademarks of DuPont Dow Elastomers.

All other trademarks appearing in Dixon's Illustrated Price List are the property of their respective owners.

Corrosion Resistance of Coupling Material

Caution
The following data has been compiled from generally available sources and should not be relied upon without consulting and following the **specific recommendations of the manufacturer regarding particular** coupling materials.

Ratings

Metal	Non-Metal	Gasket/Seal Material
1 = Excellent	A = Acceptable	T = PTFE
2 = Good	X = Not Recommended	V = Viton®
3 = Fair	- = Contact Factory	E = EPDM, EPR
X = Not Recommended		N = Neoprene
- = Contact Factory		B = Buna N

Note: (1) Ratings given are based at 70°F. Chemical compatibility varies greatly with temperature. For applications at temperatures other than 70°F, contact the Factory for recommendations.

(2) Gasket / seal materials are not necessarily listed in order of preference.

(3) Chemical resistance of a material does not necessarily indicate the suitability of a fitting in a given application due to variables such as improper clamp and coupling application, special hose construction, gasket material, etc.

Special caution should be taken when handling hazardous materials.

Degrees Celsius = 5/9 (Degrees F -32)

Pressure Conversions

100 PSI = 6.9 Bars
250 PSI = 17.25 Bars
600 PSI = 41.4 Bars

5 Bars = 72.5 PSI
10 Bars = 145 PSI
25 Bars = 362.5 PSI

Measurement Information

Measures of Pressure

1 Pound Per Square Inch = 144 Pounds Per Square Foot = 0.068 Atmosphere = 2.042 Inches of Mercury at 62°F = 27.7 Inches of Water at 62°F = 2.31 Feet of Water at 62°F.

1 Atmosphere = 30 Inches of Mercury at 62°F = 14.7 Pounds Per Square Inch = 2116.3 Pounds Per Square Foot = 33.95 Feet of Water at 62°F.

1 Foot of Water at 62°F = 62.355 Pounds Per Square Foot = 0.433 Pounds Per Square Inch.

1 Inch of Mercury at 62°F = 1.132 Feet of Water = 13.58 Inches of Water = 0.491 Pounds Per Square Inch.

Column of Water 12 Inches High, 1 Inch in Diameter = .341 Pounds

If temperature is kept constant, the volume of a given mass of gas is inversely proportional to the pressure which is exerted upon it.

Length Conversion Constants

Millimeters x .039370 = Inches
Meters x 39.370 = Inches
Meters x 3.2808 = Feet
Meters x 1.09361 = Yards
Kilometers x 3,280.8 = Feet
Kilometers x .62137 = Statute Mile
Kilometers x .53959 = Nautical Miles

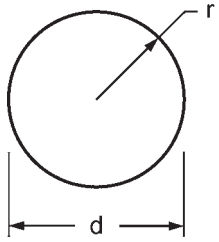

Inches x 25.4001 = Millimeters
Inches x .0254 = Meters
Feet x .30480 = Meters
Yards x .91440 = Meters
Feet x .0003048 = Kilometers
Statute Miles x 1.60935 = Kilometers
Nautical Miles x 1.85325 = Kilometers

Weight Conversion Constants

Grams x .03527 = Ounces (Avd.)
Grams x .033818 = Fluid Ounces (Water)
Kilograms x 35.27 = Ounces (Avd.)
Kilograms x 2.20462 = Pounds (Avd.)

Ounces (Avd.) x 28.35 = Grams
Fluid Ounces (Water) x 29.57 = Grams
Ounces (Avd.) x .02835 = Kilograms
Pounds (Avd.) x .45359 = Kilograms

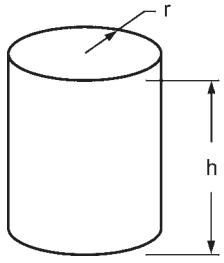

Circumference of a Circle

Circumference = $2\pi r = \pi d = 3.14159\ d$

Area = $\pi r^2 = \pi \frac{d^2}{4} = .78539d^2$

Right Cylinder

r = radius
h = length

Volume = $\pi r^2 h$

Surface Area = $2\pi r\ (r + h)$

If end planes are parallel but not at 90° to h, the same formulas apply, but a slice at 90° through the cylinder must be used to determine r.

Bolt Tightening Sequence for Dixon Boss Clamps

Note:
1. The correct size Boss clamp must be used.
2. Bolts in Boss clamps are designed to bend as they are tightened. This allows the clamp to conform to the hose outside diameter.
3. Always tighten bolts to their specified torque value. This torque value can be found on the pages 99-100.
4. Periodic re-tightening of bolts is required due to "cold flow" phenomenon present in all rubber hoses.
5. Boss Clamps are for single use only! Once removed they are to be discarded.

2 Bolt Dixon Boss Clamp Bolt Tightening Sequence

Using a torque wrench, begin tightening the bolts as follows:

a) First bolt (nut facing assembler) 1 full turn.

b) Second bolt (opposite first bolt) 1 full turn.

c) Repeat procedure "a" and "b" until both bolts have reached the recommended torque.

d) Remove assembly from vise.

4 Bolt Dixon Boss Clamp Bolt Tightening Sequence

Using a torque wrench, begin tightening the bolts as follows:

a) Back bolt (bolt with nut facing assembler that is furthest away from gripping finger) 1 full turn.

b) Front bolt (bolt with nut facing assembler that is closest to gripping finger) 1 full turn.

c) Snug by hand (if bolts are loose) nuts on opposite side of bolts just torqued.

d) Opposite side back bolt (bolt with nut facing assembler furthest away from gripping finger) 1 full turn.

e) Opposite side front bolt (bolt with nut facing assembler closest to gripping finger) 1 full turn.

f) Snug by hand (if bolts are loose) nuts on opposite side of bolts just torqued.

g) Repeat above procedure "a" through "f" until all of the bolts have reached the recommended torque.

h) Remove assembly from vise.

6 Bolt Dixon Boss Clamp Bolt Tightening Sequence

Using a torque wrench, begin tightening the bolts as follows:

a) Back bolt (bolt with nut facing assembler that is furthest away from gripping finger) having "X" near it one full turn.

b) Front bolt (bolt with nut facing assembler that is closest to gripping finger) of same segment one full turn.

c) Moving to clamp segment to the left of the one just tightened, snug bolts by hand (if bolts are loose).

d) Back bolt to one full turn.

e) Front bolt one full turn.

f) Moving to clamp segment to the left of the one just tightened, snug bolts by hand (if bolts are loose).

g) Back bolt one full turn.

h) Front bolt one full turn.

i) Repeat above procedure "a" through "h" until all of the bolts have reached the recommended torque.

j) Remove assembly from vise.

Identifying Threads

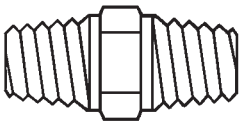

Pipe Threads

Pipe threads are either tapered or straight (parallel). The two styles are not compatible except for NPSL (National Pipe Straight Locknut), which is compatible with NPT.

Tapered threads

Tapered threads are the most common type of thread available. As the name implies, they have a slight taper. When mated together and tightened, the threads compress to form a seal. The mating threads both hold the fitting in place and seal the connection. The most widely used pipe threads in North America are NPT (National Pipe Taper). Some confusion may result from the use of NPT, FPT, and MPT in describing threads. Both FPT and MPT are NPT threads, with FPT meaning female threads (internal) and MPT meaning male threads (external).

NPTF (Dryseal) threads are modified NPT threads, which are less likely to leak without a sealant. For a leak-free seal, we recommend using a sealant compound or PTFE tape. You can use NPTF threads with NPT threads, but you'll lose some of the leak-free characteristics.

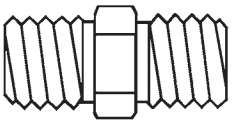

tapered threads

Straight threads

Straight (parallel) threads are used for mechanical joining. They serve one purpose - to hold a fitting in place. As a result, an O-ring (elastomer), hard metal seal or a soft seat seal is required. When used together, the threads and sealing method provide a better overall seal than tapered threads. Straight pipe threads include NPSM (National Pipe Straight Mechanical), NPSL (National Pipe Straight Locknut) and NPSH (National Pipe Straight Hose) conform to SAE (Society of Automotive Engineers specifications. Sizing and pitches differ from the NPT threads

Less common straight threads are GHT (Garden Hose) and NST (fire hose coupling).

straight threads

NPT vs. BSP (British Standard Pipe)

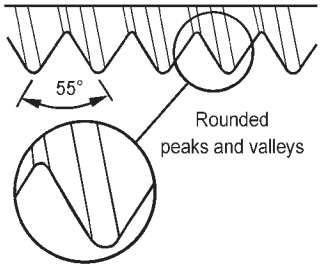

BSP threads are common in many countries outside the United States. BSP consists of two types of threads - BSPT (British Standard Pipe Taper) and BSPP (British Standard Pipe Parallel).

BSPT threads have a slight taper similar to NPT. BSPP threads are straight (parallel) threads and have the same thread angle, shape and threads per inch (pitch) as BSPT threads. *BSPT and BSPP threads should not be substituted for NPT threads*.

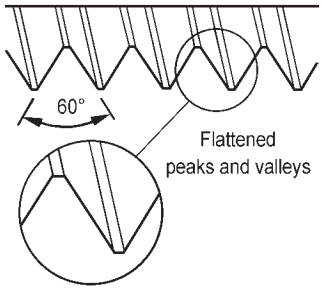

NPT and BSPT/BSPP threads have different angles, shape, and (in most cases) threads per inch (pitch). The thread angle is 60° for NPT threads; 55° for BSPT/BSPP threads. NPT threads are flattened at the peaks and valleys, while BSPT/BSPP threads are rounded.

Nominal Pipe Size	Threads per inch

NPT threads

Identifying Threads

It is important to identify the threads required before ordering couplings.

Identifying threads can sometimes be the most difficult and frustrating part of coupling selection. However, without the right combination of threads, you may not provide a functional or safe connection.

The diameters, threads per inch (TPI) and thread pitch, etc. are necessary to completely identify a thread. Ring, Plug and GO/NOGO gauges are required to accurately gauge or identify threads. In the field, in the absence of these gauges, thread leaf gauges can be used to identify the Threads Per Inch (TPI) and the thread pitch. On threads you have determined to be straight threads, a caliper can be used to measure the Outside Diameter of the Male (ODM) or the Inside Diameter of the Female (IDF). A caliper can also be used to take measurements of tapered thread diameters. However, these are more difficult to define because of the taper. Fortunately, there are few tapered threads to deal with and these can usually be identified from the nominal ODM and the TPI.

However, identifying the thread may not fully identify what is needed in a mating fitting. The application is the primary *limiting factor on the thread type used.* Dixon offers products with a wide variety of threads used with hose, pipe and hydraulics.

When attempting to choose a fitting, it is always advisable to first identify the thread to which it must connect. This may entail checking with a fitting or equipment manufacturer.

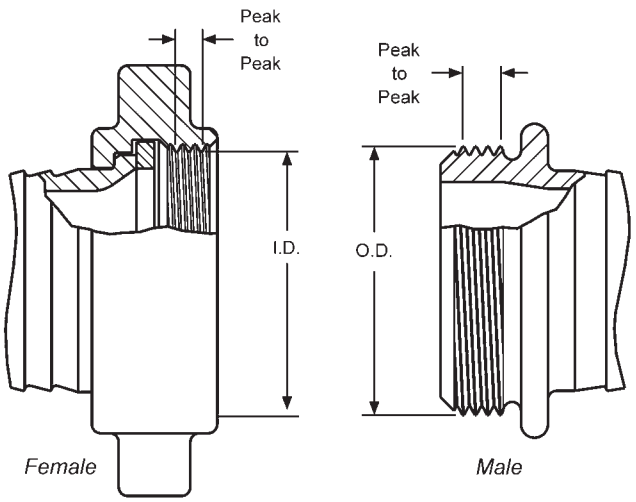

The fire hose thread specifications for some local municipal fire equipment and hydrants may vary according to local specifications. These can generally be most easily identified by contacting the local fire department responsible for the hydrant. The most common thread used on fire equipment is National Standard Thread (NST), also known as National Hose thread (NH).

When it is not possible to identify the thread:

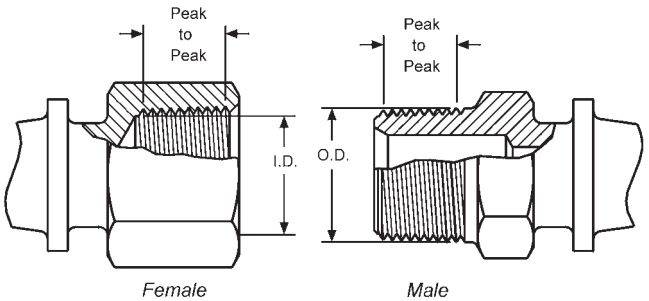

1) Determine the number of threads per inch by measuring the distance from peak of thread to peak of thread across the largest number of whole threads. Then divide the number of threads by the measurement (This will provide the TPI).
2) Check to see if the thread is straight or tapered.
   a) Straight Threads
      Measure the Outside Diameter of the Male (ODM) or the Inside Diameter of the Female (IDF), from peak of thread to peak of thread.
   b) Tapered Threads
      Measure the Outside Diameter of the Male (ODM) at the large end and the small end, or the Inside Diameter of the Female (IDF) at the large end and the small end, from peak of thread to peak of thread. Then measure the Outside Diameter (OD) of the unthreaded pipe.

Once the application and these two pieces of information have been determined, the thread can generally be determined. When in doubt, contact the factory.

Thread Sealing Tips

Thread Sealing Tips

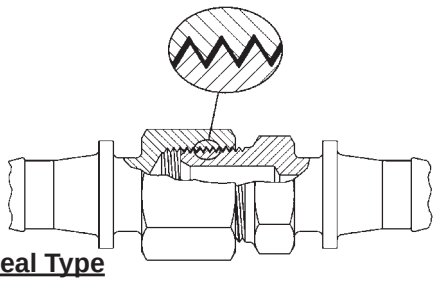

Sealing NPT threads can be an exasperating experience if certain techniques are not followed. The following tips will help alleviate many common problems in thread sealing:

1. Always use some type of sealant (tape or paste) and apply sealant to male thread only. If using a hydraulic sealant, allow sufficient curing time before system is pressurized.
2. When using tape sealant, wrap the threads in a clock-wise motion starting at the first thread and, as layers are applied, work towards the imperfect (vanishing) thread. If the system that the connection being made to cannot tolerate foreign matter (i.e. air systems), leave the first thread exposed and apply the tape sealant as outlined above.
3. When using paste sealant, apply to threads with a brush, using the brush to work the sealant into the threads. Apply enough sealant to fill in all the threads all the way around.
4. When connecting one stainless steel part to another stainless steel part that will require future disassembly, use a thread sealant that is designed for stainless steel (see page 634). This stainless steel thread sealant is also useful when connecting aluminum to aluminum that needs to be disconnected in the future. These two materials gall easily, and if the correct sealant is not used, it can be next to impossible to disassemble.
5. When connecting parts made of dissimilar metals (i.e. steel and aluminum), standard tape or paste sealant performs satisfactory.
6. For sizes 2" and below, tape or paste performs satisfactory. When using thread tape, four wraps (covering all necessary threads) is usually sufficient.
7. For sizes 2½" and above, thread paste is recommended. If thread tape is used, eight wraps (covering all necessary threads) is usually sufficient. Apply more wraps if necessary.
8. For stubborn to seal threads, apply a normal coating of thread paste followed by a normal layer of thread tape.
9. For extremely stubborn to seal threads, apply a normal coating of thread paste followed by a single layer of gauze bandage followed by a normal layer of thread tape.

Caution!

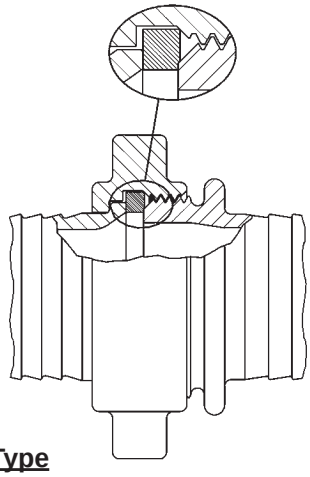

When this procedure is done, the connection becomes permanent. Extreme measures will be necessary to disconnect these components. *All other measures to seal the threads should be explored prior to use of this technique.*

10. Over-tightening threads can be just as detrimental as insufficient tightening. For sizes 2" and below, hand tighten the components and, with a wrench, tighten 3 full turns. For sizes 2½" and above, hand tighten the components and, with a wrench, tighten 2 full turns.

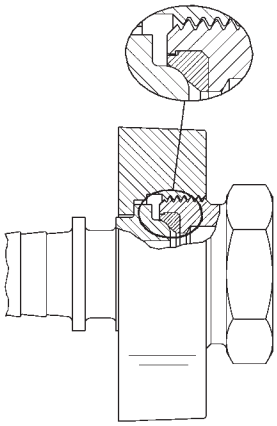

Thread Seal Type

- A seal is obtained by applying a sealant to the male thread before engaging.
- The sealant is used to prevent spiral leakage.
- Thread tape or paste is the preferred sealant in this type of application.
- Please refer to page 634 for thread tape options.

Washer Seal Type

- A seal is obtained when the male thread is tightened down onto the washer of the female assembly.
- The washer should be inspected regularly and replaced as needed to prevent leakage.
- Please refer to pages 272, 275 and 606 for replacement washers.

Mechanical Seal Type

- A seal is obtained through metal to metal contact or metal to seal contact, i.e. JIC couplings (page 385) have a metal to metal seal. Boss Ground Joint couplings (pages 93, 96) have a metal to seal contact, (shown above).
- The couplings should be retightened as needed to prevent leakage.

Force Chart

Force (In Pounds)

Note: For hose I.D.'s from 1-1/4" to 12" the force in pounds is greater than the PSI.

- *Force is the dynamic power which is exported longitudinally through a hose, towards the ends. To arrive at the number of pounds of force exerted, you merely multiply the area of the I.D. times the working pressure being used.*
- Area of a circle: πr^2 (PI [3.1416] times radius squared)
- Force = Area x Pressure

Pressure - Temperature Ratings

Pressure Class	150	300
Test Pressure	425	1100
Service Temperature	Working Pressure	
-20 to 100	275	720
150	255	710
200	240	700
250	225	690
300	210	680
350	195	675
400	180	665
450	165	650
500	150	625
550	140	590
600	130	555
650	120	515
700	110	470
750	100	425

Note: Ratings apply to all products covered by USA B16.5 valves conforming to the requirements of this standard must, in other respects, merit these ratings.

All ratings are maximum allowable non-shock pressures (PSIG) at the tabulated temperatures (degree Fahrenheit) and may be interpolated between temperatures shown. The primary service pressure ratings are shown in bold face type. Temperatures are those on the inside of the pressure retaining structure.

The use of these ratings requires gaskets conforming to the requirements of USA B16.5. The user is responsible for selecting gaskets of dimensions and materials to withstand the required bolt loading without injurious crushing, and suitable for the service conditions in all other respects.

Pipe Dimensions

Replacement Washers for Hydrant Adapters and Fire Hose Nozzles

The "sw" swivel washer on page 478 replaces the gaskets in the following:

- hydrant adapters: HA, RHA, AHA
- cam and groove hydrant adapter
- female x male hex nipples (FM series)
- brass fog nozzles (BFN series)
- brass electrical all-fog nozzles (BFNE series)
- heavy duty brass industrial fog nozzles (HFN series)
- higher pressure brass industrial fog nozzles (HPFN series)
- brass rack nozzles (BRN series)
- U/L play pipe
- tip for U/L play pipe
- aluminum ball shut off (ABSO series)

The "CFG" gaskets on page 519 replace the following:

- constant flow thermoplastic fog nozzles (CFB)
- blue thermoplastic refinery fog nozzles (RNB)

The "FNG" gaskets on page 520 replace the following:

- thermoplastic fog nozzles (PFNB, FNB, FN, SL)
- thermoplastic fog nozzles for electrical fires (FNBE)

The gaskets for the following parts have to special ordered, please contact customer service at 1-877-712-6179:

- Coast Guard approved water fog nozzle
- US Coast Guard approved fog nozzle
- aluminum tip for ball shut-off nozzles
- monitor nozzle
- steel FirePro nozzle
- Master Stream nozzle

Water Data and Formulas

1 gallon water = 231 cubic inches = 8.333 pounds

1 pound of water = 27.7 cubic inches

1 cubic foot water = 7.5 gallons = 62.5 pounds (salt water weighs approximately 64.3 pounds per cubic foot)

Pounds per square inch at bottom of a column of water = height of column in feet x .434

1 miner's inch = 9 to 12 gallons per minute

Horsepower to Raise Water
If pumping liquid other than water, multiply the gallons per minute below by the liquids specific gravity

$$\text{Horsepower} = \frac{\text{gallons per minute x total head in feet}}{3960}$$

Gallons Per Minute through a Pipe
GPM = .0408 x pipe diameter inches^2 x feet/minute water velocity

Weight of Water in a Pipe
Pounds water = pipe length feet x pipe diameter inches^2 x .34

L Distance (inches)	Gallons per Minute Discharge for a Given Nominal Pipe Diameter D (inches)

75	53	95	154	329	591	955	2035	5910
100	62	112	180	384	690	1115	2377	6904
125	70	126	203	433	779	1258	2681	7788
150	77	139	224	478	859	1388	2958	8593
200	90	162	262	558	1004	1621	3455	10038

Figures are to be used as a guide since the hose inside diameter tolerance, the type of fittings used, and orifice restriction all influence the actual discharge. Thus, variations plus or minus from the table may be obtained in actual service.

10	4.33	90	38.98	200	86.62	1000	433.00

Note: One foot of water at 62° F equals 0.433 PSI.
To find the PSI for any feet head not given in the table, multiply the feet head by 0.433.

Maximum Recommended Air Flow (SCFM) Through ANSI Standard Weight Schedule 40 Metal Pipe

The flow values in the table below are based on a pressure drop of 10% of the applied pressure per 100 feet of pipe for 1/8", 1/4", 3/8", and 1/2" pipe sizes; and a pressure drop of 5% of the applied pressure per 100 feet of pipe for 3/4", 1", 1-1/4", 2", 2-1/2", 3" pipe sizes. The table gives recommended flows for pipe sizes at listed pressures and should be used to determine appropriate piping for air systems.

Applied Pressure **PSI**	Nominal Standard Pipe Size										
	1/8"	*1/4"*	*3/8"*	*1/2"*	*3/4"*	*1"*	*1-1/4"*	*1-1/2"*	*2"*	*2-1/2"*	*3"*

PSI = pounds/square inch; CFM = cubic feet/minute

Formulas

Air Velocity in a Pipe

Using the equation and typical values of V, D and L explained to the right approximate values of P are computed as follows:

Velocity Ft/Sec	Pipe Diameter in Inches, 10' long				
	1	2	4	6	10
1	.0004	.0002	.0001	.00007	.00004
2	.0016	.0008	.0004	.00030	.00016
5	.0100	.0050	.0025	.00170	.0010
10	.0400	.0200	.0100	.00670	.0040
15	.0900	.0450	.0225	.01500	.0090
20	.1600	0080	.0400	.02700	.0160
25	.2500	.1250	.0625	.04170	.0250
30	.3600	.1800	.0900	.06000	.0360

$$V = \sqrt{\frac{25{,}000\ DP}{L}}$$

V = air velocity in feet per second
D = pipe inside diameter in inches
L = length of pipe in feet
P = pressure loss due to air friction in ounces/square inch

formula from B.F.Sturtevant Company

Air Volume Discharged from Pipe

CFM = air volume in cubic feet per minute
V = air velocity in feet per second as determined in the equation at the top of this page
A = cross section area of pipe in square feet

$$CFM = 60VA$$

Boyle's Law

If temperature is kept constant, the volume of a given mass of gas is inversely proportional to the pressure which is exerted upon it.

$$\frac{\text{Initial Pressure}}{\text{Final Pressure}} = \frac{\text{Final Volume}}{\text{Initial Volume}}$$

Suggested Pipe Size for Compressed Air Flow at 100 PSI Length of Run, Feet

SCFM Air Flow	25	50	75	100	150	200	300	500	1000	Compressor HP

500	2	2½	2½	3	3	2½	3½	3½	4	125

On a compressed air distribution system, pressure losses greater than 3% are considered excessive, and a well-designed system having a steady rate of air flow is usually designed for not more than a 1% loss or 1 PSI for a 100 PSI system. The pipe size depends not only on the volume of air flow but how far it must be carried. To hold the distribution loss to 1 PSI, pipes of larger diameter must be used on longer runs to carry the same flow that can be handled by smaller pipes on shorter runs.

Figures in the body of the chart above are pipe sizes recommended on a 100 PSI system to carry air with less than 1 PSI loss. When measuring lengths of runs, add 5' of length for each pipe fitting. If carrying 120 PSI pressure these sizes will carry slightly more air than shown, or pressure loss will be slightly less than 1 PSI. If carrying 80 PSI pressure these pipes will carry slightly less air at 1 PSI pressure loss than shown in the chart.

The left column of the chart shows the volume of air to be carried. It is difficult to estimate the air flow volume to be carried in each leg of the distribution system. This varies with the application. On some applications, like in a large plant with many legs in the distribution system serving dozens of air-operated machines, the air usage may be at a fairly steady rate. Other applications, usually on small systems, may have to carry a high surge of air if several machines happen to be operated at the same time. Then there may be a period with almost no flow.

To make a realistic estimate of air flow volume, the far right column of the chart showing compressor HP may be used. On steady pumping, a compressor will produce a minimum of 4 SCFM air flow for each 1 HP of capacity. This is a conservative figure, as most compressors will produce 5 or 6 SCFM.

For example, a 25 HP compressor will produce at least 100 SCFM of air as shown in the far left column on the same line as 25 HP.

Air Receiver Capacities

If your tank is not listed in the table to the right, use the following formula to calculate the tank size (gallons) and then estimate the cubic feet tank capacity at a given pressure from the table above.

$$\text{Tank Gallons} = \frac{\text{Tank Height} \times (\text{Tank Radius})^2}{73.53}$$

Height and Radius are in inches

Tank Size (inches)	Tank Size (gallons)	Gauge Pressure on Tank (PSI)			
		0	**100**	**150**	**200**
		Cubic Feet Tank Capacity			
12 x 24	10	1.3	11	15	19
14 x 36	20	2.7	21	30	39
16 x 36	30	4.0	31	45	59
20 x 48	60	8.0	62	90	117
20 x 63	80	10.7	83	120	156
24 x 68	120	16.0	125	180	234
30 x 84	240	32.0	250	360	467

Air Hose Friction

Hose Size (inches)	CFM thru 50' Hose	Gauge Pressure - Pounds/sq inch

	130	7.0	3.1	2.0	1.5

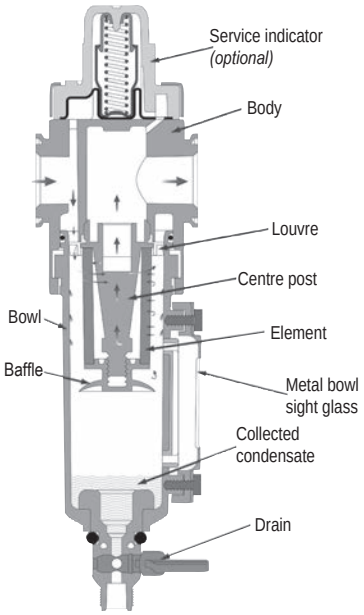

PSI = pressure in pounds/square inch
CFM = air flow in cubic feet/minute

+ pressure loss is too great and therefore the combination of Hose Size, CFM, and Gauge Pressure is not recommended. Gauge Pressures the indicated air pressure in pounds/square inch, at the source (i.e. the air compressor receiver tank)

Simple Filter Troubleshooting

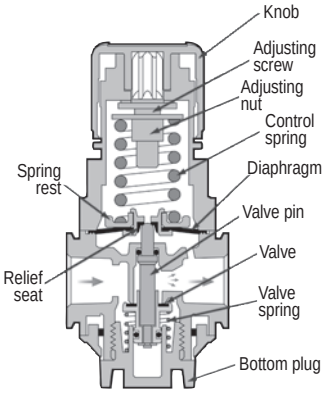

Malfunction	Possible cause	Remedy
Excessive pressure drop	Micron rating of element too small.	Use larger micron element size for application.
	Filter element blocked.	1. Clean element (not coalescing element). 2. Replace with new element.
	Flow requirement greater than filter capacity.	Use larger filter.
Dirt passing through filter	Element seals missing or defective (N.B. Seals not required on some units).	1. Replace seal. 2. Tighten element.
	Damaged element.	Replace element.
Water passing through filter	Water level in bowl above baffle.	Drain water.
	Flow capacity of filter exceeded.	Maintain flow within capacity of filter or change to filter capable of handling desired flows.
Crazing of polycarbonate bowl or milky appearance	Bowl has been cleaned with incompatible fluid.	Replace bowl. (Clean only with clean warm water and soap.)
	Bowl is being used in an area containing fumes or vapors incompatible with polycarbonate.	Replace bowl. Eliminate source of problem or convert from plastic to metal bowls.
	Compressor oil vapor may be causing problem.	Replace bowl. Eliminate source of problem or convert from plastic to metal bowls.
	Air intake to compressor may contain fumes or vapor incompatible with polycarbonate.	Replace bowl. Eliminate source of problem or convert from plastic to metal bowls.
Water beyond the filter	Inlet air has a high temperature and as it cools downstream, moisture condenses to water.	Fit dryer, pre-cool air or fit filter immediately prior to application.

General Purpose Filter

Simple Regulator Troubleshooting

General Purpose Regulator

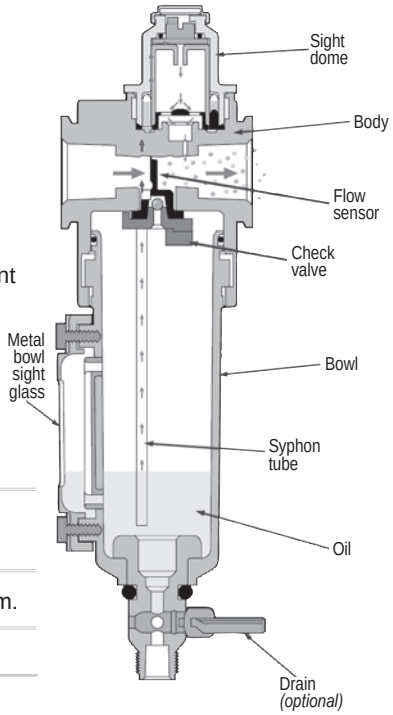

Malfunction	Possible cause	Remedy
Regulator creep (increase in secondary pressure due to leak from primary)	Dirty or cut valve elastomers. Nick in valve seat.	Replace or clean valve. If body or valve seat is damaged it can be replaced on some models. On others replacement of complete regulator is required.
Won't relieve secondary pressure	Non-relieving diaphragm assembly.	If this feature is required, replace with relieving type diaphragm assembly.
Won't reach desired pressure	Regulating spring with low spring rate.	Use regulating spring with spring rate designed to cover desired range.
Excessive leak from relief hole	Damaged relief seat. Ruptured diaphragm. Leakage past valve causing secondary to increase somewhat and open relief seat.	Replace diaphragm assembly. Replace or clean valve.
Regulator chatter	A resonant condition is generally only encountered under a certain set of conditions of flow and pressure and then only in some applications in which regulator couples with other system components.	Replace spring with a higher pressure range spring. Replace with a piston type regulator since they have less tendency to chatter.
Regulator difficult to adjust	Adjusting screw or knob locking device in locked position. Contaminants in adjusting screw threads.	Pull to unlock knob and adjust; push knob to lock. Threaded adjusting screws: loosen lock nut, remove adjusting screw, clean thread and lubricate. Place some lubricant on tip of screw.

Simple Lubricator Troubleshooting

Malfunction	Possible cause	Remedy
No Drip Rate	Oil adjustment knob fully clockwise	Readjust knob.
	Low oil level	Check oil level.
	Airflow through lubricator too low	Use smaller size lubricator.
		Remove bowl and sight feed adjustment dome and clear syphon tube.
	Blocked oil filter screen	Remove sight feed adjustment dome and clean or replace screen located in dome assembly.
	Air leaks	Check bowl, filler plug and sight dome seals. Tighten if necessary.
Oil Foaming	Over aeration	Check bowl seals for slight leaks.
Oil Emulsified	Water in lubricator	Fit filter immediately upstream.
Drip Rate changes after setting	Fade	Readjust drip rate.

Oil-Fog Lubricator

Setting Lubricator Drip Rates

What is the correct drip rate setting?

The drip rate will depend on the application, the amount of lubrication required, the flow through the lubricator and the lubricator type. In Micro-Fog lubricators only 10% of the droplets in the sight dome are carried downstream. The drip rate in Micro-Fog lubricators therefore tends to be much higher. The following table can be used to estimate drip rate for required flow. This is very much a rule of thumb. In practice it is necessary to fine tune the oil drip rate in each application.

Typical Drip Rate per Minute Micro-Fog	Typical Drip Rate per Oil-Fog	Approximate Flow SCFM (dm^3/s)
20	2	10 (5)
40	4	20 (10)
60	6	30 (15)
80	8	40 (20)
100	10	50 (25)
120	12	60 (30)

Can the drip rate be shut off?

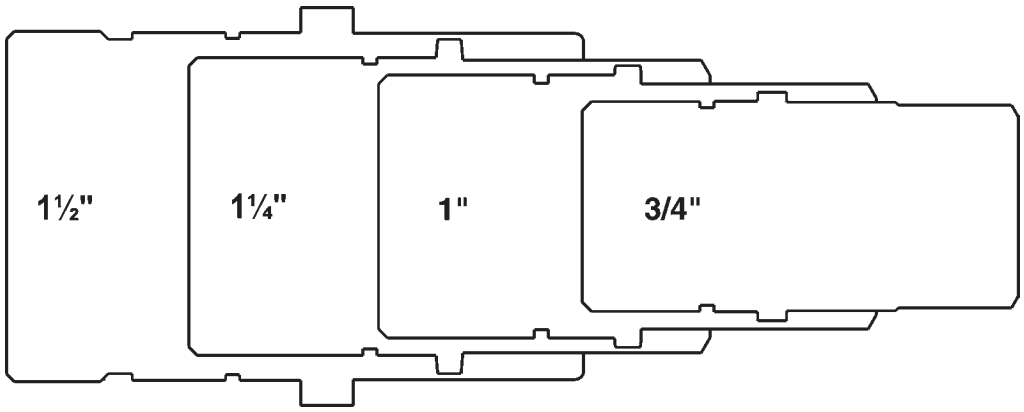

In lubricators with needle valve type sight dome, yes.
Some Norgren sight domes use a felt pad which is soaked in oil at the point where the drops are formed. With this type of sight dome the oil droplets cease once the felt pad dries out. With the new style dome (L72/73/74 and L07) complete shut off is not possible. Minimum adjustment for the drip rate is around 1 drop per minute.

Valve Selection Guide

Ball Valve

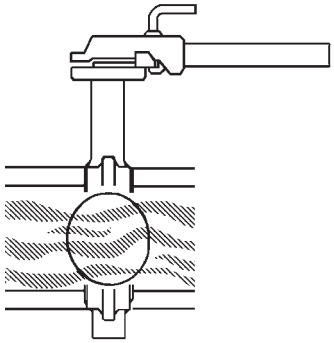

- can be used for on and off service or throttling
- when positive shut-off is necessary
- where a low valve profile is necessary
- only 90° rotation from open to fully closed (quick opening)
- Handle position is a quick indication of whether valve is open or closed.
- full port ball valves do not resist flow

Butterfly Valve

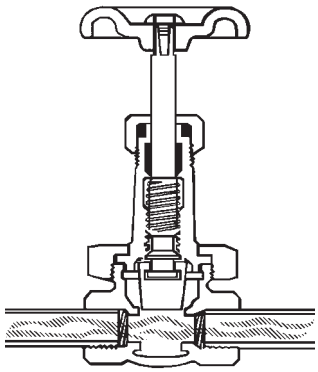

- where positive shut-off is necessary
- primarily for fully open or fully closed applications
- may be used for throttling
- only 90° rotation from open to fully closed
- lightweight
- easy to install
- less costly than an iron body gate valve

Gate Valve

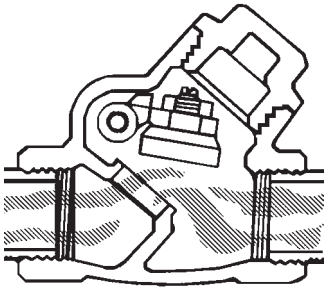

- for fully open or fully closed service - not for throttling
- for minimum line pressure drop
- for minimum fluid entrapment in the line
- for relatively infrequent operation

Check Valve

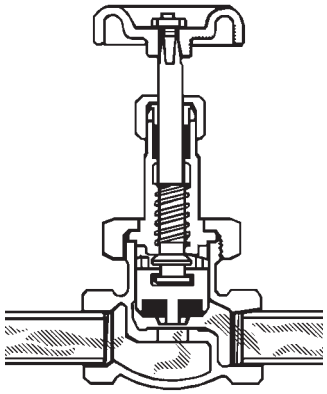

- To control the direction of flow and for quick, automatic reactions to flow change. Swing check valves are used when a minimum resistance to flow is required.
- Swing check valves are recommended for use in conjunction with gate valves. They should not be used in a rapid recycling system such as reciprocating pumps or air compressor service where they could cause chatter and damaging vibration.

Globe Valve

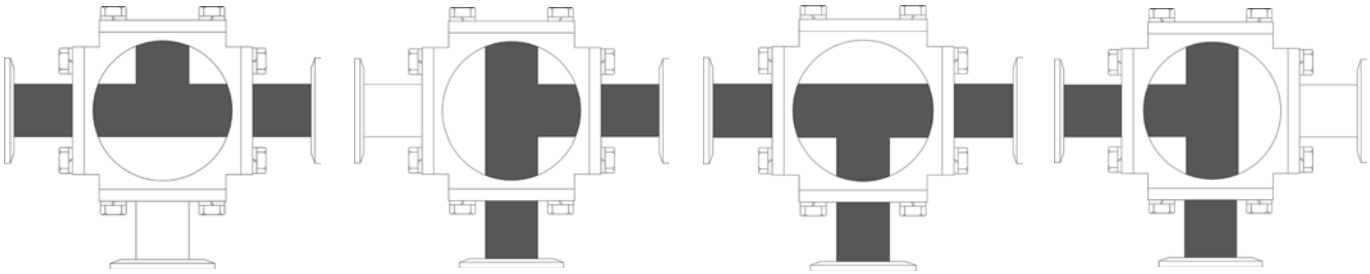

- for regulation (throttling) of flow
- for frequent operation; short stem travel reduces operator's time
- where some line resistance is acceptable

Crimp Recommendations

The crimp recommendation charts on pages 669-674 are only guides. It will not apply to every coupling situation. In some instances alternative dies and crimping dimensions must be employed to ensure safety. Experience has shown that variances in the construction of similar hoses and couplings may cause some assemblies to react differently when crimped. It is not uncommon to find hose with an outer diameter that fluctuates from one end to the other or from production lot to production lot. These inconsistencies coupled with the inherent differences between textile or wire braid, hard or soft wall, the presence or absence of an internal spiral wire and the differences in hose coverings make it difficult to establish hard and fast rules. Therefore, its imperative that hose dimensions are accurately measured, assemblies are tested, and documentation is maintained.

Crimped Dix-Lock and Dual-Lock Recommendation Guide

See pages 114 and 116 for the Dix-Lock and Dual-Lock products.

Hose ID	Part #	Hose OD		Crimp Diameter (±0.005)	Crimp Length		% Reduction

Glossary of Terms

A

ANSI American National Standards Institute, Inc.

API American Petroleum Institute

ASME American Society of Mechanical Engineers

ASTM American Society for Testing and Materials

Anodize A process for aluminum, similar to zinc or chrome plating steel, in which an aluminum part is electrically charged then, dipped in various chemicals to produce various colors and/or surface hardness.

B

Burst Pressure The pressure at which rupture occurs.

C

Chamfer To cut an angle on the hose tube to aid in stem insertion and to prevent the hose end from flaring when a stem is inserted.

Clamp A metal fitting, band or wire used around the outside of a hose end to secure a coupling, fitting or nipple.

Cold Flow Continued deformation or movement of rubber under stress.

Compression Set The deformation that remains in rubber after it has been subjected to and released from stress such as a clamp. The longer the stress is maintained the more definitive the deformation.

Coupling A device at the end or ends of a length of hose that allows a connection to be made.

Crimping The act of forming the metal sleeve or ferrule of a hose fitting with a surrounding series of die segments to compress the hose within the fitting. The crimping process changes the shape of the entire circumference and length simultaneously. Often interchanged with the term "swaged".

D

Durometer An instrument for measuring the hardness of rubber.

Durometer Hardness A numerical value which indicates the resistance to indentation of the blunt indentor of the durometer.

E

Elastomer Any of various elastic substances resembling rubber.

Expansion Ring Typically refers to a type of fire hose couplings that are attached by expanding a sleeve (usually brass) outward to compress the hose against the wall of the bowl of the coupling.

External Swage (Swaging) A ferrule is passed through a reducing die, usually split, to bring the ferrule OD down to a predetermined size (for proper coupling retention) forcing the hose tube down into the stem serrations.

F

Ferrule A collar placed over a hose end to attach the fitting to the hose. The ferrule may be crimped swaged, forcing the hose against the shank of the coupling, or the shank may be expanded, forcing the hose out against the ferrule, or both.

Glossary of Terms

G

Gripping Finger The part of the clamp that goes over and behind the stem collar to aid in clamp retention.

H

Hard Coat An anodizing process in which the surface hardness of aluminum becomes similar to or greater than that of case hardened steel.

I

Internal Expansion (IX) A plug (or bullet) is pulled through a stem or a set of blades (fingers) increase the stem ID to the plug OD or a predetermined setting when using expansion blades (fingers). This forces the stem serrations into the hose tube and the hose cover into the serrations of the ferrule.

J

JIC Joint Industrial Committee

JIC Thread Typically refers to the threads on hydraulic fittings having 37° conical sealing surfaces.

M

MSHA Mine Safety and Health Administration

N

NSF/ANSI Standard 61 Drinking Water System Components was published in 1988 to establish minimum requirements for the control of potential adverse human health effects from products that contact drinking water.

Nipple The section of the fitting that is inserted into the hose. Also known as the shank of a coupling.

Nominal A dimensional value assigned for the purpose of convenient designation.

O

Operating Pressure The pressure at which system functions, also known as Working Pressure

P

PSI Pounds per square inch

PSIG Pounds per square inch gauge

Permanent Fitting The type of fitting which, after it is applied, cannot be removed for reuse.

Polymer A macromolecular material formed by the chemical combination of monomers having the same or different chemical composition.

Proof Pressure A specified pressure which exceeds the hose assemblies rated working pressure to indicate its reliability at normal working pressure. Follow RMA's testing guidelines for specific pressures and duration's for various types of hose.

PTFE Versatile polymer, polytetrafluoroethylene, commonly known as the DuPont brand name PTFE

R

RMA Rubber Manufacturers Association

Reusable Fitting The type of fitting that is designed to be removed from a hose and recoupled on another hose.

Glossary of Terms

S

SAE Society of Automotive Engineers

SAE Threads Similar to JIC except 45° conical sealing surfaces

SCFM Standard Cubic Feet per Minute. Typically refers to the amount of compressed air a compressor can produce.

Safety Factor A ratio used to establish the working pressure of a hose based upon the burst pressure. Typical Safety Factors are as follows:

1. Water hose up to 150 psi WP: 3 to 1
2. Hose for all other liquids, solid materials suspended in liquids or air and water hose over 150 psi WP: 4 to 1
3. Hose for compressed air and other gases: 4 to 1
4. Hose for liquid media that immediately changes into gas under standard atmospheric conditions: 5 to 1
5. Steam hose: 10 to 1

Serration The part of the shank (stem) that grips the hose tube.

Shank The section of the fitting or coupling that is inserted into the hose.

Sintered Process in which powdered metal is formed in a mold under extreme pressure to form a finished part.

Styrene Butaline Rubber Also known as SBR

Surge A rapid rise and decrease of internal pressure.

T

Torque Amount of force required to turn an object. Usually measured in inch pounds (in. lbs.) or foot pounds (ft. lbs.)

Tube The innermost part of the hose that's purpose is to contain the media being transported. Usually, rubber compounds or plastics are blended to give the tube specific properties so that it is compatible with certain media.

U

UHMW Ultra High Molecular Weight. Next generation of chemical hoses after cross-linked polyethylene having a thin tube liner made from extremely dense material giving it excellent chemical resistance properties.

V

Victaulic Groove A style of couplings that has a groove cut near the end of the stem where threads would typically be. The couplings are attached using a "C" shaped clamp that fits into the grooves on the stem.

W

WOG Water, Oil, Gas. Pressure rating for valves handling these products. This does not include steam.

WP Working Pressure

Working Pressure The maximum pressure to which a hose assembly will be subjected to including pressure surges.

X

XLPE Cross-Linked Polyethylene tube material that has good chemical resistance properties.

Notes

Engineering Service

DIXON
The Right Connection™

Our Engineering Department develops workable solutions to tough problems... high external heat, flame resistance, pressure surges, hose flexing, unusual coupling end configurations requiring special clamp designs... these are only a few of the many challenges Dixon has successfully met.

Some of the services our engineers perform include:

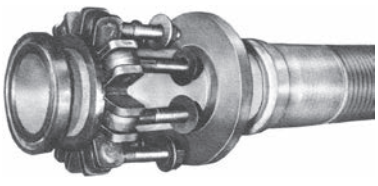

- Working with engineering and operating management to improve existing installations.
- Making a complete study of layout, clearances and other requirements to ensure correctly engineered specifications for fittings.
- Preparing hose drawings and specifications for assurance that the hose and its connections will accurately fit and function in their appropriate applications.

Illustrated below are several types of special design couplings. Each was engineered to function with maximum reliability in meeting a specific service requirement but are also adaptable to other applications.

Custom Couplings

Dixon engineers will design, and the factory produce, special couplings to meet unusual connection or other installation requirements. A typical example is the coupling shown to the right, designed to provide reliable durability and safety in connections on long lengths of oxygen hose tied into established piping in a steel mill. Other "specials" might include lifting rings or hooks, bend shields, and heat shields.

Limited Warranty

DIXON VALVE AND COUPLING COMPANY (herein called "Dixon") warrants the products described herein, and manufactured by Dixon to be free from defects in material and workmanship for a period of one (1) year from date of shipment by Dixon under normal use and service. It's sole obligation under this warranty being limited to repairing or replacing, as hereinafter provided, at its option any product found to Dixon's satisfaction to be defective upon examination by it, provided that such product shall be returned for inspection to Dixon's factory within three (3) months after discovery of the defect. The repair or replacement of defective products will be made without charge for parts or labor. This warranty shall not apply to: (a) parts or products not manufactured by Dixon, the warranty of such items being limited to the actual warranty extended to Dixon by its supplier; (b) any product that has been subject to abuse, negligence, accident, or misapplication; (c) any product altered or repaired by others than Dixon; and (d) to normal maintenance services and the replacement of service items (such as washers, gaskets and lubricants) made in connection with such services. To the extent permitted by law, this limited warranty shall extend only to the buyer and any other person reasonably expected to use or consume the goods who is injured in person by any breach of the warranty. No action may be brought against Dixon for an alleged breach of warranty unless such action is instituted within one (1) year from the date the cause of action accrues. This limited warranty shall be construed and enforced to the fullest extent allowable by applicable law.

Other than the obligation of Dixon set forth herein, Dixon disclaims all warranties, express or implied, including but not limited to any implied warranties of merchantability or fitness for a particular purpose, and any other obligation or liability. The foregoing constitutes Dixon's sole obligation with respect to damages, whether direct, incidental or consequential, resulting from the use or performance of the product.

Some products and sizes may be discontinued when stock is depleted, or may require a minimum quantity for ordering.

Limits of Liability

This catalog is intended as a product offering. It is not intended to be a user or technical manual. Information in this catalog is subject to change without notice. All users and distributors of products sold through this catalog should contact Dixon with questions of use, compatibilities, coupling procedures and life of product. Dixon's full-time engineering and test staff is always available to recommend uses and to assist distributors and users with any questions.

Safety

This safety alert logo, which appears throughout our catalog, is used as a reminder that the user should carefully review for safety the appropriateness of the product for the media, application and environment in which it will be used.

NOTE: Because of the health hazards associated with contamination and lead content in drinking water systems, Dixon couplings, unless otherwise specifically approved, are not recommended for potable water service and should not be used in applications where drinking water will contact the wetted surfaces of the coupling.

Warning: Dixon products may contain chemicals known to the State of California to cause cancer, birth defects, or other reproduction harm.
